LARA opens its meeting

Struggle over landfill site grows

Edward Simmons

By DIETER KRIEG

LANCASTER - The Lancaster Area Refuse Authority (LARA) is holding firm to its intentions of securing 58 acres of prime farmland for use at their Creswell landfill site.

Meanwhile, John and Abram Barley, owners of the 58 acres in question, are hoping that LARA can be convinced to reverse its decision. Depending on where an observer looks for indications of the possible outcome, it can go either way. At a meeting held here on Tuesday afternoon, however, nine LARA members made it clear that they intend to hold their ground. To back up their views, they brought in their accountant, geologist, attorney and others who are knowledgeable on the subject.

The Refuse Authority was caught off guard on at least two occasions during the 2½ hour meeting which was attended by an estimated 35 people.

The first question which hit LARA members in a sensitive spot concerned the drainage of polluting fluids from the Creswell landfill. The question was brought up by Jim Heinly, attorney for the Barley Brothers, after it was learned that knowledge of possible pollution has existed since 1968. Edward Simmons, representing the Department of Environmental Resources in Harrisburg, acknowledged that fact. The DER official also revealed that the Creswell site is being operated without a permit.

Heinly seized these revelations and directed questions on the matter to LARA Chairman John Shirk, who became visibly irritated with the courtroom-style interrogation. Shirk responded by cutting Heinly short and saying "this is not the place for a court case." Heinly was asked to see Simmons on the matter on his own time. Simmons agreed to the idea.

John Shirk

Later during the meeting, Lancaster County farmer and conservationist Amos

[Continued on Page 17]

MILLERSVILLE, Pa. - A special hearing has been called to take further testimony from the public regarding the controversy between the Lancaster Area Refuse Authority (LARA) and the taking of prime agricultural land in Manor Township.

The meeting will be held this coming Wednesday in the Lyte Auditorium of Millersville State College. Activities are to get underway at 7 p.m.

Anyone interested in expressing his views on the "further encroachment of prime farm land" is asked to attend and be heard. The specific issue at stake is the taking by eminent domain of 58 acres of land on the John and Abram Barley farm. On a wider scope, conservationists, farmers, and concerned citizens see the case as a landmark in land-use planning.

Mr. and Mrs. Harold Rohrer received this Grant Heilman aerial photograph as a prize for being Lancaster County's Outstanding Cooperators within the Lancaster County Conservation District. The honor was bestowed on them at a dinner on Thursday evening.

Outstanding conservationist named

Shelhamer 'sick' over land use developments

By DIETER KRIEG

LANCASTER - Lancaster County's new outstanding conservationist, Harold Rohrer of Strasburg, said he was totally surprised to have the Lancaster County Conservation District name him as their Outstanding Cooperator for 1977.

But it wasn't a surprise that the subject of Barley vs. LARA came up on occasion during the 3½ hour annual meeting at the Good and Plenty Restaurant on Thursday night. Several people commented about it and petitions were made available at every table for people to sign if they opposed the taking of good farmland by eminent domain for a garbage dump.

One of those who addressed himself to the Barley farm question was guest speaker Kent Shelhamer, Pennsylvania's chief at the agriculture department. Displaying a bit of caution in how he approached the situation, Secretary Shelhamer's comments picked up momentum when he said: "I've never believed in a government official hiding behind anything." While describing himself as an

Pennfield honored dairymen from 20 counties

LANCASTER, Pa. - Dairymen from eastern Pennsylvania and throughout Maryland on Wednesday attended the sixth annual dairy awards luncheon sponsored by Pennfield Corporation, Rohrerstown, Pa.

Over 100 trophies were presented to dairy farmers for outstanding herds, or individual cow records, compiled during 1976. Recipients included farmers from 13 counties in Pennsylvania and seven counties in Maryland.

Four new members were added to the Pennfield 700 Club and recognized for outstanding performance in herd butterfat content. They included Maple Lawn Farms, Inc., Fulton, Md., C.E. Iager and Sons; Pep-L-Lea Holsteins, Oxford; Robert E. Pepple; Sinking Springs Farms, Inc., York, Herman Stebbins; Stoltzcliff Farms, Atglen, John S. Stoltzfus.

Trophies were presented by Frank Campbell, Richard

NEPPCO turkey meet airs mutual problems

By SALLY BAIR
Feature Writer

GETTYSBURG, Pa. - Participants at the annual Neppco Turkey Conference learned that they may be able to make money in the last quarter of this year and they also got some tips on dealing with double - digit inflation.

The conference was held at the Sheraton Inn, here and had about 85 people attending.

Lew Walts, executive vice-president of the National Turkey Federation, said that turkey growers could come out ahead in 1977 if the projected price of $.54 for the fourth quarter comes true. and if the price of soybeans and corn remains favorable. He said the average price for the year could be $.52½ as compared with $.49½ in 1976. Going out on a limb, Walts said prices may be $.52½ in the first quarter, $.51½ in the second quarter, $.50 in the third quarter.

Despite slight gains from last year, he said, "The way we see things now, it doesn't sound good. I'm just trying to be realistic."

Lancaster Grain Prices

Friday March 18, 1977

These prices are made up of the average prices quoted by a number of participating area feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Friday, March 18 are as follows:

	Bid +	Offered+
Ear Corn	60.00	68.25
Shelled Corn	2.61	2.79
Barley	2.47	2.65
Oats		
Local	1.72	1.90
Western	2.17	2.33
Wheat		
Millers	2.73	2.92
Soybeans	8.13	——
Soybean Meal		280.00

COLEUS

Pennsylvania Pork Producers Council

Join your fellow pork producers in supporting pork promotion and production research to keep hogs a profitable farm enterprise. Tell your market or buyer that you want 10 cents per market hog or 5 cents per feeder pig deducted to support these programs. Most markets and buyers will cooperate fully if you let them know.

The PPPC was formed and is funded and directed by producers. There is no Government Agency involved.

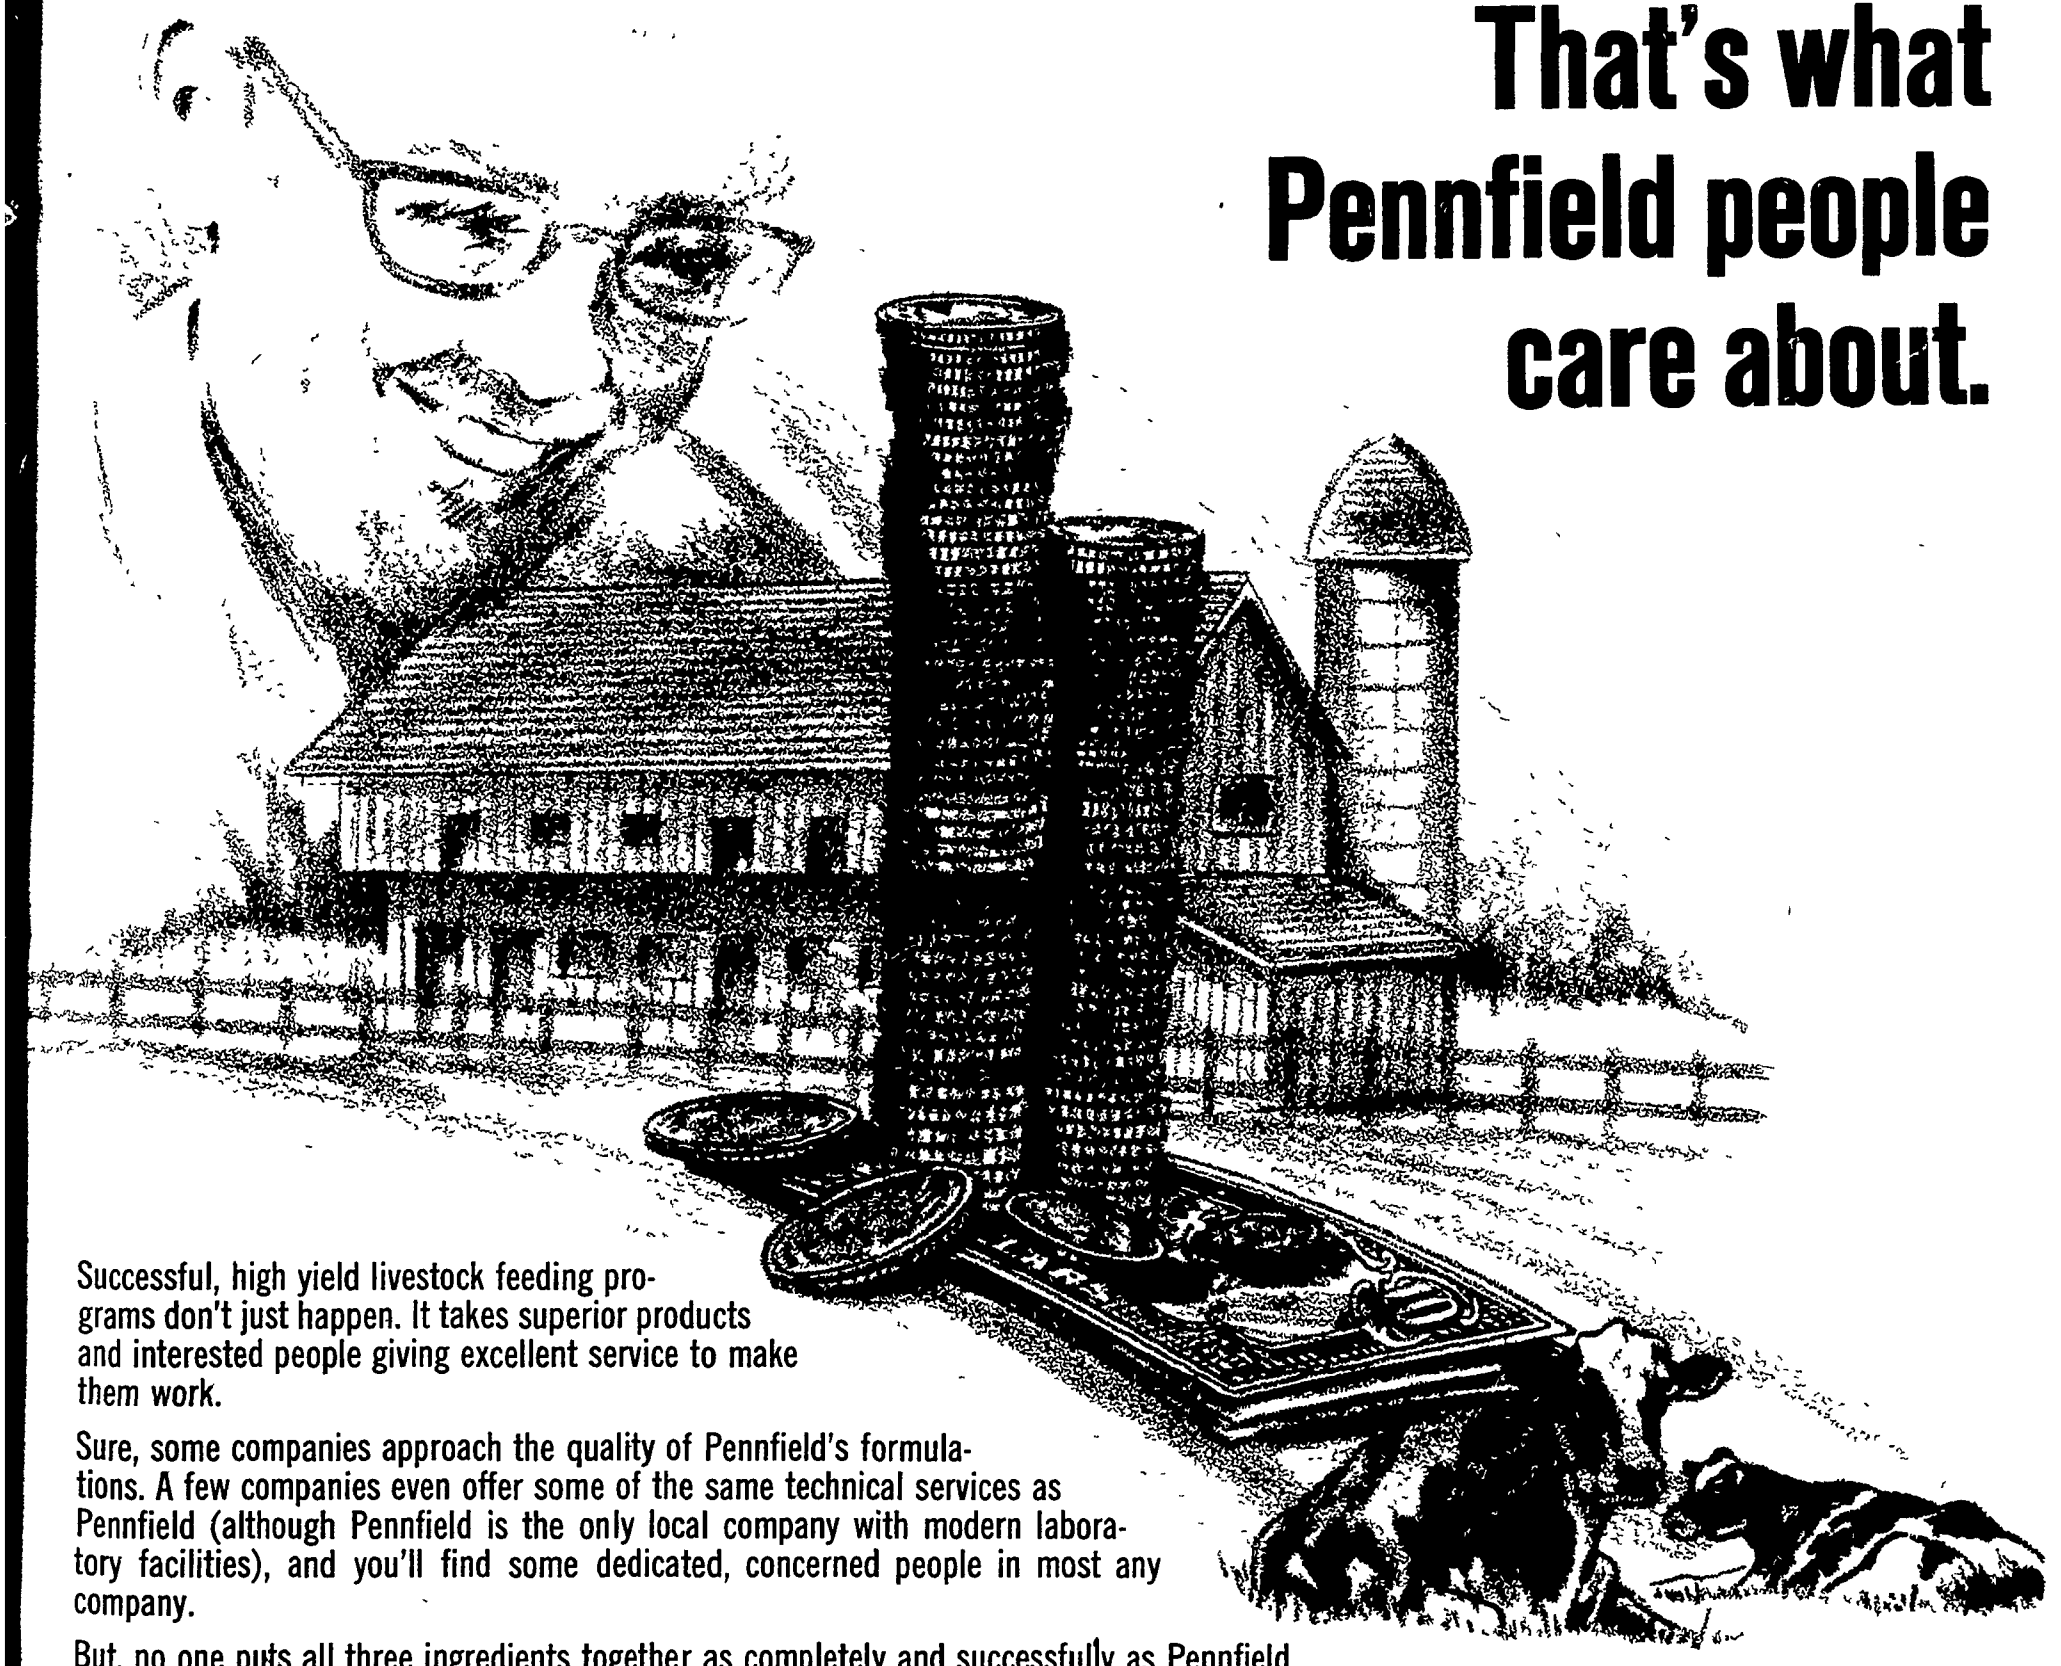
Your LIVESTOCK PRODUCTIVITY, your PROFITABILITY.



That's what Pennfield people care about.

Successful, high yield livestock feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete livestock feeding and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy!

THE OLD FARMER'S ALMANAC

MARCH 21-27, 1977

Spring is here!

Now's the time for a complete house cleaning because Spring begins March 20 at 12 43 PM Alger Hiss went to prison March 22, 1951 First quarter of the moon March 27 Average length of days for the week 12 hours, 20 minutes Polygamy abolished March 23, 1882 U S Senate first opened its doors March 27, 1794

. Friendship cannot stand only on one side

Ask the Old Farmer: I've heard that in the old days people used to cook and eat cucumbers for breakfast Is this true and can you tell me how they were cooked? F A , Louisville

It was true in Colonial times and it is true today They go well with fish, which is a popular New England breakfast After paring the cucumbers, cut them into pieces as thick as a silver dollar Dry them in a cloth, season with pepper and salt and sprinkle thickly with flour Melt some butter in a frying pan, toss in your slices and fry until a light brown (And if you are interested in 150 more delectable and authentic Colonial recipes adapted for the modern kitchen, send $3 00 to The Old Farmer's Almanac Colonial Cookbook, Box BD, Dublin, N H. 03444.)

Home Hints: Apply an onion to a wasp sting

OLD FARMER'S WEATHER FORECASTS

New England: Sunny and warm to start, then showers, cold and cloudy with flurries for week's end

Greater New York-New Jersey: Clear and warm through Wednesday, then showery at midweek, week's end clear and cool

Middle Atlantic Coastal: Clear and warm with rain by Thursday; fair weekend expected .

Piedmont & Southeast Coastal: Sunny and warm to start, with heavy rain Thursday and Friday, remainder of week fair.

Florida: Showers through Friday; clearing in north, cloudy south over weekend

Upstate N.Y.-Toronto & Montreal: Sunny, mild with intermittent showers, then rain Wednesday, cold and cloudy for week's end

Greater Ohio Valley: Rain and clearing, very warm to start, then rain on Wednesday, week's end brings sun and mild temperatures.

Deep South: Week begins partly sunny and warmer with snow and sleet north, rain south Wednesday through Friday, fair and mild through weekend

Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas

EDITORIAL COMMENTS

Ag Day is every day

March 21 has been set aside as Agriculture Day . . "a vigorous, unified effort to promote better understanding between rural and urban Americans."

Think about that for a second. Isn't that what's needed every day? I believe so.

Farmers farm 365 days of the year; we all eat every day. Anytime a farmer comes into contact — either directly or indirectly — with a city person, he should make an effort to promote agriculture That's every day. And it should be done in a sincere, informative manner Not in an arrogant or even angry fashion which is characteristic of many union bosses

After all, how much do farmers really know about the city man's way of life? Too often we look at his salary and fringe benefits without paying attention to his disadvantages Too often we remember only the messy cow tails which slapped us in the face, the long hours, the high investments, and bad weather, while forgetting the rewards and blessings of farming

This is not written in defense of the non-agricultural worker's attitudes and wage earning power, but to illustrate that the door to better understanding swings both ways It shouldn't exclude the farmer, and that's why Ag Day is a terrific and laudable idea. Its only improvement would be for all farmers to participate in an every-day type of "PR" program with a positive attitude.

The National Agri-Marketing Association, which came up with the Ag Day idea and is donating creative and organizational talents valued at close to $250,000, asks farmers:

"Who'll be heard ... the people with the facts, or some group grinding its ax?"

In the long run, it's the farmer's decision. Which is where it belongs. I hope you'll choose to do your part and that it's in the direction for better understanding on both sides of the fence.

Public opinion needed

Right now the Barley farm issue is on everyone's minds and everyone's lips. We're all concerned for the outcome of the issue and what it could mean for us in the future. And, it's time to get involved.

The Lancaster County Poultry Association has done just that by buying space in this week's **Lancaster Farming** (page 13) and proclaiming their stand on the issue. Because they believe that their sentinents are shared by others around the county, they have included a coupon which can be clipped, signed, and sent to the Lancaster County commissioners.

They have also purchased space in two other Lancaster newspapers as well, and are hoping to have the greatest mail campaign in the county through a combined effort of concerned citizens. However, they can only achieve this goal if subscribers get involved, sign their names, and mail the coupon. **Lancaster Farming**, alone, has a circulation of nearly 30,000 which means the readers can flood the offices with mail if one coupon per paper is mailed to the commissioners. So, if you're concerned, this is the simplest way to get involved. We urge you to do it.

BEYOND THE FATTED CALF

Lesson for March 20, 1977

Background Scripture: Luke 15.
Devotional Reading: Psalms 103:11-14.

The older brother in the Parable of the Prodigal Son was spiritually nearsighted: he was unable to look beyond the fatted calf - a very limited horizon indeed!

Of course, the same was true of the younger brother, at least in the beginning. As the story opens we see a willful young man who decides that he has had enough of the confinements of homelife and family. What he wants is "what is coming to him," his share of the family capital. As he looked over his father's flocks he knew that a certain portion of these animals were his by right of anticipated inheritance. But he didn't want to be a shepherd. Instead he wanted to cash in his share and take it to some "far country" where the action was.

"But he was angry"

We all know what happens next in the story: how the prodigal spends his inheritance in the wild pursuits of the "far country," how, reduced to poverty, he scratches out a bare existance performing a task no sane Jew would accept: feeding and tending the pigs! We know too that at last he "comes to himself," realizes what he's done and decides to return home, even though he has forfeited his status as a son. We know too that the father has been scanning the road and, seeing the returning prodigal, hurries down the road to greet him.

Many of us tend to drop the story at that point. But there is an important sequel or coda to the story that we must not miss. In the midst of the joyous celebration we see the older brother return wearily from the fields. Hearing the celebration and seeing the bright lights, he learns that his prodigal brother has returned and his grateful father has declared a banquet.

The older brother does not join in the celebration. No, he is "angry," very angry. And can't we understand how he feels? After all, he didn't run away to a far country and demand his share of the inheritance. He stayed on and worked faithfully for his father - yes, even having to pick up some of his brother's work in his absence. He did all the things a dutiful son is supposed to do, but there was never any celebration for him.

"These many years. . .!"

His problem is that he cannot see beyond the fatted calf on the banquet table. Both had wanted what they thought was theirs by right, although they pursued it in different ways. The younger brother had learned that there is more to life than one's share of "what is coming to you." The older brother by his words and actions reveals that he still does not understand that. In other words, it does not appear that the older brother remained and loyally served his father because he loved him, but because he had his eye on the "fatted calf."

Some of us are the "prodigal son" and some of us are the "elder brother," but both of us must look beyond the "fatted calf."

NOW IS THE TIME...

County Agr. Agent
Telephone 394-6851

TO INSPECT PASTURES

The disposal of junk and trash in the country continues to be a problem. I'm aware that too many fields contain bottles, tin cans, papers, and other forms of domestic trash. In pasture fields where livestock will soon be grazing, there is danger of poisoning from this trash. Producers should take the time to go over the pasture area, especially along roads, and remove the material before the livestock have a chance at it. I've known of paint cans and empty chemical cans that are dangerous to livestock that have been found in the rural areas. When removing this material farmers are urged to report any means of identification of the material to township officers or supervisors; thoughtless persons who continue to dispose of their trash in this manner should be prosecuted.

TO SHEAR SHEEP

When warm Spring weather arrives, the sheep flock should be removed of their fleeces. Too many times the sheep are not sheared until late May or June when they have been hampered by the wool in hot weather. The ewes will milk better and be better mothers to their lambs if they are sheared during March or April. The fleeces should be dry when sheared and stored in a dry, clean place until marketed. We suggest the nearby wool pools as a good means of selling the wool on the merit basis; the wool will be graded at these pools Both the Berks County pool at Reading and the Cumberland County pool at Carlisle will take Lancaster County fleeces. Details are available. The other day at a livestock meeting, Ben Morgan from Penn State reported that 80 percent of the wool produced in Pennsylvania is sold through one of the cooperative wool pools.

TO MAKE STRAIGHT ALFALFA SEEDING

Local growers who have open ground and want to establish a new stand of alfalfa could be getting their ground ready for this new seeding. Many growers have been very successful in recent years by making a seeding of only alfalfa late in March or early April. By making the seeding very early in the Spring, one or more cuttings can be made during the first season. The band seeding method is suggested where the seeds are carried down under the drill and dropped in a row over a band of complete fertilizer. Band seeding attachments are available for most drills. When making the straight alfalfa seeding, some form of chemical weed control is needed. Please refer to the 1977 Agronomy Guide for details.

TO SAVE FUEL - PLANT A WINDBREAK

The planting of trees for a natural windbreak is suggested at this time in order to save fuel and energy. Many folks in the rural areas experienced very cold winds last January and high fuel consumption. Several rows of evergreen trees planted on the windy side of homes and farm buildings will give considerable protection and reduce heating costs. In line with energy conservation and the reduction of fuel costs local farmers are urged to give windbreaks some consideration. Information on the kinds of evergreen trees and the spacing is available upon request from any Extension office.

Farm Calendar

Today, March 19

Maryland Cooperative Milk Producers annual meeting, Hunt Valley Inn, Cockeysville, Md. 10 a.m.

A PUBLIC NOTICE TO CONCERNED CITIZENS

THE LANCASTER COUNTY POULTRY ASSOCIATION STANDS AGAINST THE TAKE OVER OF PRIME CLASS 1 FARM LAND IN MANOR TOWNSHIP BY THE LANCASTER AREA REFUSE AUTHORITY FOR THE PURPOSE OF DUMPING TRASH. WE BELIEVE THAT PRIME FARM LAND SHOULD BE PRESERVED FOR THE PURPOSE OF FEEDING PEOPLE, NOT ACCEPTING THEIR REFUSE. WE DO NOT BELIEVE THAT ALL POSSIBLE ALTERNATIVES HAVE BEEN FULLY EXPLORED IN THIS MATTER. WE ALSO FEEL THAT THIS IS THE OPINION OF MOST OF THE RESIDENTS OF LANCASTER COUNTY. THEREFORE, WE ASK YOU TO SHOW YOUR SUPPORT OF THIS VIEW IN TWO WAYS:

1. Attend the Manor Township Supervisors hearing on March 23rd when arguments will be presented as to whether to issue the Lancaster Area Refuse Authority a permit to operate a landfill on this property.

2. Fill out the coupon below and mail it to:
   The Lancaster County Commissioners
   c/o The Lancaster County Court House
   Lancaster, Pa. 17602

Jack Tracy
Jean D. Mowery
Raymond G. Herr

Dear Commissioners:

We believe that prime farm land such as the Barley Farm in Manor Township should be preserved for the purpose of providing food for people. PLEASE help keep Lancaster County the Garden Spot of the World.

Respectfully,

_____

Grow top quality pasture for your horses without guesswork.

Your Stanford Seed dealer now has *complete* horse pasture mixtures. Each balanced formula of high-yielding grasses and legumes can help you grow the best pasture you've ever had.

There's no guesswork at all. Everything your horses need in energy-packed home grown pasture is right here, pre-mixed for you and ready to plant.

TRIPLE CROWN – highest quality mixture for professional horse breeders. This mixture is formulated around Tetraploid ryegrass and Troy Kentucky bluegrass.

HOBBY HORSE – an economical formula developed for those who keep horses as a hobby. Contains Tetraploid ryegrass, Kentucky bluegrass and other selected grasses and legumes.

Also available – HIGHLAND, LOWLAND AND GENERAL ★★★★★ pasture mixes for cattle and other livestock.

FREE! Latest facts on planting and management for higher-yielding pastures. To get yours, send coupon to either address below.

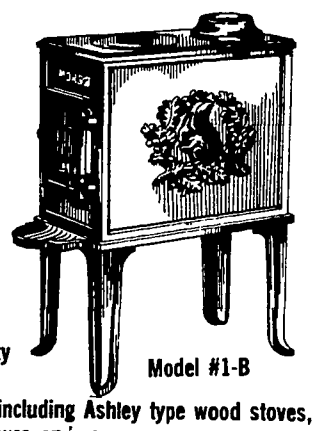
MORSØ - THE WOOD STOVE
THAT PAYS FOR ITSELF



Model #1-B

* Air tight design
* Baffle system
* Long burning
* 70-75% efficiency
* 240 pounds cast iron
* Enamel finish
* Inner cast liners
* Large feed door
* Burns 22.8" log
* 5,186 cu. in.
* Holds fire overnight
* 6,000 cu. ft. heating capacity

We have many to choose from including Ashley type wood stoves, wood and coal combination stoves and ranges.

Build your own chimney with insulated stainless steel chimney pipe - we have it in stock.

This winter is an exceptionally good winter to burn wood and save on fuel bills.

MEDICINE AND MANAGEMENT

By CARL TROOP, VMD

To most farmers the term lepto or leptospirosis is just the name of another disease they have read or heard about, but has never been close enough to cause concern or alarm. To some, however, it is a very real entity, one which has cost thousands of dollars in lost calves, abortions, lowered production, mastitis, rebreeding problems, and veterinary bills. Leptospirosis is a very real and ever present danger, one which every farmer should be aware of, knowledgeable about, and prepared to protect his herd from.

Leptospirosis is an infectious disease caused by an organism which infects and can be carried by a large number of animals including cattle, swine, sheep, goats, horses, dogs, skunks, foxes, mice, rats, and humans. Leptospirosis prevention, diagnosis and treatment is complicated by the fact that there are 22 groups of lepto organisms containing more than 100 serotypes. Fortunately there are no more than five types which we presently need be concerned about.

Leptospirosis infections often occur without any noticeable specific signs, but can result in a variety of disease conditions, the most prominent one being abortion, usually in the last trimester of pregnancy. Other major conditions are fever, loss of appetite, mastitis, and reduced milk production.

The "abortion storm" is the most feared and well known effect of leptospirosis, and its reputation is well deserved, as it has resulted in tremendous losses in many herds. Lepto often starts as a febrile stage and may be accompanied by decreased appetite and reduced milk yield.

Abortion, when it occurs, is usually one to five weeks following the onset of signs. Approximately 25 percent of infected cows in the last trimester of pregnancy abort, and rebreeding problems often follow for several months.

In calves the disease is often more pronounced with a higher death rate than with adults, and often with kidney involvement resulting in bloody urine; hence the common name of "Redwater disease of Calves."

In swine lepto is present in all parts of the United States. The primary loss is abortion in infected pregnant sows or weak pigs at farrowing which often die within 48 hours. The secondary problem is that swine can remain carriers of the organism for up to nine months, possibly longer, and provide a source of bovine or even humn infection, ("Swineherders disease"). Thus it is very important to keep swine and cattle separated.

The five major serotypes infective for domestic animals are Lepto pomona, gripootyphosa, hardjo, icterohemorrhagiae, and canicola. Laboratory diagnosis of the particular serotype may be confusing because of crossover between the serotypes. According to Dr. Lenn Harrison of the Pennsylvania Bureau of Animal Industry Laboratory, the most prevalent serotype in the state is L. pomona, followed by L. Grippotyphosa and L. Hardjo. Lepto Canicola and Ictermemorrhagiae are here and have shown reaction but their importance is still difficult to evaluate. The disease is widespread as, according to Dr. Harrison, "positive samples have been received from every major farming area in Pennsylvania."

Treatment and control are difficult once an infection is established because of the relative ineffectiveness of antibiotic treatment and the existence of carrier animals which otherwise may appear quite normal. Antibiotics may shorten the febrile period but often will not alter the course of infection in other respects. The organisms also tend to accumulate in areas of the kidneys out of the reach of antibiotics, and may be shed in the urine for several months.

Prevention then is the key to lepto control. The usual source of lepto infection is a carrier animal which sheds the organism in the urine. They do not multiply outside the body, but can survive in surface water (ponds, streams, marshes) for up to six weeks. They are also carried by wild animals. So the most important step in prevention is vaccination. There are several vaccines available in costs ranging from 15 cents a head to $1.50 a head, and with lepto vaccines you get exactly what you pay for. The cheapest vaccines contain only L. pomona and vaccination for one lepto serotype does not provide protection against any other. So vaccination with L pomona vaccine may still leave your herd wide open for a lepto invasion. Your veterinerian is best able to determine which vaccine or combination of vaccines, if any, is most suitable for your particular area.

Incidence of leptospirosis is greatest in spring and summer, and vaccination in early spring will best provide the highest level of protection when most needed. One must remember, however, that no vaccination is 100 percent effective, but only protective to a certain degree. Lepto vaccination, fortunately, is one of the more effective ones.

Vaccination is recommended annually to all animals in the herd over six months of age, as vaccination of younger animals tends to be less effective. Again, early ingestion of colostrum by newborn calves is very important for transferring immunity from dam to calf.

Vaccination for lepto or any disease is much like insurance. You may never know if the vaccination has really been needed, although additional peace of mind is one of the intangible benefits. However, once lepto has struck and your herd is not protected, it is too late for those cows already affected. The choice is yours.

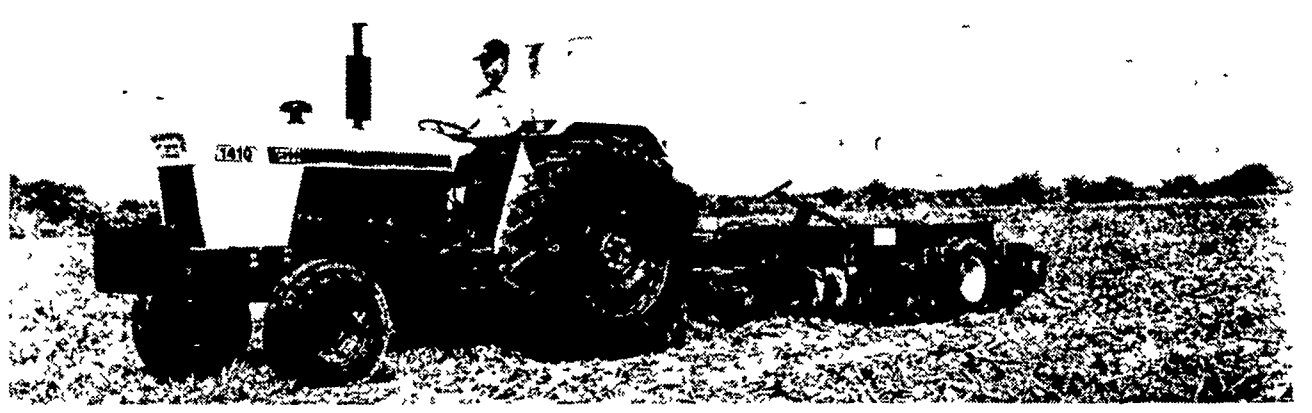
PTO TURBO HP
1410 Synchromesh (std.)
1410 Range Power Shift (opt.)

*Official test

op of
he Case
low-profile line



If you've been using tractors up to 65 hp, your next logical step up in power is the 80 hp 1410, available with 12-speed synchromesh or range power shift transmission. According to official tests, the 1410 synchromesh is the fuel economy champion in its horsepower class. It used a miserly 2.91 gph in the varying pto power tests. The 80 turbocharged horses provide muscle and strength to handle heavy field jobs, yet give operating efficiency that cuts costs on lighter work. And you get the all-round versatility and maneuverability you need for big and small barnyard and feedlot chores.

80 horses that won't say no. You'll like the power, response and acceleration this Case diesel packs into its 219 turbo-cubes. And you'll like the added strength built into this engine's cylinder block, crankshaft, connecting rods, pistons, bearings, valves and timing gears. The crankshaft is a toughened steel forging statically and dynamically balanced to run smoothly. The engine has a dry micronic air cleaner with service indicator, plus cold starting aid.

Hydrostatic steering. Like the larger Case 1070 and 970 tractors, the 1410 has a transverse mounted cylinder that moves with the front axle to provide increased accuracy for precise steering. There's less than three easy turns from lock to lock.

Selectamatic hydraulics. A single lever provides depth/draft control for mounted ground-working implements, height control for sprayers, mowers, etc., and a third position that offers traction control for a semi-mounted plow with gauge wheel.

Tandem hydraulic pumps now provide a maximum 15.5 gpm remote capacity. With a power beyond manifold, the full oil output of both the 8.75 gpm 3-point hitch pump and the 6.75 gpm remote pump can be used to speed up loader operations. And the lift capacity of the Category II hitch 24 inches behind the hitch point is 5535 pounds. Hydrostatic steering has its own 4.7 gpm pump. Optional 12-speed range power shift transmission has a separate 5.75 gpm pump. A full-flow hydraulic filter is standard, plus an oil cooler with optional power shift.

Independent pto. The hand operated power takeoff clutch is independent of the traction clutch. You can stop and start the tractor without interrupting pto power, engage or disengage the pto on-the-go or standing still. The 540 pto speed is standard. Optional is a 540/1000 rpm dual speed pto. You can switch this stub shaft by simply reversing, then replacing the shaft flange cap bolts. It cannot be mounted the wrong way. (See picture page 2)

Oil-immersed disc brakes aid in steering with right and left pedals. A convenient center master pedal equalizes braking power for transport and hauling. There is also a hand operated parking brake.

Struggle

[Continued from Page 1]

k of Millersville tioned LARA's financial ements and plans. Shirk bensed with the subject rply by pushing the issue de and effectively ncing Funk. The brief olay of tempers was soon gotten, however, and the eting returned to the calm e which characterized the hour parley. Some ncial details were later closed by LARA and its resentatives.

Nevertheless, some of se attending the meeting the Manheim Township Municipal Office Building were upset by the proceedings, mumbling that LARA was avoiding some questions in order to keep the facts from the public. A number of them had signed up to be heard. Many of them were. Only one chose to side with LARA's actions, while all other visitors had come here to defend the Barleys and several others in the area who are having smaller tracts of land taken.

The lone individual who defended LARA was Lancaster County Commissioner Jean Mowery. She claimed that the LARA members "had been unduly maligned," and that they, as volunteers, had been doing a fine job. A person sitting near this writer nodded in agreement, although he later spoke out on behalf of wiser land use.

Mowery kept her talk very brief, and left immediately afterwards. Saying she spoke on behalf of the other commissioners as well, she thanked the Refuse Authority for their work. On her way out the door, a farmer stood up to express displeasure with the fact that neither she nor the other commissioners were at a meeting at the Barley farm a week earlier. Mowery had already explained that she and the others were in conference at another meeting. The farmer eagerly asked' "And when did that meeting break up?" Mowery replied "Ten o'clock," and added she had other matters to tend to afterwards. The meeting a week earlier at the Barley farm did not officially get underway until after 11 a.m. More than a score of Pennsylvania legislators and other public officials were in attendance that sunny day. (See Lancaster Farming's issue of March 12, page 1.)

Attorney Heinly summed up his feelings about the meeting by telling Shirk that "You've heard your own people. I think we're missing some of the issues." Heinly suggested that other legal, engineering, and economic experts be brought in who are not directly involved with LARA. The lawyer also asked LARA board members to make themselves available to answer "the questions which couldn't be answered here." Don't couch a meeting such as this in terms of review," he said. He also suggested the Refuse Authority was allowing itself to go deeper into trouble by not facing the issues squarely.

Shirk replied: "We'll meet with you at your convenience if we can arrange it at our convenience."

Creswell's operation as a landfill without a permit appeared to be a point which tickled the listeners, including Heinly, who in all likelihood will use that point to bolster his case. Although Shirk disallowed further investigation on that score that afternoon, DER's Simmons and Heinly agreed to meet separately to discuss the matter, as well as the leechate question. The Creswell landfill is in violation of DER regulations on both counts.

On the matter of the permit, however, Simmons explained that if DER were to go strictly by the law, people would have no or very few approved places where they could dump their refuse. He noted that all dumps were to have a permit as of Jan. 1, 1970, but that the Department decided to allow a number of facilities to remain open as long as progress towards DER standards was being made. To have closed all dumps on Jan. 1, 1970 would have meant chaos," the DER regional solid wastes director said. Speaking specifically with regards to the Barley farmland in question, Simmons also said that his office had not as yet received an application from LARA which stated their designs on the Barley property.

During the first half of the meeting LARA officials and representatives spent time explaining their present position and thinking, while at the same time citing reasons as to why other alternatives aren't feasible to handle. Lancaster County's refuse Point by point, such alternatives as resource recovery, incineration, and other landfill sites were given a negative score. Some of the considerations involved and outlined by LARA spokesmen were: environmental impact, financing, legislation, and operation.

LARA claims that it needs to prolong the life of the Creswell landfill in order to generate enough income to pay for leachate treatment facilities which the Department of Environmental Resources requires. That project reportedly costs $1 million. Funk and others wondered why the Authority can't simply raise trash collection rates to have the costs taken care of by 1980, rather than 1985. (The Barley's land is expected to add five years to the landifll, and after that time the future of the site would again be in question).

Although it was admitted that LARA has a current equity of $800,000, LARA's attorney John Hartman answered critics by theorizing that the public might be tempted to dump their wastes off of highways if garbage collection rates were increased too much.

The Barley farm and several smaller adjacent tracts owned by Harry Graham, Clarence Shearer, Paul Ament, Clyde Ament, and Edward Andrews, are needed by LARA to keep the present landfill operation viable. One reason the site looks so good to them, they claim, is because the soil in the area is ideal for covering garbage. Simmons and LARA geologist Jim Humphreville both con-

[Continued on Page 26]

THE SMALLEST OF THE CASE LOW PROFILE LINE

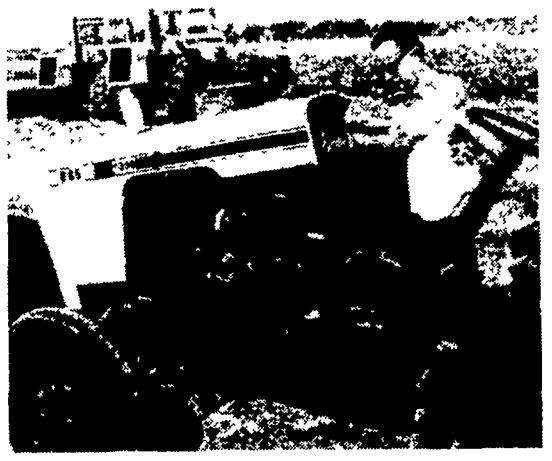
43 TO HP synchromesh

Economical all-round farm workhorse

Any farm, large or small, has a well worn niche for a versatile 43 hp tractor. And this Case 885 is designed to fit into almost any general farm, truck farm, vineyard, orchard or grove.

Two models to suit your needs. The 885 standard row crop model provides 48-72 inch adjustable front tread, 56-76 inch adjustable rear tread to handle almost any row crop need. Power adjustable rear wheels are optional. The 164-cube, 43 hp diesel engine and 12-speed synchromesh transmission give power and speeds to match any job. Differential lock keeps you moving in slippery going. You get Select-amatic hydraulics with Category I hitch and single lever hydraulic control with 3-way dial selector. Multi-speed live pto handles heavy or light loads. Hydrostatic steering. Underneath muffler is optional. The 885 Narrow model is the same as the 885 standard, except for its extra-compact

Rugged 3-cylinder diesel. High horsepower to displacement ratio gives this tough Case tractor exceptional lugging power. It has the special monochrome iron block that provides unusual strength and long life. Plus four heavy 2.5 inch main bearings and 2¾ inch connecting rod bearings with a toughened forged crankshaft. Aluminum alloy bearings give long service. Rotating exhaust valves eliminate valve sticking, safeguard maximum power and economy. Opposed manifolding and crossflow cylinder head increase air intake for extra power and clean-burning fuel economy. Quick cold-start device delays fuel injection until higher compression temperatures are reached.



Ideal for loader work.

Consumed by flames, a once stately barn was reduced to rubble.

Berks County writer experiences tragic loss of barn and contents

By LAUREL SCHAEFFER
Berks County Reporter

SINKING SPRING, Pa. - The people of this area are worried, and have the right to be, especially if they have a barn. Fire has taken two barns already and almost had a third one.

The first fire was on March 1. It was the barn of Donald Schaeffer, my husband. We lost all of our hogs, some of our equipment and crops, along with the countless "odds and ends" which never seem like much until they are gone. It was practically full of hay and straw.

Now we can truly sympathize with others who have watched their hard work and countless efforts to up in flame, knowing how helpless their livestock were. Our weren't just pigs, they were more like our family. And the worrying, how will we ever get back on our feet again?

But one good thing, we have many people to thank for their generous help when it came time to work.

Another barn was destroyed on March 10. It was the barn of Lester Kreider, only minutes away from ours. They too have unfortunately experienced the horrid terror when their "turn" came.

The Kreider barn was full of cattle, fortunately they were evacuated in time, but that was all that was saved.

A third barn in the same vicinity was almost another victim. Thankfully that one was saved.

Frank Campbell, Pennfield area manager, congratulates southern Lancaster County dairy production award winners, left to right, B. Neff, C. Neff Sr., C. Neff Jr., J. Ressler, and F. Frey.

Among dairy award winners in southern Lancaster County were, left to right, D. Bitler, C. Neff Jr., G. Book, P. Witmer, P. Ranck, R. Witmer and A. Breneman.

Pennfield

(Continued from Page 1)

Poole, Stephen Leiser, Gene Scholsnagle, Pete Knutsen, Edgar Snavely, Francis Strause, Russell Latshaw, and Elwood Earhart, all of whom are Pennfield area managers.

The award winners qualified based on any one of the following three requirements: Herds with over 17,000 pounds milk and-or 600 pounds of butterfat; herds with an increase of 1,000 pounds of milk of more per cow; herds with an increase of 40 pounds of butterfat per cow over 1975 totals.

High herds, owners, and locations, with records showing over 17,000 pounds of milk and -or 600 pounds of butterfat were: Sinking Springs Farms, Inc., Herman Stebbins, York, 67 cows; Maple Lawn Farms, Inc., C. E. Iager & Sons, Fulton, Md., 149 cows; Pep-L-Lea Holsteins, Robert E. Pepple, Oxford, 77 cows; Stoltzcliff Farms, John S. Stoltzfus, Atglen, 58 cows Dale-Pride, Dale Hostetter & Sons, Annville, 77 cows; Wallymae Farms, Wallace Mellott, Harrisonville, 56 cows; Sun Trail Farms, Norman and Dale Rothermel, Pitman, 46 cows; Jernelle Farm, Paul W. Chronister, Boiling Springs, 35 cows; Ernest Barnhart, Clear Springs, Md., 76 cows; Charles C. Byers, Millerstown, 33 cows; Stewhills Farm, Robert and Michael Stewart, Airville, 43 cows; Mowry Farms, Clarence and Kenneth Mowry, Roaring Springs, 180 cows; Cocalico Farm, Paul B. Zimmerman, Ephrata, 35 cows; Carl E. McMillen, Loysville, 61 cows; Kirwood Farm, Clark E. Weyland, Rockwood, 57 cows; Vern-Lee Holsteins, Russel Kline, Denver, 31 cows; Blossomelle Holsteins, Rhelda and Lynn Royer, Lancaster, 44 cows; Kingstead Farm, Leslie C. King & Sons, Damascus, Md., 100 cows; Penn Del Farm, Raymond F. Witmer, Willow Street, 67 cows; Bodendale Farm, Glenn P. Book, Lancaster, 33 cows; Mil-Harv Farms, Harvey T. and David N. Bomgardner, Annville, 91 cows; Turn-Pike View, Paul S. Horning, Stevens, 46 cows; Rancksfad, Parke Ranck, Ronks, 57 cows; Ro-Coma Farms, Robert and Joan Book, Leola, 75 cows; Kingway, Paul King, Delta, 48 cows; John Saner, Mifflin, 73 cows; Hidden Springs, Charles Rauhauser, Hidden Springs, 65 cows; Vallilea Farm, Jack K. Sunday, Carlisle, 106 cows; Kauffman Bros., Atglen, 59 cows; Swan Road Dairy Farm, J. Harold Bare, Atglen, 56 cows; Leader Farms, Guy A. Leader & Sons, York, 76 cows; Dan Petersheim, Gordonville, 40 cows; Janessa Hol, Robert Zimmerman, Mt. Airy, Md., 101 cows; Restful Acres, Frank and Virginia Graybill, Hershey, 34 cows; and Lime Rock Farm, Hubert S. Miller, Mayerstown, 51 cows.

Herds and owners qualifying due to an increase of 1,000 pounds of milk and-or 40 pounds of butterfat per cow average were: Bryncoed Farms, Chester Springs, 239 cows; Willow Bend, Art Breneman, Willow Street, 80 cows; Penn-Rise, David Bitler, Peach Bottom, 42 cows; John Peoples, Jr., Rising Sun, Md., 64 cows; Trout Spring, John E. Kreider, Lancaster, 47 cows; John Saner, Mifflin, 73 cows; Marlin G. Bricker, Chambersburg, 48 cows; Twin Oak Farms, Frey Bros., Quarryville, 114 cows; Laurel Highland, K.W. & L.W. Saylor, Rockwood, 76 cows; Foard View Farm, Samuel Foard, Jr., Street, Md., 185 cows; Coredale Farms, Rodman C. Thompson, East Berlin, 47 cows; Janessa Hol, Robert Zimmerman, Mt. Airy, Md., 101 cows; Valley Acres Holsteins, J. Sheppard Wolff, Newville, 16 cows; George R. Baltozer, Lancaster, 52 cows; Hochstead Farm, Harry and Paul Hoch, Shippensburg, 61 cows; Fairview Farm, Inc., James Fielder & Son, 189 cows; Quelletel Farm, Robert Fahnestock, Mt. Joy, 81 cows; Sun Trail Farms, Norman and Dale Rothermel, Pitman, 46 cows; Kingstead Farm, Leslie C. King & Sons, Damascus, Md., 100 cows; Ro-Coma Farms, Robert & Joan Book, Leola, 75 cows; Chapel-View Farm, Paul Droneburg, Frederick, Md., 57 cows; Clarence D. Neff, Quarryville, 74 cows; Solanco Acres Farm, Robert Hershberger, Quarryville, 59 cows; Fair Oaks Farm, Lee Worthington, Smithsburg, 122 cows; Mt. Green Farm, Harry Mumma, Spring Run, 82 cows; Getaway Farm, W. B. Dixon Stroud, Kennett Square, 66 cows; and Breck-A-De Farm, Richard Breckbill, Oxford, 70 cows.

Individual high record cows had to meet the following herd requirements

(Continued on Page 22)

L to r Bob Buckles, Agway Enterprise Service Person, Randall Miller, herdsman, and Walter Zimmerer

"With my type of breeding operation, I just wouldn't be without Agway"

Walter C. Zimmerer, Jr.
Big Brook Farms, Monmouth County, New Jersey

Walt Zimmerer runs an average of 450 registered Black Angus on 1000 acres near Colt's Neck, N.J. His stock descends from the storied Earl Marshall strain. Most of the animals are sold for breeding purposes except for the bull culls which are fed out for beef.

He grows 300 acres of no-till corn, mostly Agway hybrids, and 250 acres of clear-seeded alfalfa, the seed also supplied by Agway. Fields and pastures are limed and fertilized by Agway on a regular basis.

Only one commercial supplement is used on Big Brook Farms. Agway 55% Beefmix® is top-dressed on silage and added to the grain for steers. In the interests of good herd health, all cattle get *Fortimin (an Agway Mineral Mix)* every day

Both Walt and his herdsman, Randall Miller, give high marks to Agway and their Enterprise Service Person, Bob Buckles.

"Good service" . . . "Sound crops advice" . . . "Fine products" . . . "Competitive prices" . . . "Single-source shopping" are some of their many reasons.

"To me," adds Walt, "Bob Buckles *is* Agway. And, as I've already implied, I need them both."

If you'd like a man such as Bob Buckles working with you, a man backed by the kind of service you wouldn't be without, call Agway and ask that an Enterprise Service Person get in touch with you.

Legume cover crops advantageous to no-till

By JERRY WEBB
Agricultural Editor
Delaware Cooperative Extension Service

NEWARK, Del. - Reports coming from the College of Agricultural Sciences at the University of Delaware provide some convincing reasons for no-till corn production for farmers everywhere. The no-till approach is spreading and, according to University of Delaware experts, is one of the most important crop developments to come along in many years.

The latest information from the Department of Plant Science shows no-till corn right up there with the best corn in the state. And better yet, with the right cover crop the investigators eliminated the cost of nitrogen fertilizer.

By using irrigation and a legume cover crop, agronomists Dr. William Mitchell and Dr. Merle Teel were able to get no-till corn yields above 200 bushels per acre. Even without irrigation they bested conventional, no-nitrogen corn by at least 50 bushels.

The real point of the agronomists' work was not to test no-till versus conventional, but rather to see what effect a nitrogen-fixing cover crop would have on no-till yields.

Standard practice in no-till corn production is to plant a winter-annual cover crop on land intended for corn the following spring. It's usually small grain that's not meant for harvest. And usually the small grain is killed chemically prior to no-till corn planting. The dead small grain plants then serve as a moisture-saving mulch for the corn plants.

Mitchell and Teel decided to test some nitrogen-fixing legumes as cover crops, figuring they'd get all the advantages of small grain covers plus some free nitrogen. So they tried hairy vetch and crimson clover on plots at the Georgetown Substation and received favorable results from both.

Non-irrigated no-till test plots without any nitrogen yielded 77 bushels per acre. With a small grain cover crop, they got 100 bushels. But with the addition of either hairy vetch or crimson clover, they boosted yields to 150 bushels per acre.

Moisture was in short supply last summer, so the researchers irrigated some of the plots and were rewarded with another 50 bushels per acre for their efforts. That means 200 bushels of corn per acre from no-till corn that received no nitrogen fertilizer. That's not bad when you consider costs and yields for conventional corn production practices.

In a dry year you can expect big differences in favor of irrigated corn. But over the past three years, the researchers found that no-till corn with any kind of cover crop was better than corn grown on bare ground. They also figure that the use of a winter-annual legume doubled yields of corn that received no supplemental nitrogen.

After looking at all the data assembled over three years of research, Mitchell and Teel are saying that a legume cover crop is worth as much as 100 pounds of nitrogen per acre in no-till corn production. Figuring nitrogen at 20 cents a pound, that's quite a bit of money. And from an energy point of view that's a hundred pounds of nitrogen that won't have to be produced, releasing a lot of energy for other uses.

In fact, it looks as though no-till techniques combined with winter-legume cover crops will totally change the energy needed to produce corn. In an agricultural environment that's aimed at raising more food with less energy, that's what's really important.

There's one other advantage to the winter-legume kind of nitrogen - Mitchell says it's the slow-release kind worth up to five times that available in commercial fertilizers. It doesn't leach or evaporate the same way and is available to the corn plant as needed throughout the growing season.

USDA heads off Newcastle disease

WASHINGTON, D.C. - To stop further spread of exotic Newcastle disease from three infected aviaries in Virginia and California, the U.S. Department of Agriculture is destroying all infected and exposed birds on at least 58 pet stores or private aviaries in 19 states and the District of Columbia.

The 58 locations are ones that have received birds from the infected aviaries.

In addition, authorities imposed state and federal quarantine on a 30 square mile of area of San Diego county, Calif., that center around two of the infected aviaries - the fancy game bird breeding farm of Al Hinkle, and Basically Birds, both in Alpine, Calif. State and federal quarantines had been imposed earlier at the Harold Yanik aviary, Charlotte Courthouse, Va.

All birds shipped from the Yanik premises on or after Feb. 2 and from the two California aviaries on or after Jan. 21 are considered to be exposed to exotic Newcastle - a foreign virus of poultry and other birds. Therefore, those birds and all that were exposed to them are being destroyed. USDA's Animal and Plant Health Inspection Service (APHIS) will indemnify owners of the birds at a fair market value.

States to which shipments were made from the infected premises in Virginia and California include Pennsylvania and New Jersey.

All infecte birds in the three aviaries were destroyed and the premises cleaned and disinfected.

Exotic Newcastle is a highly contagious disease that is usually fatal to poultry and some other birds. The disease is not a health hazard to consumers of eggs and poultry meat.

APHIS veterinarians said that exotic Newcastle could greatly increase poultry production costs if it ever became established in the United States. However, there is no indication at this time that it has spread into any commercial poultry flocks. A 1972-73 outbreak in southern California cost $56 million to eradicate.

INCREASE YIELDS $15.00 AN ACRE FOR 25¢

ORTHO ISOTOX® Seed Treater [F] is backed by the best kind of proof a corn seed-treater could have: over one hundred million successful corn acres. All kinds of climate. All types of soil. All sorts of men doing the planting. Yield increases run up to fifteen dollars an acre — from a product that costs about 25 cents to treat a 20,000 plant-population-acre.

Mr. and Mrs. F. Anderson of Bel Air, Md. were cited for outstanding work with their dairy herd at the Pennfield Awards Luncheon this week.

All smiles about their achievements are York Countians R. Thompson, L. Rutter, B. Stewart, M. Stewart, C. Rauhausen, D. Kauffman, Paul King, Steve Leiser, and G. Rohrbaugh. Leiser is area manager for Pennfield Feeds.

Pennfield

[Continued from Page 19]

to be cited for awards: Holsteins with 1000 pounds of butterfat and-or 25,000 pounds of milk; Brown Swiss with 750 pounds of butterfat and-or 20,000 pounds of milk; Ayrshire, Guernsey or Jersey cows with 750 pounds of butterfat and-or 16,000 pounds of milk.

Award winning farms and owners were:

Har-Cream Farm, Garnett Anderson, White Hall, Md., one cow; Gordline Farm, Jesse G. Balmer, Lititz, two cows; F. Ernest Barnhart, Clear Springs, Md., two cows; Mil-Harv Farms, Harvey T. Bomgardner, Annville, one cow; Ro-Coma Farms, Robert and Joan Book, Leola, two cows; Bryncoed Farms, Chester Springs, one cow; Len-Lyn Farms, Galen W. Crouse, Stevens, four cows; T. Howard England, North East, Md., two cows; Fairview Farm, Inc., James Fielder & Son, Bel Air, Md., two cows; Solanco Acres Farms, Robert Hershberger, Quarryville, one cow; Turn-Pike View, Paul S. Horning,

[Continued on Page 43]

Southern Chester County dairy farm families who received recognition from Pennfield Corporation at an awards banquet on Tuesday were, left to right: N. Young, R. Krassenstein, H. Bare, Mrs. H. Bare, Mrs. R. Breckbill, Mrs. R. Pepple, R. Breckbill, and R. Pepple.

I'm really dealing."

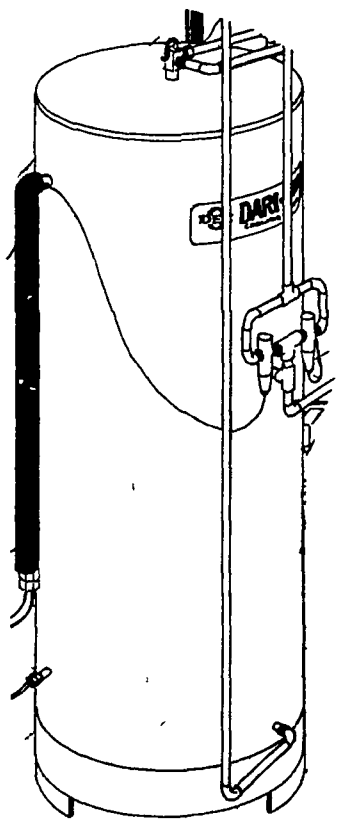
INTRODUCING

THERMA-STOR

Dairy Equipment Company Madison, Wisconsin has added a new energy saving Therma-Stor condensing unit to its Dari-Kool Bulk Milk Cooler Line.



The Therma-Stor is a major improvement in water cooled condensing units. This unit has an all stainless steel heat exchanger combined with a 150 gallon stainless steel storage tank. This unit provides enough 110 degrees water for preping cows and general use while milking. It also stores 110 degrees water for use between milking. In addition the Therma-Stor produces 50 gallons of 165 degrees for pipeline wash-up after milking. This unit is available with a single or dual condenser.

A NEW WATER COOLED CONDENSER - THERMA-STOR

For years water cooled condensing units have been used not only for bulk milk coolers, but refrigeration units of all types. The main reason water was used, was to lower the condensing temperature of the refrigerant. This increased the efficiency of the condensing unit.

Large quantities of 70 degrees - 80 degrees water was the useless by-product of these units. Because of the high original investment and maintenance cost, this style unit is not commonly sold on milk coolers today.

Then things changed. Energy costs have doubled on most farms in the last few years, 165 degrees F water now costs a dairyman ½ cent, to 2 cents per gallon. The average dairy uses two gallons of hot water per cow, per day for udder washing, sanitizing, washing equipment, feeding calves and general clean up. This means an average cost of $2-day or $700-year for a 100 cow dairy. This revived the water cooled condenser concept for dairy farmers. A modern dairy used 110 degrees water for equipment sanitizing, udder washing, rinse cycles on the pipeline and the bulk cooler, calf feeding and hand washing. Only the wash cycle of pipeline and the milk cooler require an elevated water temperature of 165 degrees F. The profile of usage on an average 100 cow dairy is 400 gallons of 110 degrees water and 70 gallons of 165 degrees water.

A water cooled condenser can deliver 165 degrees water, but the condensing temperature would be very high. The results would be poor efficiency and short compressor life. The lower the condensing temperatures, the higher the efficiency and the longer the compressor life.

One of the innovations on the market today generates a gallon of 100 degrees water for every gallon of milk cooled. It also generated 50 gallons of 165 degrees at each milking. This unit combines an insulated 150 gallon stainless steel storage tank and a stainless steel heat exchanger into one. The condensing temperature in this unit is determined by the 110 degrees water. The 165 degrees water is generated by desuperheating the refrigerant. Storage of the 110 degrees and 165 degrees water is necessary for usage at times other than milking.

A small backup 165 degrees water heater is recommended. There is no need for a backup on the 110 degrees water because excess is usually generated. The refrigeration system is very conventional regarding controls, valves and compressors. The condenser storage tank is the only special piece of equipment required. This condenser storage tank can be added to most refrigeration systems.

The investment of this equipment is returned by the savings in electrical energy in a year or two on the average dairy.

With the addition of Therma-Stor to an existing air cooled condenser refrigeration system your milk house can be partially heated and there is no water wasted.

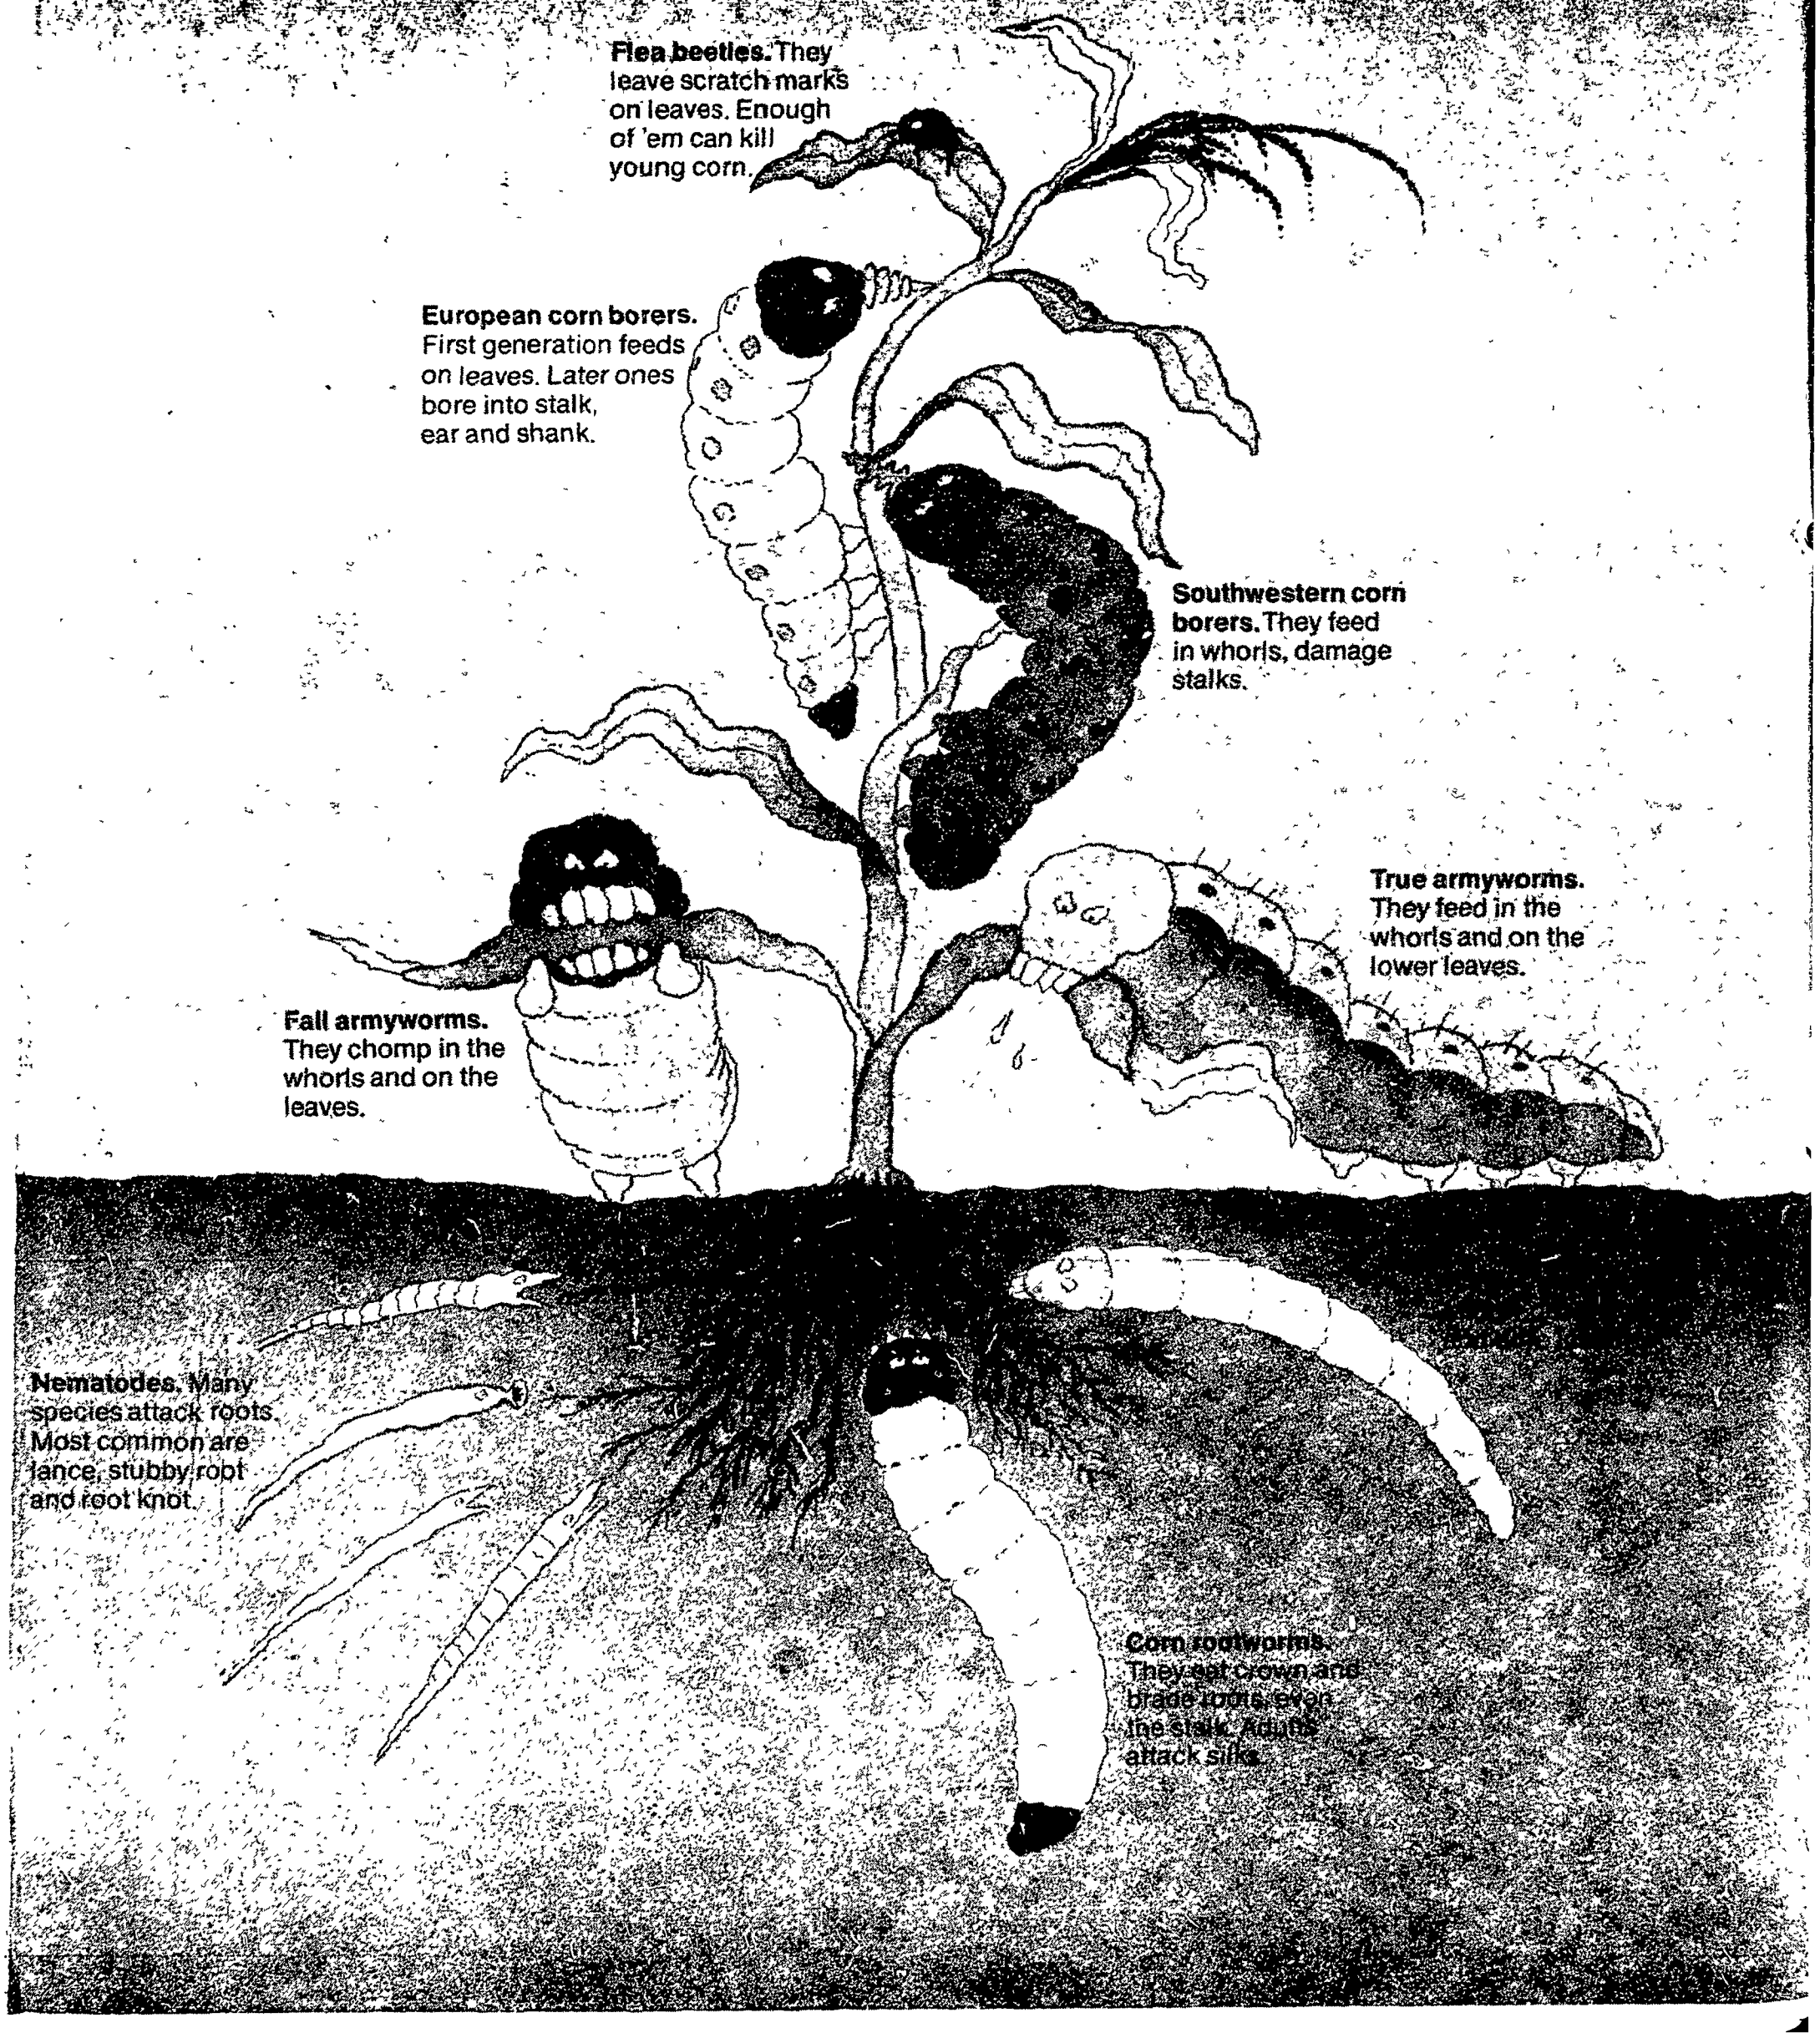
Corn's 7 main insect pests. And blanket control comes only with Force.



Flea beetles. They leave scratch marks on leaves. Enough of 'em can kill young corn.
European corn borers. First generation feeds on leaves. Later ones bore into stalk, ear and shank.
Southwestern corn borers. They feed in whorls, damage stalks.
True armyworms. They feed in the whorls and on the lower leaves.
Fall armyworms. They chomp in the whorls and on the leaves.
Nematodes. Many species attack roots. Most common are lance, stubby root and root knot.
Corn rootworms. They eat crown and brace roots, even the stalk. Adults attack silks.

destroyers come many ways. With broad-spectrum Furadan®.

As sure as corn damage starts with rootworms, effective control starts with Furadan® insecticide-nematicide. A fact borne out by the experience of thousands of growers.

But while rootworm is your big enemy, your corn yields can also take a beating from many other pests. Pests that only Furadan can control in one fell swoop—European corn borers, Southwestern corn borers, fall armyworms, true armyworms, flea beetles, wireworms, plus eight species of nematodes.

Furadan stops these above and below ground pests because it works two ways. First it controls many soil pests on contact. Then it moves through the plant systemically to protect stalks and leaves as they develop.

What's more, Furadan is easy to use because its free-flowing granules won't lump or bridge. You get uniform application throughout your fields. Without offensive odor.

From rootworm on down, you've got a lot of enemies out there. But with Furadan on your side, you control more pests that get your corn. See your farm chemical supplier, or write FMC Corporation, Agricultural Chemical Division, 2000 Market Street, Philadelphia, Pa. 19103.

Furadan is a registered trademark of FMC Corporation.

Struggle

[Continued from Page 17]

firmed that a silt-loam type of soil is best for a cover material. The Barley's fields have the right kind of material to a depth of 45 feet. If successful, LARA will order bulldozers and giant earthmovers to the property to scalp the area.

If LARA fails to obtain the Barley's acreage as a result of this controversy, there is reason to believe that they may go elsewhere. Linda McKee of the League of Women Voters asked about it, and Shirk responded with the following words: "If Creswell is not expanded, it has to go someplace else."

The most commonly suggested alternatives are the old abandoned ore pits in southern Lebanon County and the Lanchester Landfill between Goodville and Honey Brook. LARA claims both sites would be too costly. Hartman said "a tremendous amount of time was put into meeting with the Lebanon County authorities," but that no program was agreed upon. For Lancaster County to undertake the project on its own would be too expensive, LARA claims. The Authority also indicated it had studied very closely numerous refuse disposal plans in various parts of the country. It's thumbs down on all of them. One plan for which LARA was encouraged was the dumping of waste material into old strip mines. But without state help, LARA can't afford it.

"No matter where you put refuse, someone wants to put it elsewhere. It's a real, real problem," Hartman acknowledged.

LARA accountant Hershey Groff noted that it costs $48 per ton to take garbage to the Creswell site, as opposed to $80 per ton to go through the gates at Lanchester. In discussing the possibility of using the Lanchester site, Shirk indicated that talk of LARA never having contacted Louis Frame, owner of the Lanchester Landfill, is not true. He said LARA members met with Frame on May 7 of last year and added that "Lanchester would be given full consideration."

Another misunderstanding LARA saw fit to clear up is that "no tax money is going to LARA." Several people in the audience had hinted at that possibility.

Geologist Humphreville showed a number of slides, some of which were similar to the aerial photograph accompanying this article. He noted that although 57.8 acres of land are in question, only 41.2 acres were actually being farmed. The balance is woodland. Russell McNair, representing Huth Engineering on behalf of LARA, gave details of the landfill's history and projections. The planning did not go as far in terms of financial concerns as it did with geological questions. Hartman commented "Projections cannot be made that far, we're not certain what will happen after 1985."

Concluding the case for the Refuse Authority, Hartman said they're only trying to "buy time," in search of finding the most economical way to dispose of wastes. The hope is that science will catch up with Lancaster County's landfill problems within the next few years and then LARA won't have to concern itself with the taking of prime farmland.

Summing up on behalf of the Barleys, Heinly asked for LARA to hear further testimony from concerned citizens and authoritative individuals who have no ties with LARA.

Among others who spoke out on behalf of the Barleys on Tuesday afternoon were: Amos Funk, fruit and vegetable farmer from Manor Township who is well-known for his conservation practices; Linda McKee, land use director of the League of Women Voters; Margaret Ha, president of the Lancaster Environmental Action Federation (LEAF); Aileen Young, concerned citizen and "firend of the Barleys;" and Richard Brown, science teacher at Manheim Township Middle School.

COMMISSIONERS RESPOND

Lancaster County Commissioner Jean Mowery defended the actions of LARA at Tuesday's meeting, while making no apologies for the commissioners' failure to show at the rally the previous week which was held on the Barley farm. "We caught you know what for not being at that meeting," she said, soothing the listeners with the phrase "We're all on the same team and working on the same problems."

Since then, the chairman of the Lancaster County Commissioners, Jack F. Tracy, has been credited with characterizing the visiting state legislators to the Barley farm as "jackals."

The county commissioners, as elected officials, are responsible for LARA's actions. LARA members are appointed by the commissioners.

John Barley noted the legislators were visiting his farm because of concern and interest. He also pointed out that the mail arriving at legislators' desks and city newspaper offices was overwhelmingly in favor of saving valuable farmland.

"The elected officials are supposed to act on behalf of their constituents," Barley said, "the legislators are doing that."

With that, the county commissioners appear to be off the track with their remarks.

Another public meeting on this controversy has been scheduled for March 23 (next Wednesday) in the Lyte Auditorium of Millersville State College. Proceedings get underway at 7 p.m.

Anyone who feels that further encroachment by the Creswell landfill is detrimental on the environment and agriculture is asked to attend and be heard.

BANVEL® + atrazine
New tank-mix combination kills young, tough broadleafs, vines, grasses before they damage your corn

Banvel + atrazine together do a broad-spectrum job on weeds resistant to 2,4-D and not controlled by atrazine alone.

Spray 3 to 15 days after corn emerges, when grasses are less than two inches. Ideal for narrow-row, minimum tillage programs. Season-long control. Usually no need to cultivate.

Today is the day to order Velsicol's Banvel plus atrazine as part of your corn-pest control program.

DEALERS WANTED FOR: FERTILIZER AND CROP PROTECTION CHEMICALS

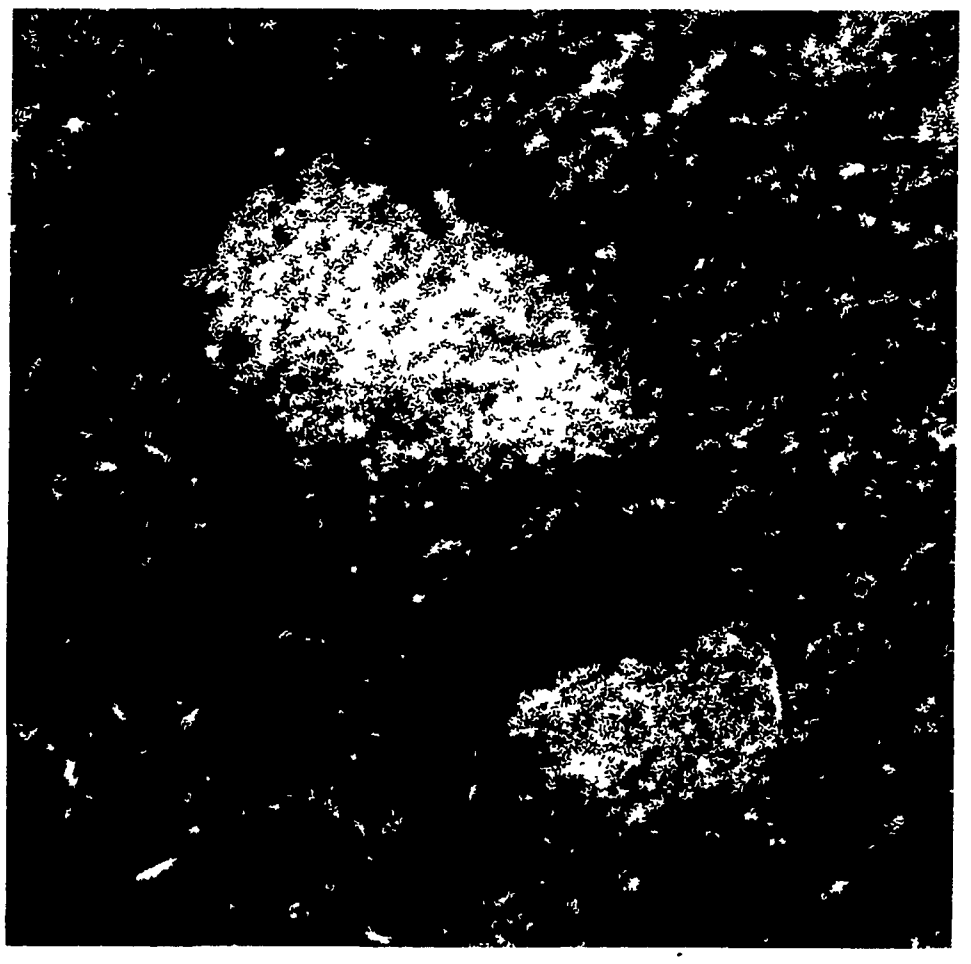
BANVEL®+LASSO®*

pre-emergence herbicide



A giant step toward total weed control in corn.

EFFECTIVE CONTROL OF BROADLEAF AND GRASSY WEEDS WITHOUT CARRYOVER PROBLEMS

What degree of weed control will you settle for in your corn? Most of the thousands of growers we've talked with on the Banvel® "Hot Line" seem to expect at least 90 percent control. And, most of them have been getting it with the pre-emergence, post-plant application of Banvel® + Lasso® tank-mix.

An important advantage of this combination which growers appreciate is freedom from worry about carry-over, particularly following a year of droughty conditions.

*"LASSO" is a registered trademark of Monsanto Company. The Banvel® + Lasso® tank-mix is cleared for use in Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, New York, North Dakota, Ohio, Pennsylvania, South Dakota and Wisconsin.

HOW TO ACHIEVE 90% OR BETTER CONTROL ON LABELED WEEDS

Here are the most important steps to successful results with Banvel® + Lasso® tank-mix:

- Apply Banvel® + Lasso® strictly according to soil type and percent of organic matter. The Banvel® + Lasso® label spells it out for you
- Incorporation is not only unnecessary, it is undesirable other than under extreme drought conditions; even then, incorporation should be no more than ½-inch
- If you apply Banvel® + Lasso® with liquid fertilizer, check compatibility of the liquids first by mixing proper proportions in a small container.
- Use the right kind of nozzles and screens The label is specific on this point.
- This combination should not be used on any sandy textured soils.

Note: Before using any pesticide, read the label.

THE BANVEL® TOLL-FREE "HOT LINE" IS FOR YOU

Questions about Banvel® or its uses? Call the Banvel toll-free "Hot Line." 800-621-4129 Illinois callers: 800-972-8381 Call between 9 a.m. and 4 p.m., Monday thru Friday. Calls placed outside of these hours will be automatically recorded and answered within 48 hours by phone or mail.

Grassland FFA hosts awards dinner

By JOANNE SPAHR

NEW HOLLAND, Pa. - Over 250 members, parents, and friends of the Grassland Future Farmers of America Chapter gathered to enjoy the festivities of the organization's 18th annual parent - member banquet held last Friday evening in the Garden Spot High School cafeteria. The Future Homemakers of America served the meal, and the FFA officers presided over the ceremony.

For the members, the highlight of the evening came with the presentation of chapter and foundation awards.

The ninth grade chapter award winners were as follows: Chris Herr, Narvon, livestock judge; Clifford D. Hurst, T Terre Hill, poultry judge and creed contest winner; Randy Martin, East Earl, high seed salesman; and Dale Witwer, Bowmansville, game hunting champion.

Two other honors presented to ninth grade members of the chapter were Star Greenhand in both production and agri-business. These awards are presented to the outstanding first year members in the degnated areas. Chris Herr, Narvon, earned the award in production and Clifford D. Hurst earned the honor in agri-business.

In the senior division, the chapter award winners were as follows: Harry Boley, East Earl, game hunting champion; Daniel Witwer, East Earl, high seed salesman; and Eileen Messner, Leola, FFA creed contest winner.

The Star Chapter Farmers were Clifford R. Martin, East Earl, and Brian Wise, Bowmansville.

Daniel Witwer, East Earl, was named Star Red Rose Farmer from the chapter and Linford Weaver received the highest honor within the group - Grassland Star Farmer.

Foundation awards were also presented. The recipients were as follows: Lamar Messner, East Earl R1, agricultural mechanics; Daniel Witwer, agricultural sales or service; Harry Boley, beef production; Robert Patterson, agricultural processing; Brian Wise, crop production; Clifford R. Martin, dairy production; Dean Weiler, Morgantown, diversified livestock; Gary L. Snader, home and farmstead improvement; Eileen Messner and Maxine Messner, horse proficiency; Brian Hess, placement in agricultural production; Kenneth Fox, poultry; Linford Weaver, public speaking; Chris Herr, sheep production; Larry Martin, soil and water management; and Bill Hughes, East Earl, swine production.

Five individuals who had been of service to the chapter were made honorary chapter farmers. Chester M. Weaver, Jr., the father of the Grassland FFA president, was the first to received the award followed by Max Smith, Lancaster County Extension agent; Dr. Eugene Love, department head of agricultural education at Penn State University; Gary Mayk, farm writer, Lancaster Intelligencer Journel, and Marvin Weaver, owner of Shady Maple I.G.A.

Others honored for their service with certificates of appreciation were: Joanne Spahr, associate editor, Lancaster Farming Newspaper; John Mills, agronomist; Homer Martin, Stanford seed salesman; Mr. and Mrs. Robert A. Martin, demonstration plot hosts; Shirley Deaver, secretary to transportation manager, ELCSD; Lawrence Devine, asst. superintendent ELCSD; Robert Lauffer, student teacher; Karen Martin, student typist; June Unruh, Garden Spot typist; Ralph Griffith, Weaver's Poultry - quality egg inspector; Glenn Yoder, Yoder's Meats, Shady Maple Farm Market; and Eugene Herbert USDA government inspector of Weaver's Poultry.

The evening concluded with entertainment provided by the ninth grade class of the FFA.

Five individuals from the Grassland FFA Chapter who received awards at the recent parent-member banquet were: Chris Herr, Gary Snader, Daniel Witwer, Larry Martin, and Cliff Hurst.

Award winners at the Grassland FFA banquet included: (from left to right) Dean Weiler, Clifford Martin, Bill Hughes, Lamar Messner, Brian Wise, Linford Weaver, Brian Hess, Ken Fox, and Harry Boley.

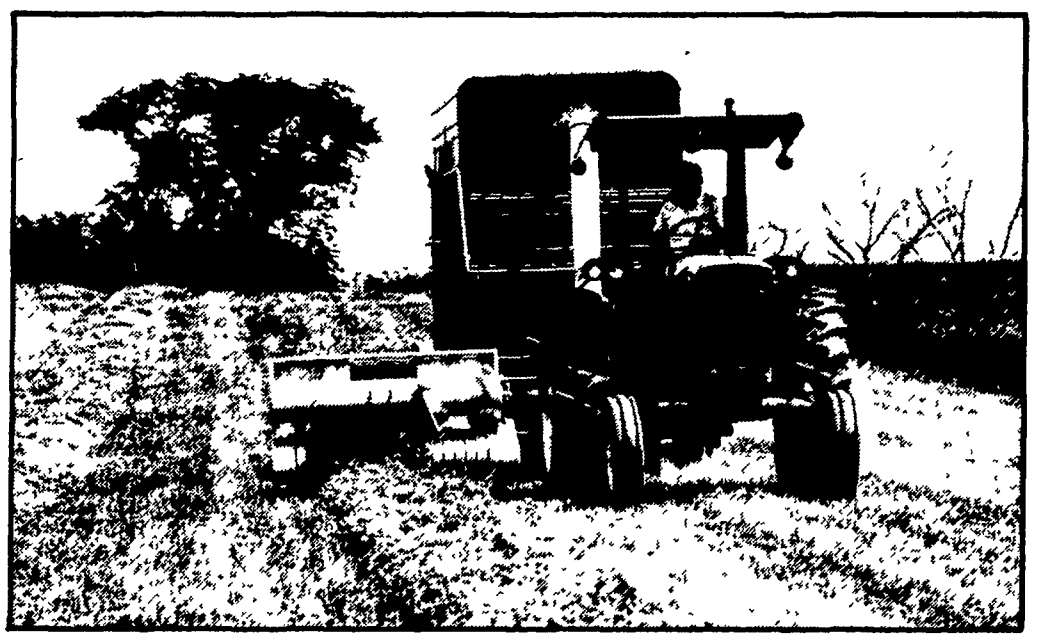
Buy Less Feed.

Use Beacon Silage Pre-Serv*

and get up to 30% more feeding value from your grass silage or haylage.



Now you can lock in the fresh-cut feeding value and palatability of your succulent forage crops—even with moisture levels up to 65%.

Beacon Silage Pre-Serv prevents heat build-up, controls oxidation and fermentation, and greatly reduces spoilage and shrinkage. Treated silage has less seepage, and saves handling time because there is less lumping and bridging in the silo. Get up to 30% more feeding value from every ton.

Discover the benefits also of Beacon Hay Pre-Serv*. It permits you to harvest hay up to 26 hours earlier; allows cutting and storing hay with as much as 25% moisture; provides more feeding value than with untreated hay.

Shelhamer

[Continued from Page 1]

outsider, he nevertheless made it clear that he had some very definite thoughts and opinions on the issue.

The Secretary focused some of his speech on the recent remarks made by Lancaster County Commissioner Jack F. Tracy who earlier in the week had strongly criticized the House Agriculture Committee.

Shelhamer said: "When I see a situation taking place as I do in beautiful Lancaster County, and I see good bountiful farmland going to be used for a landfill, and I see one level of government demeaning another, I am sick at heart."

Although Shelhamer did not name anyone, the last half of the above statement was in obvious reference to Tracy's criticism of House Ag Committee members. Tracy had called them "jackals," and Shelhamer left it be known that he was hurt by it. Tracy's bitter remarks came after the Ag Committee had visited the Barley farm last week to get a first-hand look at the case.

In contrast, Shelhamer lauded the move by the legislators. In bringing that segment of his speech to a conclusion, Shelhamer announced "I would hope that the gentleman who made those remarks would apologize to that agriculture committee."

The Agriculture Secretary then proceeded to offer his department and its services to the Lancaster Area Refuse Authority and its opponents on the Barley farm controversy "to help resolve this problem."

He also commented that the sympathized with the county commissioners who are responsible for LARA's actions and that he realized that both groups were only trying to find a solution to the refuse problem. Furthermore, the Secretary acknowledged that controversies such as this are matters which should be brought before the public.

Shelhamer told the estimated 250 people in attendance that if a bill he introduced last year had been passed (H.B. 216) the Barley farm situation would have been easier to take care of. That bill would have required that all Class I and II farmland not be taken for roads and refuse sites unless it was absolute that no other alternatives can be found. The bill was defeated, but the present legislature has a nearly identical bill before it (H.B. 111) and Shelhamer has hopes of it being passed.

County Commissioner Raymond Herr was present at the annual meeting, and is in fact a LCCD director. He announced during the meeting that the District was to nominate three people from the southern portion of the County to serve on the Lancaster Area Refuse Authority. One of the nominees was to fill a present vacancy, he indicated.

Although the Lancaster County Commissioners are presently not strongly linked to conservation efforts by the public in general due to the Barley farm situation, the Commissioners are on record as supporting conservation practices. A printed message from them appeared in the 1976 annual report of the LCCD which was made available to guests on Thursday evening. The message reads as follows and is signed by Commissioners Jack Tracy, Raymond Herr, and Jean Mowery.

"Lancaster County is very fortunate to have dedicated persons from many areas serving as District Directors of the Conservation District.

"We commend you for your fine work in preserving the great assets that are enjoyed in our County's soil and resources.

"Conservation needs and programs are of high priority to the County Commissioners, and County government steadfastly supports your efforts in this regard."

In the same pamphlet is printed the following message of appreciation from the LCCD.

"The Lancaster County Conservation District wishes to express its appreciation to the Lancaster County Commissioners Raymond Herr, Jean Mowery, and Jack Tracy, and the State Conservation Commission for their financial support and encouragement in promoting effective environmental programs. We also wish to thank the cooperating agencies, organizations, and individuals who have helped further conservation programs in Lancaster County.'"

ACORN IS ON THE MOVE!

York farmers prefer present farm programs

NEW PARK, Pa. - L.C. Wambaugh from Delta, headed the York County Farmers' Association delegation to Congressman William Goodling's office on the National Legislative Tour last week, urging extension of the present Federal farm program. Farmers from across the Keystone state converged on Washington D. C. with nine delegates from York County. In addition to Wambaugh, John Wilcox, New Park; David Wolf, Stewartstown; Ailenn Detter, Dover; Carolyn Rutter, York; Mr. and Mrs. Eugene Ort, Etters; Ray Orner, Dover and Gail McPherson, New Park, attended.

The county spokesman also called for moving the responsibility for pesticide regualtions from the U.S. Environmental Protection Agency (EPA) to the U.S. Department of Agriculture (USDA), and opposed legislation now being considered to legalize secondary boycotts by organized labor.

The farm leader told 19th District Congressman Goodling that Pennsylvania Farmers' Association favored extension of the present Agricultural and Consumer Act of 1973, since in his opinion it was "moving agriculture back to the free market system." This act is scheduled to expire this year, but Congress is expected to enact major farm legislation to replace it. The present farm program covers all major areas of agriculture production.

"Farm income has increased substantially since the market was relieved of the surpluses accumulated under previous programs," Wambaugh stated. "The marketplace is working. We have confidence that it will continue to work."

He reasoned further that any moves to put government back in the business of farming would be counterproductive.

In strong opposition to House Resolution 3500 which would legalize secondary boycotts, Wambaugh stated that his organization fears such legislation for the following reasons:

"It would lead to greater imbalance in Labor-management relations; would cause periodic total stoppage in all union projects because of varying labor contract expiration dates; would force unionization of employees working for other contractors on the same project with union employees of another employer; would bankrupt small construction firms by numerous and-or lengthy picketing activities in secondary boycotts; and would completely revise the relationship and structure of the construction industry."

Because EPA has failed to comply with the law stating it must classify all pesticides as either general or restricted by Oct., 1976, Wambaugh called for moving its responsibility to USDA.

Although some 300,000 persons in 45 states have been certified to use restricted pesticides, EPA has not yet published a restricted use list.

Wambaugh states, "EPA has issued conflicting regulations and made a mockery of the laws governing pesticide regulations, while USDA has a proven record in the area of pesticide regulations and should be given the responsibility."

Gail McPherson, information director for the county farmers, met with Senator John Heinz, III, on similar issues. Over 300 farmers took part in the two day Tour March 9 and 10.

John Wilcox, left, of New Park and L.C. Wambaugh of Delta discuss pertinent agricultural issues with Congressman William F. Goodling, center.

Chinese Cooking

One reason that, as a nation, the Chinese are slender; is because they cook with little fat, use nutritious broths and sauces and have little use for rich pastries and sweets

How to hedge without being trimmed.

Hedging is one way of protecting a profit...if it's done right. If it isn't, well...

At Clayton Brokerage Co. of St. Louis, Inc., we have our roots deep in the business of helping firms hedge successfully in commodities.

No one is infallible...including us. But with our 30 plus years of experience to draw upon, we're in a position to soundly advise you.

So, if you're a grain user, meat packer, cattle feeder or a supermarket chain operations officer who wants to hedge in pork bellies, eggs or cattle; or a home builder who wants to hedge in lumber... call us. We're confident that our years of practical experience and research based approach to hedging will prove interesting to any serious hedger.

To start things moving, call Tom Kellerhals at 800-221-4246, or mail the coupon below.

Can you afford to ignore the world of commodities?

Please send me more information on hedging. I am particularly interested in information on

What's New

All - Aluminum Canning Lids

A new innovation in the home canning market has been introduced by the consumer division of Wheeling Closure Corporation, Columbus, Ohio, and Alcoa Closure Division, Richmond, Id.; following a joint - development program: the first all - aluminum two-piece home canning lid and band.

The lid has an audible button feature which helps warn the home canner if a package has been improperly sealed or if the seal has been broken during storage.

As a package that has just been sealed cools down, a vacuum is created in the air space under the lid, depressing the audible button. If properly sealed, the button remains depressed. When the home canner breaks the seal upon opening the package, the lid reverts to its original shape with a loud snap, assuring the consumer that the package was adequately sealed.

The Alcoa Closure Division developed the special protective coatings and the metal configuration which allows the aluminum lid to perform in this manner Aluminum's obvious advantage in the home canning market is its outstanding resistance to rust, which permits repeated use of the bands over an extended period of time.

The lids and rings will be marketed under the "Harvest Time" label.

Energy can be saved through wise landscaping

LANCASTER - Jerry Shaffer, agricultural consultant for the Pennsylvania Power and Light company (PP—L), believes that farm people oftentimes fail to consider landscaping as a factor for conserving energy. Some properly placed bushes and trees will conserve heat, besides adding beauty, he told a group of more than 200 dairymen gathered here earlier this month for Dairy Day.

Shaffer noted that his company quit promoting the use of energy about five years ago, and is now advocating the wise use and conservation of electricity. Aside from landscaping, Shaffer pointed out that energy can be saved by checking on-the-farm wiring and replacing old circuits as necessary; harnessing energy from milk cooler compressors to heat water; trading energy in the milk cooling process; and going to lighting systems which are superior to present systems.

Insulation is an area not to be overlooked. PP&L as well as other firms are suggesting that insulating materials be applied in thicker quantities, noting that this procedure is one of the best known ways to conserve energy.

One Akron area dairy farmer, Shaffer noted, is saving approximately 5000 kilowatt per year by utilizing heat from the compressor to supply hot water. At a cost of three to four cents per kilowatt-hour, the annual savings by this method alone amount to $150 to $200.

Expressing further concern of energy use, PP—L's chief executive officer, Jack Busby, on March 15 challenged area business and industry leaders to "look ahead" at the energy situation.

During a seminar at the Host Inn, Harrisburg, Busby said that a "look ahead" at the energy situation calls for action now. He said the greatest problem facing the economic community is that until recently "relatively few people seemed to be concerned about the adequacy of our nation's energy supplies five, 10 and 15 years down the road.

"I'm concerned that we will delay action too long to avert a severe energy shortage of long duration," the PP&L board chairman said. "Now is the time to look at energy for 1990. Indeed it's not too early to be taking a hard look at the year 2000."

Busby pointed out that many forecasts have been made of the annual growth rate of electricity use between now and 1990.

"Currently the electric energy growth rate for the nation is being forecast by many economists to be in the five to six per cent range," he said. "Pennsylvania, based on past experience, might well have a slightly lower electric growth rate of around four per cent. These projections are lower than the much higher growth rates prior to 1973, reflecting the impact of conservation, energy management and higher costs."

Busby said that it is also good policy to support public officials who have the courage to make the tough decisions that are required for our nation's energy survival.

"The short-term, easy way out is to go along with lower cost options and end up with eventual energy chaos," Busby concluded. "The costs of coordinated, long-term planning will be higher, but will assure us future energy supplies."

NEPPCO

[Continued from Page 1]

Walts said it is very difficult to predict the total outlook for the turkey industry because of the many factors which affect the crop.

He said the weather, "more than any other factor," is important to the potential success of the turkey crop. He said, "Unfortunately for turkey producers, by the time the effect of the weather conditions on crops is known, commitments in the industry have already been made."

Walts said that while growers indicated in January that they intend to raise one percent more turkeys, in reality they may raise four percent less than last year. One indicator is the "level of return which turkey growers received last year. And 1976 was not a good year," Walts said.

He added, however, that while the number of turkeys may be down, the total tonnage marketed this year could be as large as last year. He said there seems to be a substantial shift away from light breeds.

Walts said it is difficult to predict consumer demands because of the degree of competition from broiler - fryers and from red meats, and also because of the varying level and trend of consumer income.

He noted that cattle numbers are now on the down phase, and hogs are on the up - phase. Chicken broilers, Walts said, show no signs of decreasing production. He said there is a possibility for a change in broiler production in mid-year because it takes about three consecutive quarters of negative net returns before there is a reduction in placing broilers.

Saying that feed cost represents two thirds of the cost of producing turkeys, Walts said, "You can do the best job of husbandry around, but seemingly more and more to be profitable you must be sharp about when to and how to buy feed."

Walts called upon Pennsylvania producers to support the National Turkey Federation, rejecting their criticism of the NTF's advertising campaign. He said Pennsylvania producers feel that increased advertising will cause midwestern growers to increase their production and flood the eastern market. Walts said this won't happen, and pointed out that only $140,000 of NTF's budget goes for promotion, "simply to try to keep turkey in the public view."

Walts said that a large part of the NTF's work is with governmental involvement, such as trying to keep the school lunch commodity program going. He said in the last school year the government purchased 80 million pounds of Tom Turkey for school lunches. He also pointed out the importance to our domestic market of exporting turkeys.

Herbert C. Jordan, extension poultry specialist with The Pennsylvania State University, told NEPPCO participants that they must exaggerate their cost - cutting program to cope with double - digit inflation.

Jordan suggested that turkey producers set goals for themselves and try to reach them as an inflation - fighting tool. Some goals he suggested were: limiting early poult mortality to one percent or less, and limiting mortality to two percent in the remaining 18 weeks of production. Jordan said, "Be very selective about poults."

He said it is important for those who home mix their feed to learn to know nutrients and to know the actual needs of all nutrients. He suggested that he would like to have field tests run on birds which have high fat included in their ration, to see how much the birds are actually utilizing or if they are passing "this high cost food."

Jordon told producers to "examine your own records carefully and become an accountant or an auditor on your own records. I am shocked at the number of farmers who allow CPA's to do all the work on their books. Half of all the people I know don't know enough about the cause and effect of their decisions."

Jordan also said that records could be more helpful if compared on a three-to five year basis instead of putting them away after each year is complete.

With inflation, improved efficiency is important. Jordan said "Improved efficiency can be accomplished by increasing your output of acceptable quality of goods and service per unit within your firm." He said that a full - time or part - time buyer or purchasing agent to have control over preventing inflation - related problems could pay off.

Another check on inflation, Jordan said, is to constantly measure the quality of birds compared with other birds you might use. Furthermore, Jordan noted that each bird will yield $.50 worth of fertilizer in droppings over the 18 weeks' growing time, and said, "This turkey manure should be used to produce grain."

On the management end, he said, "Everybody makes errors. The real trick is to get an error - correction device in your business." He said this "device" could be a person through which all major decisions are funneled.

Jordan strongly urged producers to "get a united voice in your industry. You are outnumbered by 10,000 consumers to one, so you should get organized and get serious about being active in drafting legislation which is favorable to you."

He cautioned producers not to fight among themselves, but to use contracts wisely prior to an exchange of services. He said he participates in too many lawsuits as a witness, and said, "Lawsuits don't gain anything for anybody. They are a waste of time."

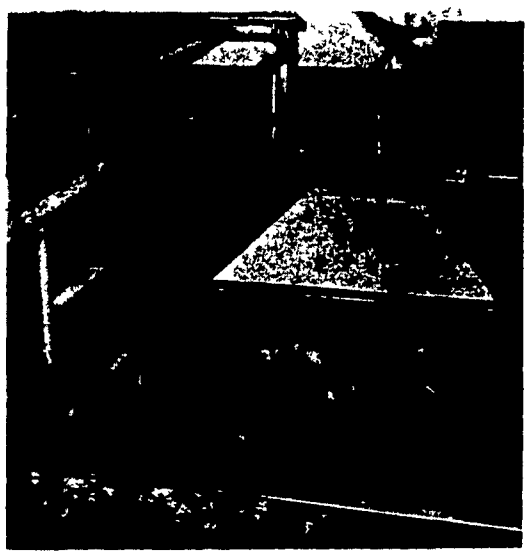
At the annual business

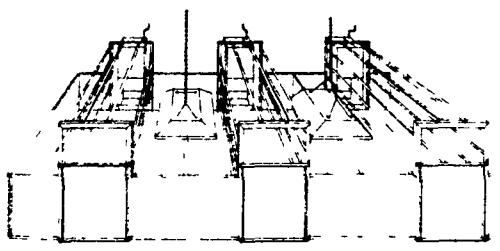
[Continued on Page 36]

NORTHCO
PIG BROODER

Safe, Dependable "Zone Heating"

The GP-4000 is excellent for brooding little pigs because it provides "zone-heat". Ideal temperatures for little pigs may be 25 to 30 degrees warmer than needed for the sow. With "zone-heating" temperatures are directed only to the little pig area, while sows remain cooler. If more heat is needed in extremely cold weather the brooders can be raised to heat the entire house ... eliminating the need for furnaces or costly unit heaters.





One unit installed between two farrowing crates will brood two litters for only 10 cents per day. Heat is distributed evenly. There are no hot or cold spots.

[Continued from Page 35]

meeting, presided over by Leroy Zimmerman, East Earl, two new directors were elected. There are: Harry Wentz, Jr., Harleysville, Pa. and Art DiPaola, 883 Edinberg Road, Trenton, New Jerseey.

Dr. Gordon B. Meyer, Virginia Polytechnic Institute and State University, told the group about studies done on intermittent light on turkeys and their relative importance for growth and feed conversion.

Although the studies cited used varying times of light and dark ratio, all the birds on intermittent light showed an increase in growth. The mortality rate was not significantly different and feed conversion rate varied.

Meyer said that in working with intermittent light, it is important to have complete light control. This means that special attention must be given to fans so that no light is let in when the fan runs.

The program suggested for intermittent light uses 24 hours of light with a 75 or 100 watt bulb, 10 feet on center; in the first week for poults. This should be on a light dimmer system, at 5-8 foot candles, Meyer said. In the second through the fourth week, he said light should gradually be decreased to one foot candle. After the fourth week, light should be intermittent at two hours on and two hours off for females. For males, however, the intermittent light should be the same, but at 15-16 weeks of age it should be increased to two foot candles to help sexual development which is desirable in males but not in females.

Meyer also said that observations show that birds on intermittent light are always quiet and more docile when someone entered the house. However, when startled, as with a flashbulb, they were flightier than birds raised under conventional conditions.

He said, "Birds on intermittent light don't move as well . They can't see very far, so they go about their own business."

He noted one caution in scheduling intermittent light. Food passes through the digestive tract of a turkey in six hours, so when hours of light and darkness are established this should be considered.

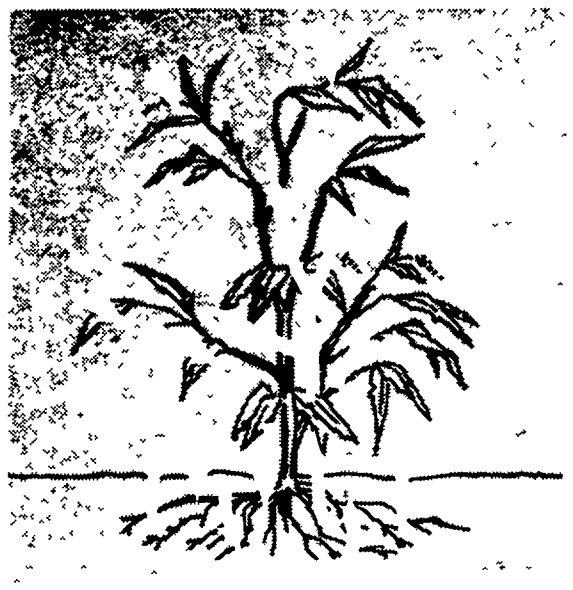
He added that studies seem to find that it is more desirable to have intermittent dim light than intermittent or continuous bright light.

Dr. L.D. Schwartz, veterinary science department, Penn State, talked about health problems in turkeys, and urged producers to know and use the resources they have available. He said they should maintain good environments for their turkeys and know the poultry quality and potential. It is critical, Schwartz said, to monitor breeders, replacements, and commerical birds. Maintaining flock security is an important management procedure for any producer.

Schwartz said that if there is a suspected problem, producers should check the problem for disease, nutritional dificiency, genetic difficulties and obtain a diagnosis as early as possible.

Mr. and Mrs. Clarence Mowery and Mr. and Mrs. Kenneth Mowery, owners of former world champion milk producer "Corinne," were among those receiving recognition from Pennfield Corporation on Tuesday. With them is Pennfield area manager Gene Scholsnagle, left.

ROHRER'S ARE DISTRIBUTORS FOR BANVEL HERBICIDES



BANVEL®

Herbicide

Post-emergence application gets to the root of your tough broadleaf weed problem

Banvel from Velsicol controls hard-to-kill broadleafs . . . smartweed, pigweed, morning glory, thistle, many others. For one simple reason. Banvel translocates. Absorbed by leaves, stems, roots, Banvel moves with plant fluids from leaf tip to root tip. Destroys as it goes. So, no regrowth. Ask us for application details about Banvel, today.

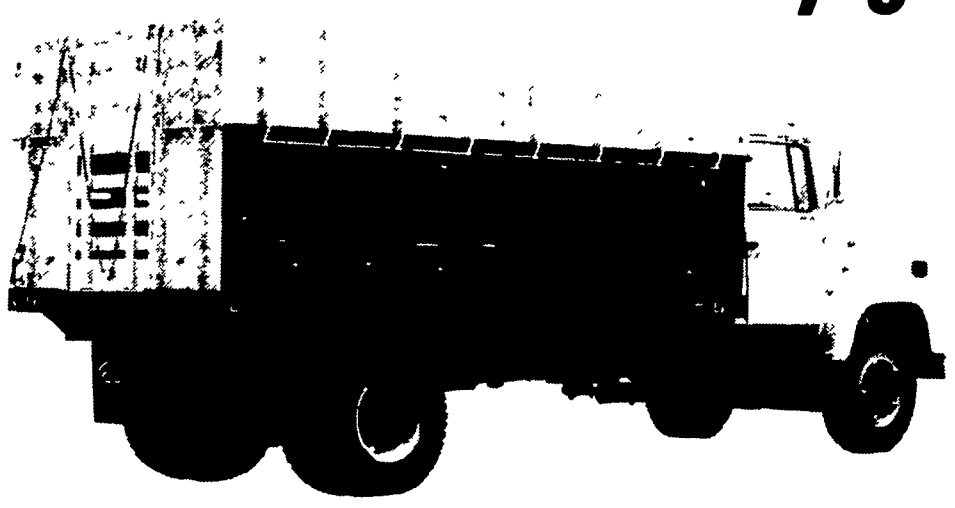
Omaha Standard Combination Bodies and Hoists..., they go together.



Steel body shown with optional 12" tip tops, which are available on 28", 40" and 52" steel sides in all lengths.

The Standard of the Industry

Without question, the toughest all-hardwood livestock and grain combination body around (available in 40" and 48" side heights). High grade woods and hardware, combined with superior craftsmanship assure you of a farm body that will outlast your truck. Laminated edge-grain fir flooring forms the platform core, while riveted hardwood side stakes line each platform side. Omaha Standard offers solid or vented sides Vented sides come with vent slats which remove quickly to let livestock breathe easy on the long haul. Standard features on the hardwood body include cross chains, anti-spread bars, double deck rails, metering grain gate and full-height sliding livestock gate. With features like these, it's easy to see why Omaha Standard is the industry leader.

Put an Omaha Standard Combination Livestock and Grain Body to work for you. Durability, dependability and ease of conversion make these truck bodies a solid investment.

Spray crystallization may be avoided

PRINCETON,N.J. - Have ou ever hauled a truckload liquid pesticides out to the eld and discovered that it ad crystallized in the ontainer? By following a ew common sense steps, ou won't be aggravated by his problem again.

Read and follow label instructions. All pesticides with a storage temperature restriction contain a warning on the label advising the user to deep liquid herbicide and insecticide products protected from cold in a warm storage building. By keeping most products stored above 40-45 F., you won't be faced with this time - consuming problem.

At the end of the day, don't leave half a load of chemicals sitting overnight in the farmyard or field. Pull your truck or trailer into an area where the chemical will be protected from the cold. Also, materials left over in ther sprayer can crystallize. Run all materials out of the sprayer before the end of the day.

It doesn't take long exposure to cold for crystallization to occur. It can happen on the way home from your farm supplier. If it's cold outside, use an insulated truck to pick up the chemicals or wait until it warms up.

But if you suspect that your pesticides have been exposed to cold temperatures, here's an easy test to check if the product has crystallized. Tap the sides and bottom of the container. Crystals usually begin forming on the bottom of the container. And if you hear a dull, solid sound there may be crystals formed. The sides should emit a clear, less solid sound. Or another way to protect from getting crystals in your spray tank where they can clog nozzles is to place a screen over the tank opening. Keep a careful watch as you add the pesticide and if you see crystals starting to form, you know trouble is brewing.

If crystals have formed, get the containers back inside. Place them on their side, rolling them occasionally for as long as is necessary. Frequent movement of the container will speed up the rate of return to solution. One good thing to note is that most pesticides can be brought back into solution without harm to the product.

Base milk price $10.18

ALEXANDRIA, Va. - Joseph D. Shine, Middle Atlantic Market administrator, today announced a base milk price of $10.18 per hundredweight for February 1977, and an excess milk price of $8.13. The weighted average February price is $9.87 and the butterfat differential is 10.4 cents for each tenth of a pound of butterfat. The February base milk price is down 10 cents from January and is 76 cents below last February. Order No. 4 prices are announced for 3.5 per cent milk f.o..b. plant location within 55 miles of Philadelphia, and also within 75 miles from the nearer of Washington, DC or Baltimore, Md. There is a six cent direct - delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine reported that February producer receipts averaged 15.2 million pounds per day, an increase of 1.1 per cent from the previous month and 7.9 per cent above Febru ry 1976.

Design a plow with a big 3-foot clearance between bottoms increase the width of the furrow to 18 inches make the stub beam longer Happy result: the Allis-Chalmers 2000 Series *Monoframe* plow Eight square feet of clearance so more trash can get through High-speed plowing without stopping, too, because "Bump & Run" bottoms lift hydraulically over obstacles and reset automatically No need to leave the tractor seat! Seeing is believing so come in now!

Monoframe is an Allis-Chalmers trademark

Leaflet explains protection of fruit, veg. growers

WASHINGTON, D.C. - How the Perishable Agricultural Commoditeis Act (PACA) protects members of the fruit and vegetable produce industry is explained in a revised leaflet issued last week by the U.S. Department of Agriculture (USDA).

Prepared by the Fruit and Vegetable Division of USDA's Agricultural Marketing Service (AMS), the leaflet explains how the PACA establishes a code of fair trading practices for the fast - moving, financially hazardous produce business.

The revised leaflet outlines unfair business practices prohibited by the law. It explains how a complaint may be filed and how it is handled. Most complaints filed under PACA, the leaflet notes, are settled informally, without court proceedings, saving time and money for all concerned.

The publication includes guidelines in avoiding disputes and a listing of PACA offices across the country where members of the produce industry can obtain advice on their business problems. It also tells what a PACA license is, who must have one, and how a license may be obtained.

Single free copies of PA-804, "The Perishable Agricultural Commodities Act - Fair Trading in the Fruit and Vegetable Industry," are available to members of the produce industry, teachers, consumer organizations, the media, and others interested, on postcard request to: Information Division, AMA, USDA, 26 Federal Plaza, New York, N.Y. 10007.

Need the Strength

The plump young lady told all her friends that she was on a crash diet, and often complained of the hardships she was undergoing in fighting the temptation to gorge herself One day a group of her friends discovered her in a restaurant eating a huge meal "We thought you were dieting" "I am, this will give me the strength to continue"

The Adams County Beef Producers Association recently held what proved to be the highlight of Gettysburg's social season. Held at the Stonehenge Restaurant, over 150 people enjoyed Adams County beef, danced to the music of American Standard and were treated to a "Parade of Bulls".

Strutting down the isle to the dance floor were bulls owned by Scottland Farms of Gettysburg; Adams Land and Cattle Company, New Oxford; Pigeon Hill Farm, Abbottstown; Spring Bottom Farms, Fairfield; and Morlunda Farms, Lewisburg, West Virginia.

These bulls between them have won over 20 grand championships, 18 reserve grand championships and many class winners over a five state area. These bulls are indictive of the fine cattle being raised in and around Adams County, which is fast becoming the leading county in Pennsylvania for beef.

The Adams County Beef Producers Association will sponsor their 2nd Annual "Freedom of Choice" calf sale on October 29, 1977 at the South Mountain Fair Grounds.

Hereford breeders beef up programs

By DIETER KRIEG

YORK - The Pennsylvania Polled Hereford Association is beefing up for more activities this year and in years to come, according to resolutions passed by a group of Hereford breeders meeting here on Wednesday night.

A Summer show and a sale this Fall are on the drawing boards. Final details are to be set at a meeting to be held in conjunction with the Spring Sale in Bedford on April 22-23. It was announced during the meeting that 51 head have been consigned to that event.

Suggested sites for the Summer show included the Allentown and York fairgrounds. The sale in mid-Fall is likely to be held in York if Wednesday's show of hands stands up at further discussions on the matter next month.

The Association did not decide on exact details for the sale which is tentatively scheduled for late September to early November. Attempts will be made not to have it conflict with activities which may detract from the success of the event. Members of the organization repeatedly emphasized the need for quality animals and discussed in detail the advantages of offering heifers or steers. A suggestion was made that both be included in the sale.

"All of us have the best animals when they're at home," commented a New Jersey breeder, "let's have a selection process which will insure quality." The possibility of having someone screen or choose the entries was brought up.

It was noted that Fall sales in other areas do well with the best heifers, but on an overall average, steers generally bring the higher receipts.

Another project the Association has undertaken recently is the publication of its own monthly magazine. The first issue was unveiled during the meeting, with editor Sue Furlong encouraging members to use this new publicity and advertising vehicle. In addition, she asked for suggestions and material input from members. Aside from her editorial duties with the magazine, Mrs. Furlong also serves as secretary of the Association. Advertising and editorial matter should be mailed to her attention at Calumar Farms, Portage R2, Pa. 15946.

Upcoming events which may be of interest to Polled Hereford enthusiasts are: the South Central Regional meeting at Bedford on March 17, the New Jersey State Sale on March 26 and the Northwestern Pa. Polled Hereford Spring Sale on April 15.

Checking the very first issue of "Polled Profile," the monthly publication of the Pennsylvania Polled Hereford Association are editor Sue Furlong and southeastern Pennsylvania regional direct (from left) John Hausner, Yo Ernest Snyder, New Tripoli; Fr Darcey, Fairfield; and Philip Sc Gettysburg.

Help clinch corn profits with plow-down application of Unipel® 20-10-10 fertilizer.

If you're plowing corn ground this Spring, help clinch this year's yields and profits with a single pre-plow application of Unipel 20-10-10. It's a program proved to get results.

Here's why:

1 Unipel 20-10-10 is a high-N complete fertilizer suited to high corn production.
2 Each Unipel 20-10-10 pellet is a homogenized, precise, complete 3-course meal.
3 Unipels' uniformity enables precise, uniform spreading Every square foot of your corn field has a good chance of coming in contact with several pellets, each one a complete nutrient package.
4 Each Unipel pellet has quick-acting and long-lasting forms of Nitrogen and Phosphorus for fast starting and continued nutrient feeding.
5 The intimate Nitrogen and Phosphorus combination in Unipels gives up to 50% better phosphate uptake than separately-applied N & P

The result: You lay big-yield groundwork by providing a sufficient and balanced nutrient supply for every plant, all season long What's more, you're investing in a proved fertilization program.

We recommend Unipel 20-10-10 for basic corn fertilization, because it's a precise complete fertilizer well-suited for today's precise, profitable corn production.

Students form poultry servicing corporation

By JOANNE SPAHR

MANHEIM, Pa. - The Manheim Central High School vocational agriculture department has come up with a first for Lancaster County. Realizing a need for a large scale servicing operation in the booming poultry business in the area, the ag department has formed a corporation known as "MAPS." "MAPS" stands for Manheim Agriculture Poultry Service and is made up of 35 paying members and 40 non-paying members. While there are other poultry serving groups in the county, commonly referred to as chicken catching crews, Manheim's is the first to be incorporated.

Although the organization is legally a nonprofit corporation, Jess Erway and Glenn Spangler, vo-ag teachers and members of the legal board of the corporation, contend that it is run like an incorporated cooperative.

"With this set-up, the members learn what it feels like to run a business from both the manager's as well as the worker's standpoints," says Erway. "They know that if they fool around in this type of business, they are hurting themselves as well as their co-workers, instead of just the employer."

The cooperative was formed to develop interest in agricultural careers by locating work experience for 14 - 21-year-olds; to provide money for agricultural projects; and to help aspiring young farmers start stockpiling funds.

"Let's face it, if they want to get a start in farming, they have to earn money in anyway they can," says Spangler.

Part of the rules governing the organization state that a student may belong to the cooperative until he is out of school three years and no longer. And, girls, as well as boys are welcome as members.

The governing head is made up of two boards of directors. Because the majority of the members are under 18, and not legally able to run the business, a legal board was formed to oversee all transactions. That board is comprised of Earl Geib, president; Glenn Spangler, vice president; and Jess Erway, secretary-treasurer.

A second board, made up of students, and responsible for most of the business carried on by the group, is the managing board. Heading that is Dennis Kulp, manager; Larry Hershey, secretary; Dean Ziegler, Jay Gainer, and Stephen Hershey.

Kulp, in the position of manager, has the responsibility, among other things, of rating the workers after a job is completed.

"We have our own rating system, and if a worker isn't capable, he goes to the bottom of the list," explains Kulp. The organization has approximately 100 - 125 employees at all times, and for one job can send out up to 50 students.

Because of the size of the crew, they are set up to handle large scale jobs in the range of 60,000 birds. And, almost all of the catching crew is experienced, which Erway sees as a plus for the organization.

"They've done work in almost any type of housing operation, and they know from experience how to handle the birds," he states. Novices are worked in one at a time and watched carefully to assess their abilities.

The group also has an honor code and sanitation rules they follow as a matter of course.

"We are really hoping that people will assess these individuals as mature enough to go into a house and work without adult supervision," remarked Spangler. To clarify his statement he said, "Many times people feel 16 and 17 year olds aren't mature, but these people are running a business, and I'd trust them on any job."

Dennis Kulp and Larry Hershey agree. They say they've already done a few jobs on their own and everything went well. They are looking forward to more work and to getting their corporation rolling.

Members of the managing and legal boards of the Manheim Agriculture Poultry Association look over the books. Seated are Dennis Kulp, manager, (left) and Larry Herhsey, secretary of the managing board. Standing is Glenn Spangler, vocational agriculture teacher and vice president of the legal board of the corporation.

PENNSYLVANIA JERSEY CATTLE CLUB

CALF SALE

SATURDAY, MARCH 26, 1977

10:30 A.M. Sharp

Junior — Intermediate — Senior calves for this year's Youth Projects and show circuit. Sires Classify to Excellent 94%; dams to Very Good 87%.

Schick and Gehman Feed Mill win barrow shows

By LAUREL SCHAEFFER
Berks County Reporter

HATFIELD, Pa. - Hatfield Packing Co. was once again the host of the Annual Eastern Pork Producers and Lancaster Pork Producers Barrow Shows. The Associations held the contests simultaneously but did not combine the results.

Dr. John Zeigler, Pennsylvania State University, judged the hog carcasses for both contests. Lancaster had 46 hogs entered in their contest and the Eastern Pork Producers had 80 hogs entered.

Before issuing the results on March 9, Zeigler commented that overall, the entries were the best group of hogs he has helped to cut ever. He told the group that adjusted live weights were used to determine the eligibility for the contests and six hogs were eliminated for being underweight, while none of the carcasses were found to be too heavy for the contest. Some hogs were disqualified from the contests for having loin eyes which were too small, or pale, soft and exudative, (PSE) or short carcasses.

In mentioning PSE, Zeigler told the competing farmers of another syndrome found in some carcasses lately. This is DFD - dark, firm, and dry. Researchers do not know what causes this but Zeigler speculated it may be due to the severe cold weather experienced this Winter. DFD carcasses, Zeigler continued, are good for use in processed meats because of the water retention abilities. [illegible].

The champion carcass for the Eastern Pork Producers Show was a Duroc crossbred gilt, entered by Herb Schick, Kutztown. It had an adjusted live weight of 231.1 pounds; one inch backfat; 31.3 inch length; seven square inch loin eye; and 32.7 ham-loin percentage.

Reserve champion went to Otto Schick, Kutztown; 3rd place Herb Schick, Kutztown; 4th - Herb Schick, Kutztown; 5th - Otto Schick, Kutztown; 6th - John Turner, Kempton; 7th - Gene Curtis, Pennsburg; 8th - Herb Schick, Kutztown; 9th - Otto Schick, Kutztown; 10th - H. Shelly, Palm.

Champion cascass for the Lancaster Show went to Gehman Feeed Mills, Denver. This hog was a Yorkshire - Hampshire cross gilt with an adjusted live weight of 217.5 pounds; .9 inch backfat; 31.5 inch carcass length; 5.37 inch loin eye area; and 33 ham - loin percentage.

Reserve champion was Pork Chop Farm, New Holland. This hog was a Chester White gilt. 3rd place Daryl Nolt, Manheim; 4th- Valleys End Farm, Stasburg; 5th - Dutch Valley Farm, Manheim; 6th - John Strawbridge, Stewartstown; 7th - George Getz, Ephrata; 8th - Esra Good, Denver; 9th - Willow Glen, Strasburg; 10th - Willow Glen.

LETTERS TO THE EDITOR

romotion pennies profitable

r Editor:
ork Producers take
d!!! In reading the letters by Reist R. Mammau, questioning the advisability of the beef referendum, I thought how fortunate the pork producers of Pennsylvania are who have convictions like Mr. Reist.

We have had the opportunity to check off our nickles and dimes voluntarily with the voluntary help of the auctions and packers since January of 1968. Not one person in Pennsylvania involved with the check-off or the Pennsylvania Pork Producers Council is paid, in money or otherwise, for their efforts. Other states are not in the same position as we are. Their check-off is mandatory as set forth by a legislative act. At this point, I would like to add however, that these legislative states have had absolutely no problems and their program is controlled by the producers and not the government. The only thing the government does for them is collect the money.

It is also unfortunate that some people who do not support these types of programs like to reap the benefits. Without the October Porkfest promotion last Fall, hog prices would never have come back to a liveable level. Farm commodies need support from the producers. We cannot expect the packers and retailers to do it all. Kraft, General Foods, etc. spend millions to promote artificial food products and farmers need to counteract these products or go out of business.

Since some of the auctions and markets in Pennsylvania have seen fit to discontinue their cooperation in collecting check-off money for us on an implied consent basis, and this means that Pennsylvania has lost a large portion of their funds, perhaps Pennsylvania will also be forced to go the legislative route. It seems that they chose to stop just before the beef referendum!!

The State Pork Producers Council, the National Pork Producers Council and the National Live Stock and Meat Board have made great strides for the Pork industry in all fields. Help support your Pork industry. We all need to work together. This means live stock buyers, auctions, packers, retailers, and producers. When your market deducts the nickels and dimes, thank them and when they do not deduct please ask them to.

Sincerely,
John C. Turn
Kempton, Pa.

Gardening course

If your garden is only a backyard plot, the proper selection of plant varieties, soil analysis, and crop rotation are still important.

Penn State offers a complete gardening guide. Detailed tables give approximate planting dates, probable harvesting ranges, probable yields and seeds required. Gardeners who like to get an early start will find the course helpful because one lesson in this seven-lesson correspondence course discusses raising seedlings and using artificial light.

Intended for the amateur and experienced gardener, you can get a copy of the course entitled, Home Vegetable Gardening by sending $4 to "Vegetable Gardening," Box 5000, University Park, PA 16802. Make check payable to Penn State.

Livestock future is bright

UNIVERSITY PARK - The future of the United States livestock industry looks very bright because meat and milk will continue to be the primary source of protein in our diets, reports Dr. Roy M. Kottman, dean of the College of Agriculture and Home Economics at Ohio State University.

Dr Kottman was keynote speaker at the 1977 Livestock Day held March 1 on The Pennsylvania State University Campus.

"Per capita consumption of beef this year is approaching 200 pounds and for this reason we are feeding 50 per cent more beef cattle than we did in 1950," he said.

Pennsylvania is particularly suited for livestock production due to an abundance of permanent pastures and land adaptable for growing silage, he noted.

Commenting on the need for more research in animal production and nutrition, the Ohio State University dean pointed out that the beef industry could realize an additional $3 billion return if research funds were available to develop more efficient production practices.

"We need more work on animal growth rate and feed efficiency. We're still trimming too much fat off of dressed carcasses," Dr. Kottman said. "We also need a lot of research in finding out how to best utilize low quality forages."

High feed grain prices should not be here forever. The lack of rainfall in parts of the world that normally receive adequate amounts run in cycles. Moisture in crop producing areas will tend to even out and grain prices will probably level off in the near future, he predicted.

Dr. James M. Beattie, dean of the Penn State College of Agriculture, also a Livestock Day speaker, pointd out that student enrollment in agricultural curriculums has increased by several hundred per cent in recent years. This, he noted, clearly shows that the agricultural industry is second to none in its importance to the nation's economy.

The reorganization of the Departments of Animal [illegible] Dairy Science into one [illegible] was explained by Dr B. [illegible] Baumgardt, departm[illegible] head.

Public Sale

Horse Drawn Farm Machinery, Horses, Harness, Cattle, Milking Equipment and Household Furniture

Saturday, March 26 at 10:00 a.m.

Located 4½ miles South of Belleville on Front Mountain Road in Mifflin Co. Owner is moving out of community.

8 ways! that can help make your farm more profitable

Harvestore haylage, medium-moisture hay silage stored between 40 and 50 percent moisture, may be one of the most efficient and profitable ways ever devised to store and handle forage Here are eight ways that Harvestore haylage can boost profits on your farm

Reduce losses in the field. When hay is baled, many protein-rich leaves are lost You're at the mercy of the weather too—one spring shower and your valuable first-cutting can be gone forever With haylage, you chop when the hay is still moist enough to retain leaves, and get your crop in ahead of the weather

Plug the drain of storage losses. Spoilage can have a significant effect on farm profits It happens whenever moist feeds are stored where air can attack them You can expect to lose about 3 percent of your feed each month if it's in conventional storage But in a Harvestore, oxygen is limited so your feed investment is protected Using Harvestore haylage can be just like adding acres to your farm only without the labor or expense

Escape the high costs of purchased feed. Your forage supply goes farther with haylage so you'll be less likely to have to buy feed Nutritious haylage can reduce the amount of grain you need—and its high protein content will often reduce or even eliminate the need for purchased protein

Solve your labor problems. When you harvest haylage, you eliminate the backbreaking work of bucking bales that unpleasant chore that's driven so many sons away from the farm You won't have to worry about trying to find hired help at harvest time, either—because you can do most of the work of haylage-making right from your tractor seat

Make feeding more efficient. Harvestore haylage is "made" for automated feed handling, so feeding chores can be a snap You can feed your livestock with a touch of a button control rations better too And with Harvestore, it's easy for family members to handle feeding chores

Reduce waste at feeding time. We're all familiar with the trampling and loss of stems that takes place when we feed dry hay and the refusal that often accompanies the use of soggy feeds from conventional silos, trenches or bunkers With Harvestore haylage, every bite is palatable and easy for animals to consume so waste is nearly eliminated Just think—that's like stretching your acres again!

Help your livestock perform better. University studies and on-farm experience have repeatedly demonstrated that Harvestore haylage is superior to other feeds Beef animals will gain faster and more efficiently dairy cows will produce more milk at lower cost That puts more dollars in your pocket, too

Use the most flexible forage management system. With its top filling and bottom unloading, a Harvestore is a continuous feed processing system not just a place to store feed You can harvest haylage whenever it's ready—without interrupting your feeding program Top off with cornlage or other late-season forage to help stretch your feed supply With Harvestore there's no sudden change of feed—ever

Want to know more about Harvestore haylage?

Read what university authorities have to say about the benefits of Harvestore haylage Just fill out and mail the postage-paid card below to receive a free copy of the in-depth research report "Haylage—A Short Course in Print"

our feed costs dropped . . .

Not only that, but even though our herd has increased from 100 to 165 cows, milk production is up 3,000 lbs. per cow to 18,000 lbs. per year. We put up a corn unit . . . and with the haylage, the high-moisture grain brought our butterfat up 2 points. We got our first Harvestore to cut down on labor, and so we could ensile limited quantities of alfalfa at a time without the spoilage you'd get in a conventional silo, it's done that and more."

— Richard Herrmann, Jr., dairy farmer, Appleton, WI

"We can fill our Harvestore with haylage about eight months out of the year . . .

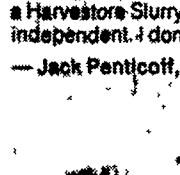
"Our 2050 Harvestore lets us make three different kinds of haylage, taking the best advantage of our existing acreage—and that's important in this hilly country. We put up alfalfa haylage, haylage and ryelage in our Harvestore. We bought the structure because we were fed up with the labor problems and waste we had with trench silos. It's done away with those difficulties—and paid off other ways besides."

— Edwin Moore, dairy and stock farmer, Frazeysburg, OH

"Haylage lets me produce 1,136 lbs. of beef per crop acre without buying any protein or corn . . .

"I feed a real high-forage ration, with my cattle getting no more than 10 lbs. of corn per head daily at the heavy finish end Haylage gives my cattle plenty of energy—and they don't need any protein supplement while I'm putting on 550 to 600 lbs. of gain per head. My alfalfa haylage program, along with a Harvestore Slurrystore System, has made me really independent. I don't buy feed, fertilizer or weed killer"

— Jack Penticoff, beef feeder, Hampton, IA



"The good nutrition of Harvestore haylage helps make A.I. work in our cow-calf operation . . .

"I was one of the first cow-calf operators in my area to use artificial insemination. You must have good nutrition for A.I. to work with brood cows . . and Harvestore haylage gives us that. It puts pounds on the calves, too The rate of gain for the 600 calves I background each year has gone from only 1 lb. per day on pasture to 2 lbs. on a haylage-based ration"

— Don Pimperton, cattle rancher, Ft. Benton, MT

payment three times over . . .

"We're feeding our cows a Harvestore ration that includes alfalfa haylage, cornlage and high-moisture ground ear corn. Our high-producers are making us about $2.93 a head, better than they ever did before All in all, our haylage feeding program has replaced enough protein to save me $16,000 per year, This isn't surprising. We tested Harvestore haylage against conventional hay silage and found that the Harvestore feed was as much as six percent higher in crude protein after processing."

— Tom Trinder, dairy farmer; Pompey, NY

"The cows told me there was a big difference between Harvestore haylage and hay silage from a concrete stave . . .

"Just after we put up our first Harvestore we decided to 'see for ourselves'. We chopped alfalfa from the same field and filled both our Harvestore and our concrete stave silo. At the time we were milking 55 cows—and we lost 200 lbs. of milk per day when we fed silo 'haylage'. When the herd went back on Harvestore haylage, milk production jumped right back. To me that says a lot for the value of Harvestore. Now I've got three of them."

— Ron White, dairy farmer, Sopris, MI

"We get three to four cuttings of alfalfa for haylage, and I could only bale hay twice . . .

"Now I can always be sure of getting good haylage. With baled hay, it was a matter of luck more than anything else. Haylage has, really cut back on the protein supplement, too. I'm paying a sixth as much for protein as I did when we fed baled hay and conventional silage. We operate on a government production quota here in Canada—so you have to produce more milk at less cost if you want to be successful. With haylage, that's what we're doing."

— David Cleghorn, dairy farmer, Arisa, Ont., Canada

times as much done . . .

Now we don't have to hire any labor at all to harvest our crops Before we got the Harvestores, finding and paying workers was a real problem. Now my son and I can do everything by ourselves . . we have no extra labor at all. We have two forage Harvestores, with haylage in one and lower protein forages in the other. That way we can balance our rations by blending—without adding supplement. It works real well with high-moisture milo in our total beef ration"

— Art Strahm, cattle feeder, Sabetha, KS

"When you're feeding 500 cattle a year, you could spend a lot on supplement—but with haylage you don't have to . . .

"Our Harvestore haylage and high-moisture grain has let us increase the number of cattle we finish without a big boost in labor. That means we have more gross income and a more positive cash flow. Those factors, along with reduced feed costs, are giving us a 10 to 15 percent return on our investment. Now we have the flexibility to change with the market. When corn is too expensive we can cut back and feed more haylage to our cattle

— Emerson and Steve Busick, beef feeders, Melvin, IL

"Switching to Harvestore made us an additional $61,100 in one year —but there are advantages figures can't show . . .

"The haylage is so much better than baled hay In the old days we couldn't get into the fields early enough, and we lost wet hay from combustion Now, we are chopping by June 1st about every year—and those inevitable late spring rains just help start the second regrowth. Our Harvestore total ration really does the job. Not long ago, our 49 cows were returning $1,109 above feed cost for the year, with purchased feed amounting to only $11.81 per head"

— Charles Bates, dairy farmer, Elmwood, WI

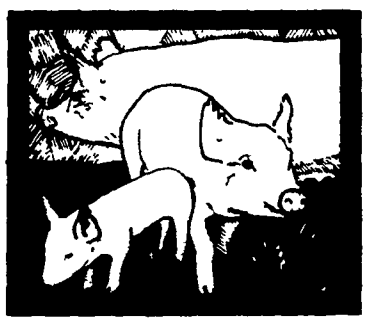
WAYNE®

IRON RICH! BOOST 'N IRON

Patent Pending ™



Wayne® Boost 'N Iron is an outstanding source of nutritional iron for swine.

Boost 'N Iron is a chelated iron proteinate created by a patented process. Unlike most other iron products, all of the iron in Wayne Boost 'N Iron is chelated with protein.

Directions for use, when supplemental iron is desired:

Starting Feeds - Mix 5 lbs. Wayne Boost 'N Iron per ton of Wayne Mix ration and self feed as the sole ration.

Growing - Finishing Feeds — Mix 5 lbs. Wayne Boost 'N Iron per ton of Wayne Mix ration and self feed as the sole ration.

Sow Feeds - Mix 5 lbs. of Boost 'N Iron per ton of Wayne Mix ration.

- From 30 days prior to farrowing until 7 days before farrowing feed 6 lbs./head/day
- From 7 days before farrowing to 14 days after farrowing full feed with a minimum 8 lbs./head/day
- From 10 days prior to breeding to 10 days after breeding feed 8 lbs./head/day
- From 10 days after breeding to 30 days prior to farrowing feed 4-5 lbs./head/day

YOU CAN'T FIND AN EASIER WAY

Join the ranks of satisfied hog producers. Ask the Wayne Feeds dealers listed below for Wayne Boost 'N Iron.

The Wayne Feeds dealers listed below also offer you an assortment of fine horse and dog food products.

WAYNE PRO-MIX

Provides complete and balanced nutrition for your dog.

WAYNE FRONT RUNNER HORSE KRUNCH

Front Runner furnishes ample vitamins, minerals and protein. Pure cane molasses provide flavor that horses love.

Members of the Elm and Penryn Community Club prepare for their Park City exhibit by painting their fence and sign. The display will include pigs enclosed in a pen to show passersby what a swine project is like.

Sherry Frey (left) and Diane Bowman show part of their display for 4-H Expo at Park City. They represent the Mount Joy Busy Bakers and are using a wood stove to dramatize part of their colonial foods project. The club is also giving demonstrations on making candy mints, coating peanut butter candy, and making crabapple eggs and honey milk balls.

4-H'ers prepare for Expo

LANCASTER, Pa. - The 4-H program in Lancaster County is gearing up for another busy season of activites, and for the third year is featuring an exposition in the Park City shopping mall to help get things rolling. Fifteen exhibits created by 4-H'ers, themselves, will line the Watt and Shand spoke of the shopping wheel from March 23-26.

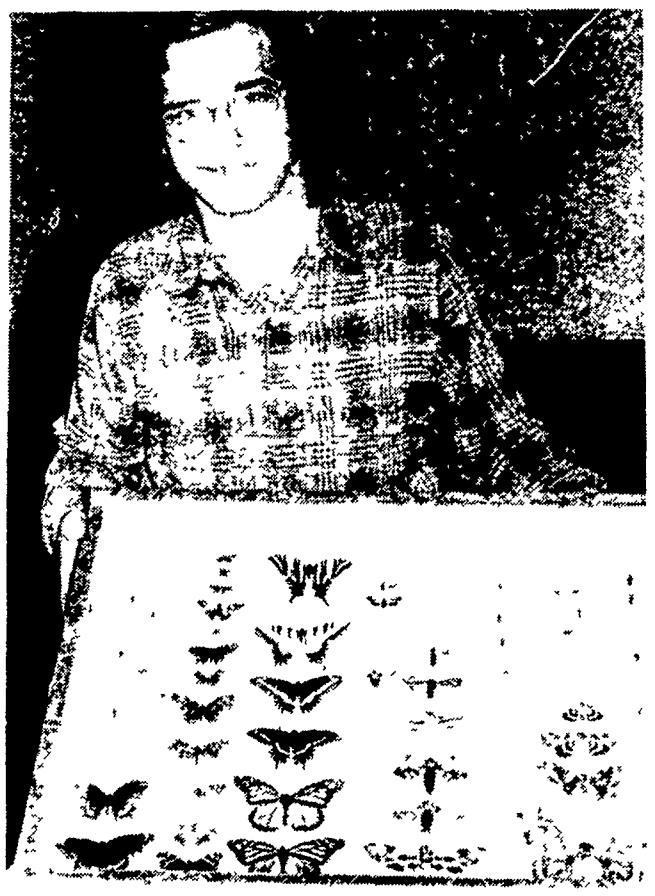
"We want to show what 4-H is and what projects are being done," said Linda Franz, 4-H agent from Lancaster County, explaining why Expo is set up each year. Those projects which will be on display next week include entomology, food, pork, beef, sheep, crafts, photography, tractors, and grains.

Also scheduled for the three days are informal demonstrations by the various clubs. On March 24 at 7 p.m. the Mountville 4-H club will feature a session on pet care followed by the Good Use 4-H club demonstrating macrame at 7:50 p.m.

On March 25 from 2 - 4 p.m. the Brickerville Community Club will feature corn huskdolls. In the evening from 7 to 8 p.m. ther Ephrata Community Club will show how to do Williamsburg Under Glass.

The following day (March 26) the Mt. Joy Paper Crafts club will feature quilling and scherensnitte from 1 - 3 p.m. followed by Genevieve Gibson from the Good Use 4-H club demonstating 3-D art from 3 - 4 p.m. and macrame from 7 - 8 p.m.

In addition, the Mt. Joy Busy Bakers 4-H club will have demonstration going on each afternoon and evening. On Thursday and Friday they will feature candy making, and on Saturday, they will explain and demonstrate making snacks, decorating cakes, making candy, and making crab apple eggs.

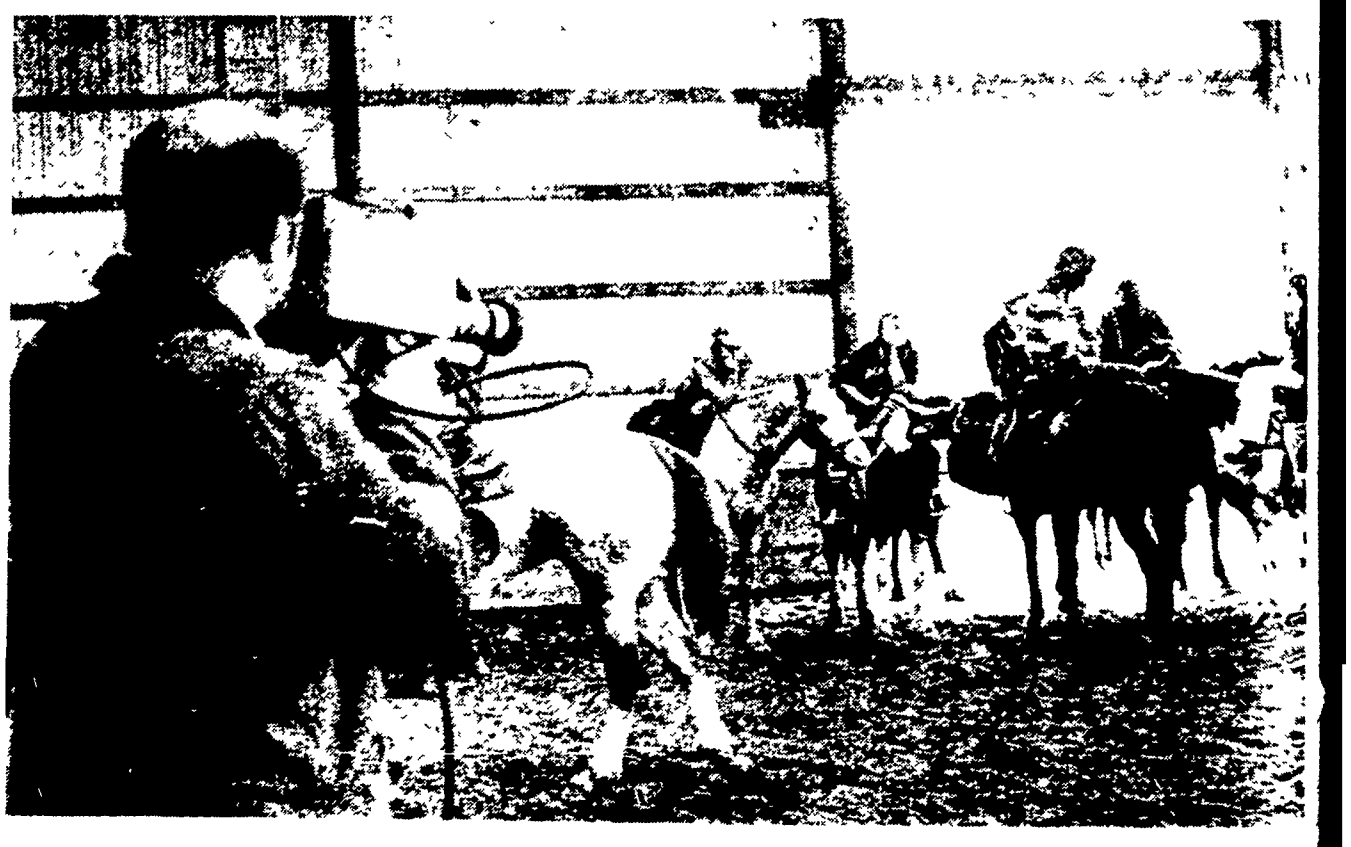


Alan Mays, 1212 Nissly Road, Lancaster, prepared his entomology display for 4-H Expo at Park City. Alan is a member of the Lititz-Manheim 4-H club and has taken entomology for seven years.

Terri Reinard, and Jaci Meckley both of Brickerville, set up the Brickerville Community Club's exhibit on "Grains America Grew Up On."

HOMESTEAD NOTES

For the past several weeks the 4-H Boots and Saddles Club from the Lititz-Manheim area have been preparing for their exhibits at Park City. They have been taking photos and movies of various club events to give onlookers an idea of what their club is all about. On March 13 the club gathered at the Lower Hopewell Horse Center to participate in a horsemanship clinic, and photographer and leader Richard Harclerode, Leola, was there to capture the afternoon in movies. Here, he shoots the members waiting their turn to work out with the instructor.



On being a farm wife - and other hazards

By Joyce Bupp

The pitter-patter of little feet has become prominent in our household again. Oh, no! Not that kind of feet. These feet came in a set of four, attached to a wriggling little black and tan body complete with the accessories of one constantly wagging tail and a yapping little bark.

Yep - we've got a new pup.

Fritz is a five month German Shepherd bundle of boundless energy. He formerly belonged to an elderly business associate who felt he did not have the proper facilities for the pup and wanted to find him a home on a farm. Since we were looking for a young Shepherd for the children, the offer came at a perfect time.

We've never had dogs in the house; but the pup was strange, and we were afaraid he might run off the first night. So, our basement became a giant - sized dog house. Fritz loves it. He runs to the top of the steps. and Patty and Rich invariably invite him into the kitchen for a bowl of milk. It's a real dog's life.

Someone told us that the name Fritz, in German, means "killer." That tickled Richard's fancy, and the lovable mutt has becaome known half the time by that handle. Besides, warning "Down, Killer!" might serve to slow down a few of the door-to-door salesmen that find us.

The only family member that Fritz found less than overjoyed with his presence was our house cat, Whiskers. She took one look at the over - friendly puppy and immediately underwent a drastic personality change. The sleek, purring body became a lighted firecracker of arching, spitting black fur with a stiff bottlebrush tail. We may have to send in Henry Henry Kissinger to negotiate a peace truce before the two enemies turn the house upside down.

Although Fritz is supposed to be pure German Shepherd stock, we guess that somewhere in the lower limbs of his family tree, an ancestor got a little over-friendly with a roving collie. When he sits perfectly alert with his ears up, the tips of the ears flop forward. And there's just a faint tract of collie gentleness about his young face. But basically he's an intelligent, well - behaved animal for his age, and we have great hopes for his future as a farm dog.

So, on his way to claiming the living room, he's won all our hearts along the way.

From Pa.'s Dairy Princesses

By Carol Yeager
Chester Co.
Dairy Princess

ATTENTION: All farmers' daughters.

This is your chance to help your father, the dairy farmer. However, instead of plowing the corn fields or milking the cows at 4:30 to 5 a.m., you can help him in a very special way . . . Why not represent your county as a Dairy Princess and help to promote your father's number one product, milk.

Girls betwwen the ages of 16 and 21 who are unmarried and the daughter of a dairy farmer or who have a herd of their own are eligible to qualify. This job is very hectic, but it is well worth the trouble. Dairy princesses meet new groups and organizations, speak with different people, and are special individuals to the dairy farmers they support.

Also, as county princesses, they are privileged to participate in the Pennsylvania State dairy princess pageant.

As Chester County dairy princess, this experience has enabled me to meet the 39 other county princesses in Pennsylvania and learn new techiques of promoting milk.

To, as the dairy month of June approaches, along with the county pageants, ask yourself if there is a better way for you to do your share of promoting milk, and contact the dairy princess committee in your county.

Hot Dog!

Hot dogs can look great if you split them lengthwise, place a strip of sharp cheese in the cut and wrap each with a slice of bacon, secured with wooden picks. Broil on a rack, about 15 minutes.

Food additives to be discussed

MEDIA. Pa. - The Penn State Extension Service has planned a meeting on "Food Additives," says Maryetta Duffner, Extension home economist. Robert Lockett from the Consumer Affairs Office of the Food and Drug Administration will speak on this topic on Friday, April 1 from 10:00 a.m. to 12:00 p.m. in the Toal Building Auditorium, corner of 2nd and Orange Sts, Media. The public is invited to attend.

Food additives are a great concern to many persons. Mr. Lockett will explain what additives are, how their use benefits consumers, and how legislation helps to protect the consumer. No registration is needed.

Know Where the Activities Will Be? **Read** the Farm Women Calendar.

Ida's Notebook

Ida Risser

The population of plants on the windowsills in our old, ten-room farmhouse has its ups and downs. About this time of year, some of them begin to look rather scraggly and are put on the back porch to fend for themselves. Then I'll buy a few small ones or someone will give me several and all the empty spots are filled again.

This morning, as I did the breakfast dishes, I noticed that the cherry tomato plant finally has a few tomatoes that are red enough to pick. And while watering my plants, I picked some nasturtiums for a small kitchen table bouquet. Even my large red - orange tulip managed to bloom in time for my guests last weekend after spending six weeks in the refrigerator.

xxx

Our son Philip had a busy time last week - too busy. He had just come home after spending several days on the Penn State Capitol Campus attending a model U. N. meeting as a representative of Tanzania. There was no time to catch up with lost sleep as he had to record sound effects for his Junior Play.

He taped the Grandfather's clock chiming, our dinner bell ringing, (in the play it sounded like distant church bells), screaming and his own realistic imitation of an owl hooting.

After late play rehearsals, he came home to work on benches to go with the beautiful butcher block table which he made for his married sister to take back to Indiana. He went to bed after midnight and at 5 o'clock, I'd hear his alarm clock ringing. It certainly didn't take him long to spend an "over - night" at our house.

Rubin to speak at women's seminar

HERSHEY, Pa. - "The Impact of Women Today; Their Psychology and Contribution to Society" will be the topic of a talk by well known author and columnist, Dr. Theodore Issac Rubin. The author of numerous books including one made into the film David and Lisa and Man and Sex; A Book for Women (to be pulbished), and the column "a Psychiatrist's Notebook" which appears in Ladies Home Journal will be part of an all-day seminar, "Women in a Contemporary Society," scheduled for Thursday, April 21 at the Hershey Convention Center

Afternoon workshop sessions will be conducted by staff of the Milton Hershey Medical School, Family-living specialists of the Pennsylvania State University, and professor from Gettysburg College, Dickinson School of Law. Topics include: food safety, women and the law, the problems of death and dying in the seventies, where is the family going, coping with teenagers, parental and community concern about the developing child, food fat and fallacy and the family medicine chest.

"Women in Contemporary Society" is sponsored by the Capitol Region of the Cooperative Extension Service of the Pennsylvania State University. Registration will be accepted on a first-come, first-serve basis. The program is open to all interested people regardless of race, color or national origin. For more information, and a registration flyer, contact the Cooperative Extension Service in your county.

Dairy club reorganizes

The Eastern Berks 4-H Dairy Club recently reorganized at the Fleetwood Grange Hall. The election of 1977 club officers produced the following results: Martha Herbert, president; James Schuler, vice president; Wendy Shaw, secretary; Helen Seidel, treasurer; Nancy Latshaw and Ruth Schuler, news reporters; and Duane Petersheim, game leader.

Ronald Kurtz, Sandra Moser, and Sherri Zollers became new members.

Milk production unchanged

HARRISBURG, Pa. - Milk production in Pennsylvania during February 1977 totaled 578 million pounds, the same as a year earlier according to the Crop Reporting Service. The number of milk cows in the Commonwealth during February was 705,000 head, down 4,000 or one per cent from a year earlier. Production per cow averaged 820 pounds compared with 815 pounds a year ago.

United States milk production during February totaled 9,351 million pounds, up one-half per cent from a year earlier. Production per cow averaged 849 pounds in Februay, up one per cent from a year ago. Milk cows on farms totaled 11,013,000 head, down one per cent from February 1976.

Sassy Spring Salads

Spring-like weather is here, bringing with it uplifted spirits and the shedding of extra layers of Winter clothes. But, as the layers of clothing are shed, many times it becomes apparent that a few extra Winter pounds have to be shed right along with them. To aid in dieting, "Home on the Range" is featuring "Sassy Spring Salads" this week. Hope you enjoy them as much as this lovely March weather.

Both slim friends and those on the way to becoming slimmer will appreciate Marvelous Make-Ahead Salad. *Though low in calories,* it's a hearty main dish salad.

MARVELOUS MAKE-AHEAD SALAD

1 medium head iceberg lettuce
1 large green pepper, chopped
1 cup chopped celery
1 package (10 oz.) frozen peas, uncooked
¼ cup minced onion
10 hard-cooked eggs, sliced
1 cup (4 oz.) shredded Cheddar cheese

Dreamy Dressing

Break or cut lettuce into bite-sized pieces and arrange on bottom of 9x 13 x 2-inch baking dish or pan or any large salad bowl. Sprinkle with green pepper, celery, peas and onion. Reserve slices from one egg for garnish; layer remaining eggs on top of vegetables. Sprinkle with half of the cheese. Spread dressing over top and sprinkle with remaining cheese. Cover and chill several hours. Garnish with reserved egg slices. About 332 calories per serving. Makes six generous servings.

Dreamy Dressing: Combine 1-½ cups cottage cheese, ¼ cup skim milk, 3-4 tablespoons lemon juice, artifical sweetener equivalent to one tablespoon sugar and ½ teaspoon tarragon in blender or mixing bowl and blend or beat until smooth. Chill until ready to use.

TOSSED SALAD

8 cups cabbage, shredded
1 green pepper, chopped
3 carrots, diced
½ cup onion, chopped

Mix in large bowl and cover with ice water two hours.

Boil one minute:
Two-thirds cup vinegar
Two-thirds cup sugar
2 teaspoon celery seed
1-½ teaspoon salt
1 pepper to taste

Remove from heat and add one pack gelatin which was soaked in ¼ cup cold water, add two-thirds cup salad oil. Drain cabbage and mix with dressing.

Mrs. Raymond Wenger
Lititz, Pa.

xxx

TOMATO SOUP SALAD DRESSING

1 grated onion
1 cup salad oil
1-½ teaspoons Worchestershire sauce
1-½ tablespoons prepared mustard
1 teaspoon paprika
½ cup vinegar
1-½ cups sugar
1 teaspoon salt
1 cup tomato soup

Combine all ingredients into blender and blend well. Refrigerate. Makes approximately one scant quart.

Mrs. David W. Nunn
New Columbia, Pa. 17856

xxx

BEAN SALAD

1 can chick beans - rinse and drain well
1 can green beans - rinse and drain well
1 can wax beans - rinse and drain well
1 onion diced
1 small green pepper diced - optional
½ cup vinegar
½ cup salad oil
¾ cup sugar
1 teaspoon salt
Dash pepper

Heat the last five ingredients and bring to a boil. Cool, then pour over beans and toss. Let stand several hours or overnight. Stir occasionally.

Mrs. Timothy Newswanger
Danville, Pa.

xxx

GARDEN SALAD

8 cups shredded cabbage
2 carrots, shredded
1 green pepper chopped
½ cup chopped onion
¼ cup celery

Mix above ingredients together.

Dressing:
1 envelope unflavored gelatin
¼ cup cold water
Two-thirds cup sugar
Two-thirds cup vinegar
2 teaspoons celery seed
1½ teaspoon salt
¼ teaspoon pepper
Two-thirds cup salad oil

Soften gelatin in cold water. Mix sugar, vinegar, celery seed, salt, and pepper in saucepan and bring to boil. Add softened gelatin. Cool until slightly thick. Beat with mixer and gradually add salad oil. Pour dressing over garden salad and mix lightly. Chill and stir before serving.

Mrs. Janet Heller
Robesonia, Pa.

xxx
xxx

BLUEBERRY DESSERT SALAD

1 box (3 ounces) lemon flavored gelatin
¾ cup boiling water
Small box whipped topping
1 can blueberry pie filling
½ cup chopped nuts

Dissolve gelatin in water. Add pie filling and nuts. Chill until partly thickened. Add whipped topping and pour into mold or other container.

xxx

CUCUMBER BOAT SALAD

3 large cucumbers
1 cup diced cooked ham
1 cup diced American cheese
2 cups diced unpeeled red apples

Cut unpeeled cucumbers in half lengthwise - remove seedy portion. Scoop out pulp leaving firm shells. Chop pulp - combine ham, cheese, apples and enough mayonnaise or sour cream to stick it together. When ready to serve, add chopped pulp to other mixture. Mix well. Fill cucumber shells. Serve on salad greens. Six servings. Delicious.

Above two recipes by:
Harriet Greenawalt
Lancaster, Pa.

xxx

CARROT AND PINEAPPLE SALAD

1 package (3 ounces) orange gelatin
1 cup pineapple juice
1 cup boiling water
1 cup crushed pineapple
1½ cup ground or grated raw carrots
½ cup chopped nuts

Dissolve gelatin in hot water and add pineapple juice. Chill. When this begins to thicken, add other ingredients. Pour mixture into a mold and chill until set. Serve on lettuce, with or without mayonnaise.

Mrs. Carl S. Bacon
Felton, Pa.

xxx

SPRING SALAD

2 pounds spinach (dry well)
½ of 12 ounce can bean sprouts
4 ounces water chestnuts
1 hard-boiled egg
½ pound bacon, fried and crumbled

Mix all together.

Dressing:
¾ cup sugar
1 cup salad oil
One-third cup catsup
¼ cup vinegar
3 teaspoons Worcestershire sauce
½ teaspoon salt
about ½ onion

Put all together in blender and blend. Then pour over salad.

Mrs. Herbert Kreider
Hershey, Pa

xxx

LIME-PINEAPPLE JELLO SALAD

1 package lime-flavored gelatin
1 small can crushed pineapple
1 package (small) cream cheese
½ to 1 cup chopped nuts (walnuts)

Mix gelatin in 1½ cups boiling water and juice from pineapple. Also mix in cream cheese - break with fork. Let stand until cool then beat with egg beater until smooth. Add pineapple and nuts. Chill until firm

Mrs. James L. Counts
Gardners, Pa.

Recipe Swap

This week's recipe exange is featuring the split a soup requested two eks ago. Said Mrs. James ombs, who sent in four of e five recipes printed low, "Although this is ennsylvania Dutch untry, perhaps the split a soup a la Italian will be a easant change from the ual." There's no doubt out that - it definitely will. This week's request is for a memade yeast cake ipe.

"My grandmother used to ke it, but all I can member is corn meal and ite potatoes, but I don't ow how she mixed them," ys the contributor asking r this recipe. Perhaps meone can answer this cry rd in the wilderness. If send your recipe with your name, address, and phone number to **Lancaster Farming Newspaper**, "Recipe Swap," Box 266, Lititz, Pa. 17543.

SPLIT PEA SOUP

1 large ham bone
1 pound split peas
3 quarts water
1 white onion
½ carrot, diced
Seasoning (salt, red and white pepper)
6 slices bacon (optional)
2 eggs, hard cooked (optional)

Place split peas and ham bone in cold water and let come to a rapid boil. Continue boiling until peas have dissolved. Turn heat low and add seasoning. Cook slowly for two and a half hours. Before serving, put soup through strainer. Replace ham bits in soup, discarding bone, fat, etc. To serve, you may add a tablespoon crumbled bacon and chopped egg to each plate of soup after soup has been ladled. Serves six.

xxx

SPLIT PEA SOUP

Wash and soak overnight one cup of yellow or green split peas in cold water to generously cover. In the morning drain off the water and cover the peas with three quarts of fresh water. Add the ham bone left over from a baked or boiled ham; three tablespoons of chopped onions; one bouquet garni composed of one large bay leaf, eight sprigs of fresh parsley, two sprigs of fresh green celery leaves (tops) and one sprig of thyme, all tied together with white kitchen thread; season to taste with salt, and eight freshly crushed peppercorns. Bring slowly to a boil; lower the heat and simmer very gently until peas are tender, placing an asbestos pad under the kettle, as peas are liable to scorch or burn when slowly cooked. Empty the mixture into a fine sieve, discard the ham bone and the bouquet garni, and rub through a fine-meshed wire sieve, into a fresh saucepan. Keep hot. Melt two tablespoons of butter, stir in 1-½ tablespoons of flour and stir over a low flame until thoroughly blended, but not browned; then stir in gradually two cups of scalded milk, stirring constantly until mixture boils and thickens slightly. Combine the mixtures, taste for seasoning, let boil up two or three times and serve at once with croutons.

SPLIT PEA SOUP WITH HAM

2 quarts of water
1 pound green split peas
3 small ham hocks
1 cup chopped onion
1 cup diced carrots
1 cup diced celery
2 sprigs of parsley

In large pot combine all ingredients. Bring to a boil. Reduce heat and simmer covered until peas are tender, about two hours, stirring occasionally. Remove ham hocks cut away meat from bones, return ham to soup. You can also use ham stock and cut up left over ham in soup last half hour of cooking.

Windsor, New York

xxx

SNERT
(Dutch Pea Soup)

2 pounds pork knuckle
½ pounds shin beef
½ pounds unsmoked bacon
1 pound split peas
1 bunch celery
2-3 leeks
1 pound smoked sausage
Salt and pepper to taste

Place pork knuckle, beef, and bacon in a pan with cold water to cover and bring to the boil. Simmer very slowly in four hours. Strain and add peas to stock. Bring to the boil and simmer until peas are tender (about three hours). Shred celery and leeks and add to stock 45 minutes before peas are done. Add sausage 10 minutes before soup is done. Season. Divide meat into portions and pour soup over it. Serves eight (The best pea soup in the world!).

xxx

PEA SOUP
ala ITALIAN

2½ cups green split peas
3 quarts water
3 tablespoons olive oil
½ pounds carrots, scraped and diced
1 celery stalk, diced
1½ cups diced onions
1 medium sized baking potato, peeled and diced
1 ham hock
6 ounces salt pork, diced
1 bay leaf, crumbled
1 large garlic clove, mashed
1 teaspoon salt
½ teaspoon black pepper
1 pound fresh peas, shelled
½ pound vermicelli
½ cup freshly grated Parmesan cheese

Soak the split peas in water overnight. Drain and discard the water. Place the three quarts water in a large soup pot and heat. Add drained split peas and the oil and bring to a boil. Add next 10 ingredients. Cook slowly for one hour.

Remove soup from the heat and discard the ham bones. Pass the soup through a strainer or puree in a blender. Place soup back in the pot, bring to a boil, and add the fresh peas. Cook slowly for one hour. Check for doneness. Do not burn. Add the vermicelli and cook for six minutes. Take the soup off the heat and stir in the butter. Let stand for four minutes. Sprinkle some of the cheese over each serving. Serves six or more.

Plant lovers' corner

Check glads and dahlias

It will be a little while before it's time to plant gladiolus corms and dahlia tubers, but it's not too early to look over the ones you've stored away for the Winter, says Spencer H. Davis Jr., extension specialist in plant pathology at Cook College, Rutgers University.

Many homeowners put corms, bulbs and tubers in baskets, bags and boxes in the fall and forget about them until planting time. If any happened to have any soft spots when they were put away, you'll find a few more bad ones when you get ready to plant them.

Sort through the corms and tubers and throw away any that show the slightest indication of decay.

If you find any with soft spots and cannot even see any decayed areas, consider it a candidate for the trash pile.

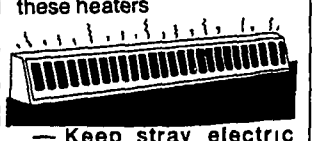
The short time it takes you to do the job now may save you a lot of disappointment later.

CONSUMER GUIDELINES

Safety Tips

- Some electric baseboard heaters are hot enough to cause materials touching them to burn

—Keep drapes, bedding, shag rugs, toys and all combustible objects away from these heaters



— Keep stray electric cords away

—Clean the heater frequently to remove dust and debris which could ignite.

—Don't let infants crawl near electric baseboard.

—Teach children that the inside coil — even the outside metal cover — can be hot enough to burn

Junior Cooking Edition

Our contributors to "Junior Cooking Edition" this week were very thorough in their recipes, and one person even followed a theme from "Home on the Range." We would like to encourage more junior cooks to follow the guidelines set up in the monthly calendar for the adult column. You all know recipes to fit the themes, and it can be a lot of fun trying to categorize your recipes under the different weekly ideas.

To find out what themes are designated to the various weeks, look for the theme calendar which is printed on the women's pages near the recipes every week. And, when sending the various types of recipes to us, be sure to say which category you intend them for so we can easily file them.

Hope you enjoy today's selections.

KRISPIES OATMEAL COOKIES

1 cup shortening
1 cup granulated sugar
1 cup brown sugar
2 eggs
1 teaspoon vanilla
2 cups sifted flour
1 teaspoon soda
½ teaspoon baking powder
½ teaspoon salt
2 cups oats
2 cups rice krispies
1 cup coconut
½ cup nuts

Cream shortening; add sugar gradually and cream thoroughly. Add vanilla and eggs one at a time. Beat well after each addition. Sift flour, soda, baking powder, and salt together and add to creamed mixture. Add oatmeal cereal, coconut, nuts, and mix well. The dough will be quite crumbly. Mold with hands into balls the size of walnuts and place on slightly greased cookie sheet. Bake at 375 degrees F for 10 minutes. Do not over bake - this will cause the cookies to become hard.

xxx

ORANGE CAKE

1-½ cups sugar
¾ cup shortening
3 cups flour
1-½ cups sour milk
1-½ teaspoon soda
2 eggs
½ teaspoon baking powder
½ teaspoon salt
1 cup nuts
1 cup raising
1 orange (including rind)

Cream sugar and shortening and add sifted dry ingredients to milk. Add the eggs. Then grind together nuts, raisins, and orange. Stir this nut and raisin mixture into cake batter and bake at 350 degrees F. for 40 minutes.

Orange Icing:
1 box confectioner's sugar
Juice and rind of one orange
2 tablespoons margarine

Beat the three ingredients together and spread onto cake.

CREAM PUFFS

1-½ package yeast
¼ cup warm water
½ cup boiling water
½ cup shortening
One-third cup sugar
1 teaspoon salt
½ cup milk
2 eggs (beaten)
5 to 6 cups sifted flour

Dissolve yeast in warm water. Combine boiling water and shortening. Blend well. Add sugar and salt. Stir until lukewarm. Blend in yeast, milk, eggs. Gradually stir in flour. Knead until smooth. Place in a greased bowl, greased side up. Cover, let rise in warm place until double (1 hour). Turn dough onto floured surface, roll to ½ inch in thickness. Cut in strips - any size you prefer. Cover, let rise until double. (About 30 minutes.) Deep fry in shortening. Dip in glaze made of confectioners sugar and small amount of boiling water.

xxx

ICE CREAM PIE

Filling:
2 pkg. coconut instant pudding
½ gallon vanilla ice cream
1-¼ cups milk
Crust:
60 snack crackers
¼ lb. butter

Mix crumbs with butter for crust. Keep ¾ cups for topping. Pack in regular - sized cake or pie pan. For filling, mix together all ingredients and spread on the pie crust. Top with instant whipped topping and sprinkle crumbs on top. Refrigerate.

Velvet Wedde
Hegins, Pa.

xxx

PINEAPPLE SALAD

1 can pineapples
2 oranges
2 handfuls marshmallows (small)
1 cup chopped nuts

Dressing:
½ cup sugar
Pineapple juice from one can pineapples
1 tablespoon flour
2 eggs
1 cup whipped cream

Add sugar, flour, and eggs to hot pineapple juice and cook until thick. Add whipped cream. Pour over pineapples, oranges, marshmallows, and nuts. Do not add dressing until just before using.

xxx

JIFFY PIZZA

Dough:
2 cups flour
1 teaspoon salt
1 teaspoon baking powder
Two-third cup milk
One-third cup salad oil

Mix together and spread in pizza pan.

Sauce:
6 ounce can tomato paste
¼ cup water
½ teaspoon oregano
Browned hamburger

Spread over dough; then add browned hamburger. Cover with cheese. Bake 25 to 30 minutes at 425 degrees F.

Wilma Martin
New Holland, Pa.
Age 12

xxx

CANDY

2 cups brown sugar
1-½ cups molasses
1 cup butter
2 cups sweet cream
1 cup walnuts
3 squares chocolate
1 tablespoon vanilla

Combine sugar, molasses, butter, and one cup of cream. When the mixture boils, stir in the other cup or cream slowly without stoppong to let the mixture boil. When the mixture forms a ball, put aside and add nuts, vanilla, and chocolate.

When you need automatic feed processing, you need a total system.

We're total.

A Mix-Mill Farm Feed Factory is the "TOTAL" system for automatic-feed-processing. It comes in a variety of capacities to meet your individual requirements. For example, our overhead grain holding bins range in sizes of 12 to 400 ton capacities. Our automatic mixer/grinder is available in hammer mill or roller mill with 5, 7½, 10 or even 20 horsepower.

There's a wide range of optional equipment, too! Grain Bins, bulk tanks, bucket elevators, grain roasters, and auger systems, to name a few.

Your Mix-Mill Distributor is the place to go for automatic feed-processings. Whether you make three (3) tons of feed a week or 400 tons or more everyday, there's a total Mix-Mill system just for you.

For more information on a total labor/cost savings system, use this coupon today!!

600 women to meet Pa. legislators

ARRISBURG, Pa. - he 600 women from ind the state will gather Harrisburg on March 22, meet their state islators and discuss rent legislative issues at Ninth Annual Women's islative Exchange ference.

ponsored by the Pennivania Women's islative Exchange, the day meeting will be held 0 a.m. to 3:30 p.m. at the t Inn.

Keynote speaker will be T.V. newscaster Karen Stone, co-anchor of "The People's Business," a Pennsylvania Public Television Network legislative issues program. Marie R. Keeney, director of the Pennsylvania Commission for Women, is the luncheon speaker. Stone will discuss the conference theme, "Great Expectations," and Keeney will give an update on implementation of the State Equal Rights Amendment.

Conference delegates will meet informally with legislators during a coffee hour at 8:30 a.m. Legislators will also participate in a series of workshops during the morning session. Topics include cable television, tax reform, juvenile justice, homemakers' rights, teenagers and family planning, funding for women's programs, mental health - mental retardation, education and health system agencies.

Organizational caucuses and films will be featured in the afternoon session.

According to conference coordinator Carline Hack, the conference "provides an opportunity for a diverse group of women to get information on legislative issues important to them, and to plot strategy for influencing resolution of those issues."

The Women's Legislative Exchange is a coalition of 17 state - wide groups which monitors the State Legislature and informs its various members of relevant actions. Exchange sponsors include: American Association of University Women, American Civil Liberties Union, Church Women United in Pennsylvania, Community Services of Pennsylvania, Diocesan Council of Catholic Women, Family Planning Information Office, Junior Legue of Harrisburg, League of Women Voters of Pennsylvania, National Council of Negro Women, National Council of Jewish Women, Pennsylvania Association of Hospital Auxiliaries, Pennsylvania Catholic Conference, Pennsylvania Commission for Women, Pennsylvania Federation of Business and Professional Women's Clubs, Pennsylvania Federation of Women's Clubs, Pennsylvania Home Economics Association and Pennsylvania Women's Political Caucus.

My Thoughts

And welcome to them

By JOANNE SPAHR
Associate Editor

Ham, roast beef, corn, peas, red beets, potato filling - their taste bud-tingling aromas steamed up through my nose as the dishes streamed right by my plate, and unfortunately within my reach. My stomach and my taste buds yelled out, "Take a helping - take two helpings," and my conscience was too weak from the beating I'd been giving it over the past three weeks to even offer a slight bit of resistance. So, in a matter of a few seconds my plate was overflowing.

"Oh, no," I thought to myself, "this is going to be another 'sit-and-grimacefrom-the-too-full-feeling' type of night - the kind of occasion that my father describes as making him feel like a fat steer.

Oh, how well I knew what a steer must feel like. You would think that after 10 farm-related banquets in three weeks I'd know how to control myself before things got out of hand. But, farmers really know how to eat, as the saying goes, and I can keep up with the best of them. And, like I said, I'd given my conscience such a bad beating through the chain of banquets, that it was too weak to be of any service. So, I always overate.

As I forked in the food that night, paying close attention to each scrumptious bite I took, I heard the woman across from me say, "This banquet is for swine producers, not pigs."

I stopped in mid-chew, and my plate came into focus. There was a kernel of corn laying under the rim of the plate (when I said I heaped it to overflowing, I wasn't kidding), and I took notice from the missing potato filling that I had managed to polish that off in short order.

Redfaced, I attempted to swallow the last bite I'd taken, which had turned to rock, and tried to think of the most dignified way to get out of this one. But, dignified I couldn't be. The best I could do was peek out from under my bangs as I hung my head in shame.

When I did, the weight of embarrassment was lifted right off my shoulders, and miraculously, my appetite returned.

She hadn't been talking to me, afterall. Instead, she had been trying to put the reins on the amorous appetite of her husband, who I, myself, had to marvel at. After heaping his plate higher than mine the first time, he had heaped it twice, and was going for a third time around.

"Heck, I'm still hungry," he said, paying no attention to her words of reproach.

I really admired him. He was enjoying his food and he didn't care what anybody else said. I went back to my goodies and started up with a new zest for food, when I over heard, "Boy, you're going to get fat."

I gave up.

Saturday, March 26
Lancaster County Society 28 meeting for a progressive supper with husbands at 6:30 p.m.

Preplanned meals save energy

There are more ways to conserve energy at home than just turning down the thermostat. By pre-planning meals several days in advance, you can reduce the amount of energy that goes into cooking. You'll save not only money but time.

If you're going to use your oven, plan a complete oven meal, plus a few extras if there's room. A roast, baked carrots, baked or scalloped potatoes, and apple crisp can all be prepared at the same time. Just jot down when each item should go into the oven so that everything is ready at dinner time.

While the oven is being used, bake some rice pudding, banana bread or other dish that can be served cold the following day. You'll save energy, and meal preparation will be simpler.

Prepare double or triple the quantity of food you'll need for one meal, then refrigerate or freeze the extra portions. Meat balls, spaghetti sauce, an extra meat loaf or several loaves of bread in the freezer can cut back on total energy used as well as save time in future meal preparations.

Methods of cooking also affect energy use. Some frozen foods, such as vegetables or macaroni and cheese, can be thawed before cooking so that they'll require less cooking time. However, such items as frozen pies will have soggy crusts if thawed first.

Preheating the oven also wastes energy, and isn't always necessary. Preheating requires up to 28 per cent more energy used during the cooking period. Cakes, pies and other similar items do need a preheated oven, but most meats and vegetables do not.

Prolonged low-temperature roasting at 185 F. uses up to 56 per cent more energy than shorter roasting periods at a temperature of 325 F.

Home economists suggest cooking as the Chinese do, using thinly sliced ingredients cooked for a short period of time You'll save time, energy and nutrients. Take it one step further and eat more fruits and vegetables raw.

Finally, your choice of cooking equipment is important in conserving energy. Consider these study findings from the Pacific Gas and Electric Co. of San Francisco:

1.) A small eye-level oven saves 25 to 50 per cent more energy in comparison to the large lower oven, depending on temperature and cooking time.

2.) Microwave ovens use 30 to 70 per cent less energy than regular ovens when reheating or cooking in small quantities. When cooking a complete meal in a microwave oven, each item must be cooked individually. Therefore the energy consumption is 28 to 130 per cent more than if all items were cooked at one time in a range oven.

3.) Continuous - cleaning ovens use up to 22 per cent more energy than self - cleaning ovens, depending on temperature and cooking time.

4.) Pressure cookers reduce cooking time and save 28 to 42 per cent more energy than cooking in a saucepan on top of the range. This applies to foods requiring steaming (puddings), simmering (corned beef), braising (less tender cuts of meat) and stewing (chicken).

5.) Crockery or slow cookers use more energy than other types of surface cooking. A higher temperature for a shorter cooking period uses 12 to 22 per cent less energy than a lower setting for a longer cooking period.

6.) Portable ovens, frypans, and broilers (in most instances) can save from 9 to 44 per cent energy when baking or broiling in small quantities.

7.) The gas pilotless ignition system saves approximately 40 per cent energy consumption.

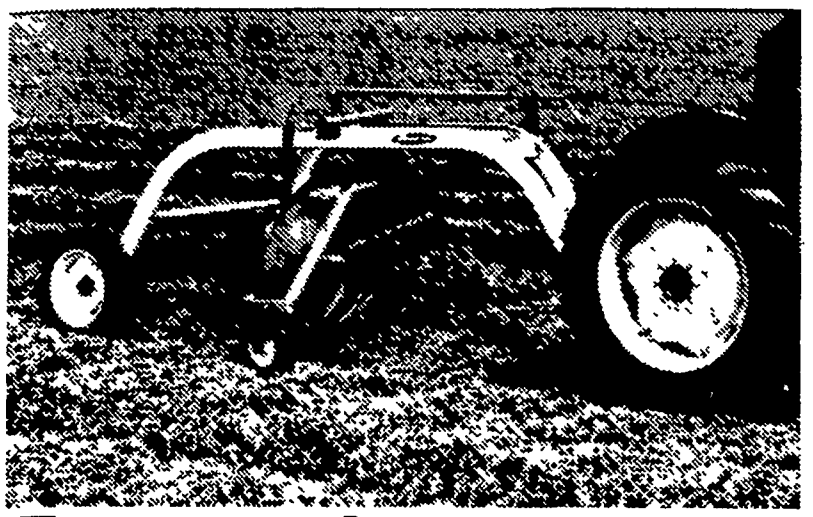
New Idea's Belt Rake

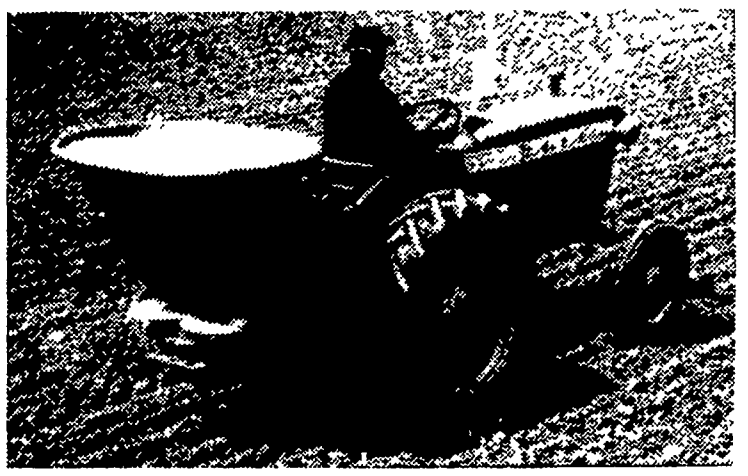


For turning over a new leaf...gently

Steady, positive, clean raking without noisy clatter! This is what you get with the Avco New Idea belt drive rake Exceptionally clean raking and minimum leaf shattering are the result of the constant ratio between reel speed and forward travel. The smooth, lifting rolling action of the tooth bars builds uniform fluffy windrows . . . windrow fluffiness can be varied by tilting the basket. Long lasting optional rubber Flex-joint teeth available. And, for raking over rough terrain, there's an optional guage wheel that fits on the frame end.

New Idea's Fertilizer Spreaders

Covers an acre in less than 3 minutes



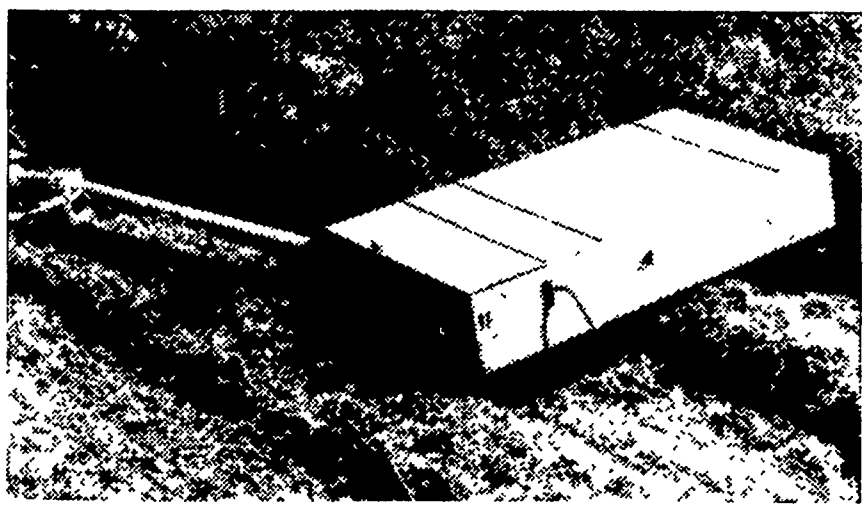
With New Idea's compact, efficient 3-point hitch twin spinner spreader you can broadcast a 39-foot wide uniform pattern. And at a rate of 200 lbs. per acre, cover an acre in less than 3 minutes. Spread pelleted, granular and semi-granular fertilizers—plus many varieties of seeds—quickly and economically. Optional equipment for band spreading, for use in vineyards, in orchards. Built-in tow plate permits you to pull a harrow while spreading or trail a wagon of fertilizer to the field. Fast, easy for one man to attach or remove from most Category I and II 3-point hitch tractors.

AVCO NEW IDEA FARM EQUIPMENT

We make your job a little easier

Costs hundreds of dollars less...unsurpassed in heavy, down, tangled hay...

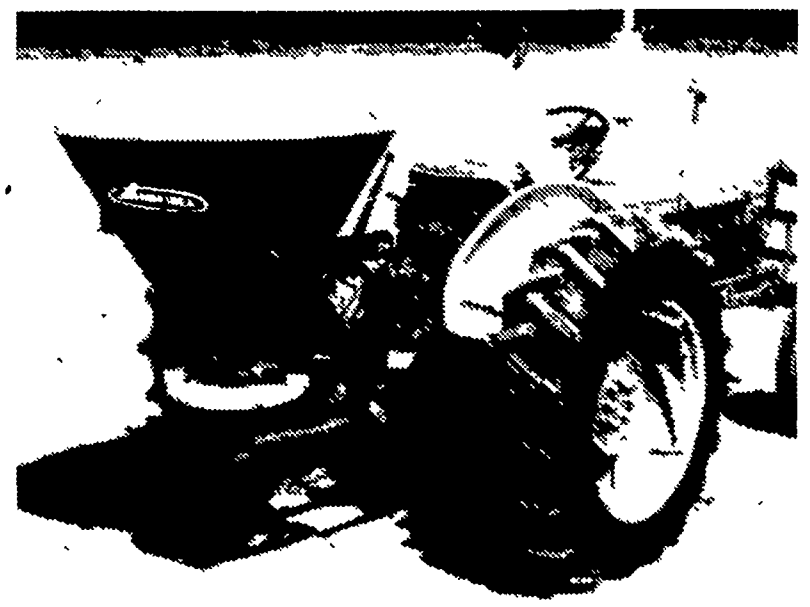
Cut/ditioner



It's a simple machine, with fewer moving parts. Cuts 7-feet wide. Conditions. Makes windrow or swath. When you can't cut hay with a sickle bar, Cut/dition it! Non-stop. Plug-free.

New Idea's Fertilizer Spreaders

ECONOMICAL SPREADING... up to 36 ft. wide!



New Idea's economical single spinner spreader-seeder does a fine job, fast and accurately Its six adjustable steel blades on a single spinner give an effective spread width up to 36 feet It has a 690 lbs (8.5 bu) hopper capacity, and is easy to mount on 3-point tractors Can be cleaned easily, too. Come in and see it

SEE DEALERS ON OPPOSITE PAGE.

Ag Day to be highlighted in York Mall promotion

YORK, Pa. - American Agriculture Day 1977 should prove to be the biggest day of national recognition ever organized for the farmer, rancher and grower in the United States, and the York County Farmers' Association Women's Committee will share in the celebration with exhibits, live animals free drawings for food and their own brand of farm philosophy at the York Mall Friday and Saturday during shopping hours.

The objective of Ag Day, officially slated March 21, is to heighten the interest in and understanding of agriculture and agricultural producers among the urban consumer public.

"We want to give the local food buying public opportunity for a better understanding of what the industry of agriculture has done and must continue to do to maintain the abundance of food in America," stated York County coordinator Gail McPherson.

The displays of the women's committee will cover the whole gamut of York County's productivity showing the importance of agriculture in the economic and nutritional schemes of American society.

Included on planning groups for the Mall extravaganza are women from dairy, beef, poultry, lamb, apple, peach, pork and potato industries in the county as well as Pennsylvania Department of Agriculture displays covering cherries, apples, and mushrooms.

"Milk is a Natural" theme will be represented. In addition to free milk samples provided both days by Green's Dairy, the county dairy princess will hand out cheese slivers each evening.

A live baby calf will spend time in its special crib from Rutter's Dairy to delight children. Also, containes showing the amount of feed to produce a day's supply of milk will be handy for an eye-opening illustration. Door prize drawings will be given for free ice cream each day.

One Esskay Premium Ham will be given away in drawing by the pork committee who have chosen "Pigs is Beautiful" as their theme. The new leaner, more nutritious pork line will be featured in recipe booklets for weight watchers, and information on nutritional values will be available.

The women will also be soliciting participation in the "Pork Cookout King Contest" to be held in the Fall at the York Fair by York County Pork Producers.

Ailean Detter will sport her famous "Ham" suit with the various cuts deliniated on her jumpsuit and have information on the Jamers Beard Woman's Day Recipe Contest featuring pork this year. Two baby pigs will romp in their special play pen for children's delight. Also a movie of pork will be shown as interest requires.

The American Beef mascots Toby and T-Bone will be introduced to youngsters via the beef committee.

This group will depict the feed necessary to move a young calf to market weight and show the salable cuts produced from the animal. A drawing for beef will also take place.

The multipurposes of lamb will be shown through slides and sheep skin hangings. Poultry will also be represented by the York County poultry queen. Also with poultry, live chicks will break through their shells under a plastic dome incubator for all to see. Egg recipes and ways to use egg shells will be displayed.

P.A. Spud will be spokesman for the potato growers of York County. This stuffed potato bag will expound on the do's and don't of using potato products, backed up with Potato Board facts and nutritional brochures. Free potatoes will be given from a drawing each day.

The story of Johnny Appleseed will play continuously before the Pa. Department of Agriculture display featuring the many fresh and processed apple products available from county orchards. A slide show entitled "The Peach Story" will show the complete production process of growing peaches for the market provided by National Peach Council. Drawings for a cookbook and some fruit will also be conducted

These and many other items including the average farm investment figures on a three-dimensional lay-out complete with equipment and buildings and a nutritional and cartoon display by Nancy Blevins promise to make the York County Ag Day colebration an informative and rewarding experience for everyone.

Weight workshop offered

UNIVERSITY PARK, Pa. - If you have a problem keeping your weight under control, you will be interested in the workshop sponsored by the Schuylkill County Cooperative Extension Service on April 5th beginning at 9:30 a.m. to 4:45 p.m.

Dr. Henry Jordan, director of the behavioral weight control program at Philadelphia's University of Pennsylvania Hospital, will be explaining and demonstrating the techniques used to modify food attitudes which is the key to a good weight control program.

The behavior therapy program is based on the fact that biological approaches to weight loss such as diets, pills, and starvation don't keep the fat away. Dr. Jordan is well qualified to conduct such a workshop. Along with a long list of accomplishments he has co-authored the book, Eating is O.K.

An evening session beginning at 7:00 p.m. will be held for persons working with the obese person, such as nurses, dietitians, home economics teachers, etc.

Registration for the workshop will be necessary. To register, write Mrs. Ruth M. Hand, Extension Home Economist, Schuylkill County Extension Service, P. O. Box 404, Schuylkill Haven, Pa. 17972; telephone - 385-3431. Registrations must be in by Friday, March 25th. There is a registration fee of $5 for the day session, and a $3 fee for the evening program.

Farm Women Societies

Berks Co. Society 1

The March meeting of the Berks County Society of Farm Women Group 1 was held at the home of Mrs. Linda Levan, Oley R1, with 20 memebers attending.

The entertainment for the meeting was the showing of antiques. Lens Eyrich, a member of the group, discussed with the members the type and value of the antiques she had brought to the meeting.

The members will be having the refreshment stand at the Reifsnyder's sale on April 9.

On March 28 the group will be selling homemade Easter candy, cakes, and pies in the lobby of Boscov's East.

The Spring Rally will be held at Memorial Hall, York County on May 11 Starting at 10:30 a.m.

Berks Heim bingo party will be on April 14 and their tea is going to be held on May 11.

Chester County Convention will be on April 12.

The April meeting will be held at the home of Mrs. Martha Levan, Oley R. D. 1 on April 13 at 8 p.m.

Berks Co. Society 4

"The Art of Safety" was the title of the program given at the March meeting of the Berks County Society of Farm Women Group 4 held in the home of Mrs. Taylor.

Slides on the safe use of electricity were presented by Philadelphia Electirc Co., and later disussed.

Berks Co. Society 8

The Berks Co. Society of Farm Women Group 8 met recently and toured the Shartlesville Craft and Gift shop. After the tour, they met at the home of Mrs. Joyce Deisemann.

The group will make ham-on-a-roll sandwiches on April 2 at the Strausstown Fire Hall. Orders will be taken at the next meeting.

The group gave a monetary donation to the David Hauseman family of Oley R1 who lost their home in a fire.

The Berks Co. Society of Farm Women will have a hoedown at the Hamburg Field House on April 23 from 8 to 11 p.m. The public is invited. The proceeds will go to the Hamburg Center. The next meeting will be a plant demonstration, the group will leave Way-Har Dairy Store at 7 o'clock and Larry's Texaco in Bernville at 7:10 for Reading.

Lancaster Co. Society 14

Lancaster County Farm Women Society 14 met at the home of Mrs. John L. Hershey for their March meeting. Jolande Bensenk, an exchange student from Gossel, Holland, showed slides and answered questions about her country. Miss Bensenk is hosted by Mr. and Mrs. Charles Bloom and is a student at Lampeter Strasburg High School.

Chairwoman, Mrs. Paul Hostetter, announced that Society 14 will cooperate with the women of the Paradise Mennonite Church in handling a soup and sandwich table at the Water Street Rescue Mission's Auxillary Fair on June 4 from 12 noon to 9 p.m. On March 17 the Society will visit Conestoga View and play bingo with guests.

The next meeting will be held on April 13 at 1:00 p.m. at the home of Mrs. Robert M. Esbenshade, Paradise.

Lancaster Co. Society 19

Lancaster County Society of Farm Women 19 held their monthly meeting in the home of Mrs. David Yoder with Mrs. Harold Saylor presiding.

On March 10 nine of the Society members spent the day at the Lancaster General Hospital.

The group received an invitation to visit Society 31 on April 18 at 7:30 p.m. at the Mechanic Grove Church of the Brethren.

A contribution of $15 was given to the Easter Seals campaign.

The program for the afternoon was a demonstration of Ukranian Egg Dying (Pysanky) by Mrs. Lois Seith. This folk art - more than 10 centuries old -p is being revived all over the country.

A program on safety is planned for the next meeting to be held on April 2 at the home of Mrs. Mary White, 72 Highland Drive, Lancaster.

Lancaster Co. Society 21

Lancaster County Farm Women Society 21 met at the home of Mrs. Charles Ambler, Quarryville, on March 10.

Mrs. Sally Sture, chairman of CONTACT, spoke and answered questions about the agency. CONTACT is a 24-hour phone ministry for persons who have problems or are lonely and need someone to listen to them.

The Society will be entertained by Society 2 on April 9 at 1:30 p.m. at the Salem United Methodist Church, Manheim.

Lancaster Co. Society 22

Members of Lancaster County Farm Women Society 22 and their guests from Society 10 had the opportunity to take an arm-chair trip around the world as they listened to the travel experience of Mrs. Mary Denlinger.

Mrs. Denlinger used souvenirs and referred to her daily diary to help the Farm Women enjoy her 35,000 mile trip which lasted seven weeks. From delicate silver she brought from India to an inlaid marble dish from Egypt, the lovely hand - crafted items told much about the culture of the countries.

A "fashion" show featuring the very latest in couture castoffs was a highlight of the meeting held at the Willow Street United Church of Christ.

Plans were discussed for traveling to the state hospital to entertain patients there, and a donation was given to the Easter Seals Society.

A safety program will be held at the monthly meeting on April 12 at 7:30 p.m. at the home of Mrs. Robert Houser, 436 Beaver Valley Pike, Lancaster. Mrs. John Harnish, 1036 Beaver Valley Pike will be co-hostess.

Lebanon Co. Society 5

Lebanon County Farm Women Scoiety 5 held their March meeting at the home of Mrs. Ruth Geesaman, Fredricksburg R1. Nineteen members attended.

The business meeting was conducted by Mrs. Minerva Lentz, president. The Spring rally will be held at the York Fair Grounds on May 11, 1977.

The group voted to give $10 to the Heart Fund. It was announced that the Homemakers Seminar will be held at Hershey on April 21.

The program consisted of two book reports.

The April meeting will be held at the home of Mrs. Luetta Graybill, Jonestown R1. For the next meeting, each member was instructed to visit a shut-in and report about it at the get-together.

Over the years, one thing about Mol-Mix never changed.

Quality.

From the first day that Mol-Mix® was made, the people at National Molasses made it with quality ingredients . . . because they knew a better-quality supplement would mean **more net profit** for the cattlemen who used it.

Today, instead of decreasing or eliminating these quality ingredients because of shortages and higher costs, Mol-Mix has maintained the same level of quality that has made it the liquid leader.

BUFFERED RELEASE IS JUST PART OF OUR QUALITY STORY

Occasionally, somebody finds out about one of our unique features and gets really excited about it. For example, our **buffered release of urea ammonia,** heralded by other supplements as a brand-new innovation, **has been in Mol-Mix for years** to improve its protein-building efficiency. And our performance-proven ingredients, like corn distillers solubles, condensed fermented corn extractives, phosphoric acid, and ammonium polyphosphate, have yet to be included in most other supplements!

Stop in soon. We would like to demonstrate the dramatic results that Mol-Mix can bring to your herd in terms of performance and profits. We're not talking about something that will only add to your supplement costs . . . we're talking about the bottom line.

Mol-Mix® liquid supplements

On March 9 DeKalb held a poultryman's regional mini seminar at the Good 'N Plenty Restaurant, Smoketown. This seminar was a follow-up of a "super seminar" held in Chicago in October. During that meeting, the 100 industrymen who attended were familiarized with DeKalb's commitment to research, their facilities and products, as well as DeKalb's research on layer pathology. Six speakers were featured during the five-and-a-half hour seminar, and they are pictured above. From the left they are: Larry Kendrick, Bob Scott, DeKalb Ag Research; Ike Risser, appointee to the American Egg Board from Harrisonburg, Va.; Dr. Reed Rumsey, DeKalb Ag Research; Carl Brown, Production Credit Association; and Bill Markey, Melhorn Service Company.

e chapter award winners from Elco FFA chapter are: (left to) Kirby Horst, Star Chapter ner; Susan Heilinger, Star Greenhand; Stacy Woods, Star Chapter Farmer; and Patrick Arnold, Star Agri-businessman.

Girls doing fine in ELCO FFA chapter

By JOANNE SPAHR

MYERSTOWN, Pa. - The Eastern Lebanon County Future Farmers of America parent - member banquet held last Tuesday evening in the ELCO middle school cafeteria had a definite feminine flavor to it. Not only is there a large number of women in the orgaization, but the president, Star Greenhand, Star Chapter Farmer, and other award winners are young ladies, as well.

So, when Ruby Bollinger, (formerly Ruby Ginder), one of three state FFA officers taking part in the ceremony, spoke to the group encouraging all girls present to run for state office, she had a lot of ears tuned to what she was saying.

The two other state officers present were Herman Manbeck, Womelsdorf, chaplain, and Earl Geib, Manheim, regional vice president, who both gave brief remarks.

This year six honorary members were inducted into the organization as a token of appreciation for the services they provided for the group. Those individuals were Mr. and Mrs. Luther Mathias, Richland; Mrs. Robert Martin, Schaefferstown; Mr. and Mrs. Irvin Horst, Newmanstown; and Larry Moyer, chapter advisor.

According to Moyer, the most coveted awards of the evening included the Star Greenhand, which went to Susan Heilinger, Newmanstown; Star Agri-businessman, bestowed on Patrick Arnold, Schaefferstown; and Star Chapter Farmer given to two individuals - Stacy Woods, Newmanstown, president of the chapter, and Kirby Horst, Newmanstown. Miss Woods also received the leadership plaque for her role as president in the organization; and Horst received the scholarship plaque as well as the Dekalb award.

Proficiency and Foundation awards were also bestowed as part of the ceremony. Proficiency award winners were: Mark Bucks, swine production; Andrea Dechert, horse proficiency; William Bennetch and David Wenger, gasoline engines; Vincent Arnold, record keeping; Kirby Horst, Soil judging, Jeff Umbenhaur, ag mechanics; and Stacy Woods, dairy calves and public speaking.

Foundation awards were given to: Jere Hurst, crop production; Dennis Umberger, swine production; Stacy Woods, public speaking; Vincent Arnold, and Kirby Horst, dairy production; Jere Hurst, beef procution; Eugene Hoffman, crop production; Andrea Deckert, horse proficiency; Erwin Daub, placement in sales and service; Jeff Umbenhaur, ag mechanics; Joan Tice, ag processing;

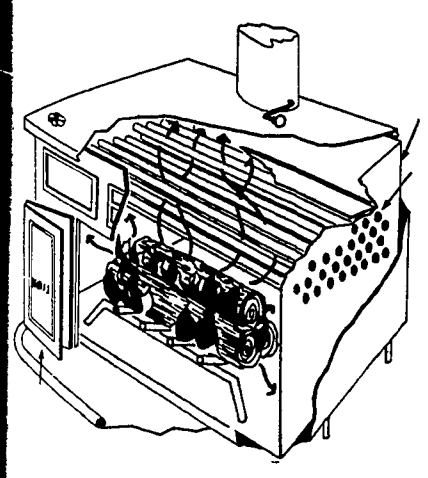
A **Hydro-Heater Franklin** will cut your fuel costs...
Can heat your whole house, even when it's zero outside!



A 1¼" water jacket surrounds the fire on back, sides and bottom. This allows you to place the Hydro-Heater Franklin within 6" of any wall or partition, because the outside temperature never exceeds 210°.

Directional flow tubing captures the heat that is normally lost up the flue. 65% of the heat collected in Hydro-Heater is absorbed by the tubing section. This heat is then transferred to your existing heating system.

AVAILABLE ARE HOT WATER HEAT EXCHANGERS FOR DOMESTIC HOT WATER SYSTEMS.

lso Available Are Fireplace Units

A **Hydro-Heater Franklin** gives you a 300 to 500 per cent increase in heat output over normal Franklin-type stoves. In fact, you get a 175,000 BTU output with a **Hydro-Heater Franklin!** And with a Hydro-Heater, you don't put up with the "freeze or fry" situation experienced with ordinary Franklin-type stoves. That's because Hydro-Heater transfers its heat to your existing home heating system to warm every room in your house. Why settle for just any conventional wood-burning stove when you can have a beautiful, efficient **Hydro-Heater Franklin.**

Lorne Detter, Dover R1, left, past president of the Dover Young Farmers, congratulates the incoming officers. Others from left are: C. Fred McGhee, Dover R4, incoming president; Fred Hotchkiss, Dover R5, vice-president; Clark Dalheimer, Davidsburg Road, Dover, secretary; Crist Shearer, Dover R4, treasurer.

Dover Young Farmers name officers, contest winners

By JOYCE BUPP
York Co. Reporter

DOVER, Pa. - Two hundred farmers and their families, as well as representatives of area agribusinesses, turned out on March 8 at the Dover Fire Hall for the Dover Area Young Farmers' Annual Banquet.

During a brief business meeting, officers were elected for the 1977-78 term of office. Newly - elected president is C. Fred McGhee, Dover R4. Fred Hotchkiss, Dover R5, will serve as vice -president. Secretary is Clark Dalheimer, Davidsburg Road, Dover, and treasurer is Crist Shearer, Dover R4. John Alcorn, Dover, was chosen to fill the news reporter position.

New zinc increases wheat yields 10-20%

Allied Chemical's new zinc material—NZN,® can do remarkable things for your wheat When combined with URAN® nitrogen solution for wheat topdressing, NZN can boost wheat yields 10 to 20% over URAN alone.

NZN is a more responsive zinc It gets results even in areas where other zinc materials have been unprofitable

And it doesn't take much NZN, or much of an investment either NZN is probably the most efficient zinc on the market today

Prove to yourself how profitable a little NZN can be. Topdress some wheat with NZN and URAN Compare against URAN alone We're convinced you'll wish all of your wheat had been topdressed the more profitable way with NZN and URAN from us, your ARCADIAN dealer

Dover Young Farmer advisor, John Traver, center, presents trophies to the top winners in two chapter competitions. Lester Luckenbaugh, Spring Grove, on left, was named Champion Corn Grower for 1976. Ashcombe Dover Dairy, Dover R5, placed top in the Hay and Forage Show. Accepting their trophy is Wayne Shumaker, right.

Young Farmers

[Continued from Page 66]

Winners of the chapter's annual hay and forage show were announced by Advisor John Traver. The grand champion trophy went to Ashcombe Dover Dairy, and numerous ribbons were presented to the winners in the various classes.

Corn contest winner for 1976 was Lester Luckenbaugh, Spring Grove, with the top yield of 166 bushels per acre.

The evening program featured a two-fold slide presentation by Lorne and Ailean Detter, Dover R1. Opening portion included flashback pictures of Young Farmer events held during the past year. Among he activities were several tours to area points of interest, a summer forage day at the farm of Clair Myers, family picnic and a Halloween party. Detter is the immediate past president of the group.

During the second portion of the slide program, the Detters presented a narrative of their trip through several countries of Europe last March.

The visit began in Holland, where one highlight was a stop at an Amsterdam flower market, covering 40 acres and selling nothing but cut flowers. Blooms purchased there early in the morning of sale day can be found in United States flower shop windows on the afternoon of the same day.

The Detters told of how much of Holland's farming area has been reclaimed from the sea. After building dikes, the water is pumped out, leaving a mixture of 20 per cent sand and 80 per cent water. A grass crop known as "riet" is planted, left for seven years and then burned off, leaving rich arable land.

While touring Denmark and Sweden, the Detter's were impressed with the picturesque thatched - roof houses. Once the mainstay of the Scandinavian housing industry, today only the wealthy can afford the old - style homes, because of the very high costs of fire in surance on the structures.

And, even though the fresh fruit in Denmark looked delicious to Ailean Detter, she decided to forgo eating bananas while visiting. They were selling for 90 cents per banana.

The list of winners of the hay and forage show are as follows:

Timothy Hay

1. Philip Laughman, Thomasville R1; 2. Joseph Stump, York R10; 3. Paul Jacobs, Davidsburg Road, Dover; 4. Crist Shearer, Dover R4; 5. William Livingston, Colonial Road, Dover.

Alfalfa Hay - 1st Cutting

1. Joseph Stump, York R10.

Alfalfa Hay - 2nd Cutting

1. Ashcombe Dover Dairy, Dover R5; 2. Joseph Stump, York R10; 3. Paul Jacobs, Davidsburg Road, Dover; 4. Philip Laughman, Thomasville R1; 5. Philip Laughman, Thomasville R1.

Alfalfa Hay - 3rd Cutting

1. Joseph Stump, York R10; 2. William Livingston, Colonial Road, Dover; 3. Crist Shearer, Dover R4; 4. Charles Rauhauser, Admire Road, Dover; 5. Wayne Myers, Dover.

Mixed Hay- 1st Cutting

1. Wayne Myers, Dover; 2. Philip Laughman, Thomasville R1; 3. Paul Jacobs, Davidsburg Road, Dover; 4. Crist Shearet, Dover R4; 5. Joseph Stump, York R10.

Mixed Hay - 2nd Cutting

1. Glenn Myers, Dover; 2. Ralph McGregor, East Berlin R1; 3. Roy Berkheimer, Harmony Grove Road, Dover; 4. Wayne Myers, Dover; 5. Roy Berkheimer, Harmony Grove Road, Dover.

Corn Silage

1. Ashcombe Dover Dairy, R5; 2. Joseph Stump, York R10; 3. Ralph McGregor, East Berlin R1; 4. Wayne Myers, Dover; 5. William Livingston, Colonial Road, Dover.

Grass Silage

1. Joseph Stump, York R10; 2. Ralph McGregor, East Berlin R1; 3. Ashcombe Dover Dairy, Dover R5; 4. Charles Rauhauser; 5. Ashcombe Dover Dairy, Dover R5.

High Moisture Grain

1. Joseph Stump, York R10; 2. Ralph McGregor, East Berlin R1.

and Stacy Woods, poultry production.

County record book honors went to Patrick Arnold, Joan Tice, Doug Troutman, Vincent Arnold, Andrea Dechert, Stacy Woods, Kirby Horst, Jere Hurst, Dennis Umberger, and Eugene Hoffman.

Harvey Smith, regional consultant for the FFA, handed out the state project book awards as well as those for state band. In the project book contest on the state level, Patrick Arnold won silver and gold medals; Vincent Arnold won a silver; Stacy Woods took a gold; and Kirby Horst took a silver.

Three young ladies were involved in state band this year and were honored by Smith for their participation. Those individuals were: Susan Heilinger, Tammy Hess, and Sue Ritchie.

After the conclusion of the awards ceremony, a slide presentation capped the evening.

Greenhouses needed for bean beetle program

COLLEGE PARK, Md. - If you own a greenhouse in Maryland of any size with empty space for a 90-day period between now and the end of June, the University of Maryland and the state Department of Agriculture would like to get in touch with you.

You can earn rental fees, acquire natural insect parasite protection for your Summer garden and perform a public service for soybean growers in southern Maryland and the Eastern Shore by participating in a program of rearing parasitic wasps to help combat the Mexican bean beetle.

Greenhouses for this program can be located anywhere in Maryland from Frederick County eastward, according to Dr. Galen P. Dively, Extension entomologist and insect pest management specialist at the University of Maryland in College Park.

Portions of large greenhouses will be okay under some circumstances, Dr. Dively said, as well as small hobby greenhouses belonging to homeowners or 4-H members. High school greenhouses would also work.

Contractual arrangements will be made with the state Department of Agriculture, which rears the parasitic wasps under an inter - agency arrangement which went into effect last year. The Cooperative Extension Service at the University of Maryland will supervise distribution of the parasites on farmers' fields.

For futher information, contact your local Maryland county agricultural Extension agent, or call Dr. Dively's office at College Park; phone: (301) 454-3845. He is located in 1304 Symons Hall on the University of Maryland campus.

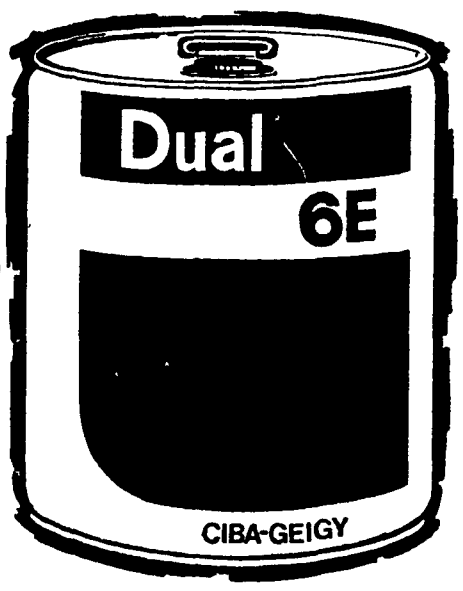
NEW Dual®



Better Nutsedge Control

New Dual herbicide controls yellow nutsedge (northern nutgrass) in corn, without special rates or application methods.

In a tank mix with AAtrex® 4L, you'll control broadleaf weeds as well as annual grasses and nutsedge.

And rates are low. Tank-mixed with AAtrex 4L, a 5-gallon can of Dual covers 20 acres where other grass killers cover 10 to 13 acres per can. Yet, yellow nutsedge control is *better* with Dual.

Another plus for Dual — it stays active longer so you have fewer weeds breaking through during the season.

Dual ® trademark of CIBA-GEIGY for metolachlor
AAtrex ® trademark of CIBA-GEIGY for atrazine

An open letter to the farmers of 1976 Federally declared disaster areas:

Massey-Ferguson Inc.
1901 Bell Avenue Des Moines Iowa 50315

Dear Friend

If you've had to delay your plans to buy needed new equipment because of less than acceptable farm income caused by weather or other adverse conditions Massey-Ferguson may be able to help you

We've authorized Massey-Ferguson farm machinery dealers to provide special financing to help farmers in Federally declared disaster areas buy the machinery they need, when their major source of income has been impaired by the disaster

This unusual MF Machinery-Purchase program also has a provision allowing you to defer payments if your major source of income should fail again and your locale is declared a disaster area in 1977

Why are we doing this? Frankly, when your business suffers we all suffer It's that simple

So if your plans and your future have been greatly altered by circumstances beyond your control, we're ready and willing to help as always Get all the details now about this special program for farmers of 1976 Federally declared disaster areas See your Massey-Ferguson dealer He wants to help you and so do we

Sincerely yours

Massey-Ferguson Inc

TIME TO CHANGE

INTERNATIONAL
HY-TRAN®
HYDRAULIC TRANSMISSION FLUID

Changing your hydraulic fluid regularly is just as important as changing your crankcase oil. A change of Hy-Tran will:
- Remove moisture and contaminants
- Prevent varnish formation

Insist on Hy-Tran, the all-weather fluid that maintains lubrication qualities under extreme loads and halts corrosion throughout the system.

We stock all IH products for your convenience.

HOG PRODUCERS!

Have higher feed prices and lower market hog prices got you down? Are you concerned about how much it costs you to grow a pound of pork? If you are, take a moment to read some facts about the most successful hog feeding program ever developed by Master Mix Research.

DISCUSSION

The primary objective at Feed Research is the formulation of swine feed to produce pork at the lowest possible cost. The protein and energy portions of swine feeds represent 80 - 90 percent of the total feed cost. Therefore, the greatest potential for reducing the feed cost per pound of pork involves protein and energy. The research and development of FARMIX was directed at the protein portion to eliminate excess protein and maintain optimum performance at the same time.

Amino acids are the building blocks for protein in the animal's body. The amino acids are classified as essential and nonessential, but both groups are used for protein synthesis. The pig requires 10 essential amino acids to be present in the feed, but can make the nonessential amino acids. Historically, swine rations have been formulated to meet a certain crude protein level. More recently, total levels of a few essential amino acids, in addition to protein, have been used in formulation. The shortcomings with this type of formulation are: 1) The relationship between crude protein and individual amino acid levels and their availability to the pig are not necessarily in direct proportion; 2) Using a minimum crude protein level to meet the first limiting amino acid (lysine) may result in excesses of some other essential amino acids; 3) Formulation based on traditional protein value will be more volatile in price during periods of rising costs for protein ingredients.

When the above factors were taken into consideration, a new method of computer formulation was developed using the following basis:

1. The requirements for the ten essential amino acids were met and protein levels were disregarded.

2. The requirements for the ten essential amino acids were met according to a certain pattern (balance) to minimize excesses of some amino acids that could be detrimental to performance.

3. The level of Available Amino Acids in various feedstuffs was used in formulation. Total levels of amino acids are determined in the lab whereas Available Amino Acid values are determined with feeding trials.

Available Amino Acid Research

We started with the concept that swine feeds could be formulated on an available amino acid basis. Next came an intensive review of the scientific literature. Much credit should be given the many university and government researchers all over the world for their basic research on the available amino acid content of individual feed ingredients. However, a practical program was needed to supplement this basic research and translate it into usable form

Three years of intensive research, with approximately 9,000 pigs, were required to refine the values for available amino acids. The thrust of the experimental work at Master Mix Research was directed at three areas:

1. Redefine the minimum amino acid requirements of the ten essential amino acids.

2. Determine the amino acid requirements according to a specific pattern (balance). In addition to meeting the minimum amino acid requirements, we found the ratios between certain amino acids to be very critical for maximum performance. A similar example is the importance of Ca:P ratio. The reduction of excessive amounts of some essential amino acids results in improved performance and reduced cost of gain.

3. Determine the availability of each essential amino acid for every major ingredient using the pig as the ultimate judge. Thus a new set of values (available amino acid levels) were developed and used which are different from the total (analytical) values found in the literature.

4. Determine pigs' requirements on the AAA basis.

With this information at hand, the computer formulation of swine feeds on the AAA basis was feasible. Rations formulated on this concept were tested repeatedly against rations formulated on a protein basis. The results were improved performance, leaner pigs and lower cost per pound of gain.

FARMIX Pork Program

FARMIX represents the first application of the available amino acid concept for swine feeds. Some of the advantages of the new method of formulation (AAA basis) realized in the FARMIX program are the following:

1. Excesses of essential amino acids are minimized.

2. Ingredients are evaluated on their true contribution of amino acids for protein synthesis.

3. Performance of the pig is more consistent.

4. The impact of ingredient price fluctuation is reduced because of increased ingredient flexibility.

5. FARMIX is manufactured in crumblized form for more efficient handling, mixing and distribution.

6. FARMIX is a flexible program since only one concentrate and two pacs (Swine Breeder Pac and FARMIX Starter Pac) are required for the entire herd.

The amino acid density in FARMIX was selected to give excellent performance when mixed at the recommended rates. Under good management, the pork producer can expect average daily gains of 1.72 and feed to gain ratios of 3.08 when pigs are fed from 50 pounds to market weight

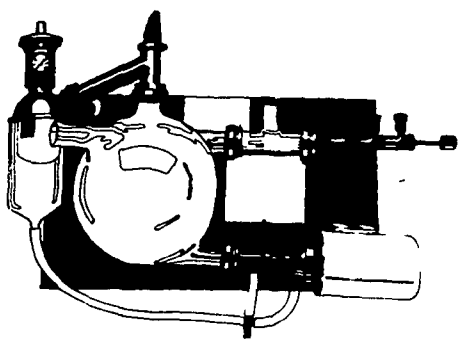
AGWAY

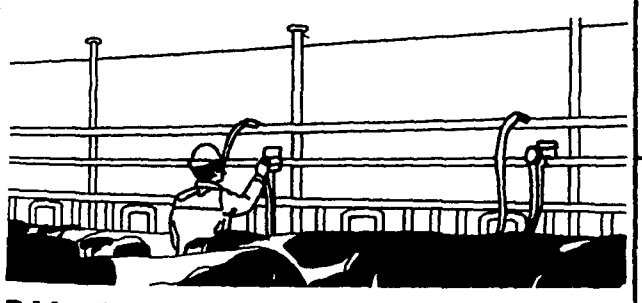
HEADQUARTERS FOR YOUR MILKER SPECIALISTS



The panel with built-in convenience

Universal full-control milkhouse panel

- Easy to maintain, operate and clean
- Controls switch from "milk" to "wash" in seconds for fast, thorough pipeline cleaning
- Automatic self-drain for complete drainage



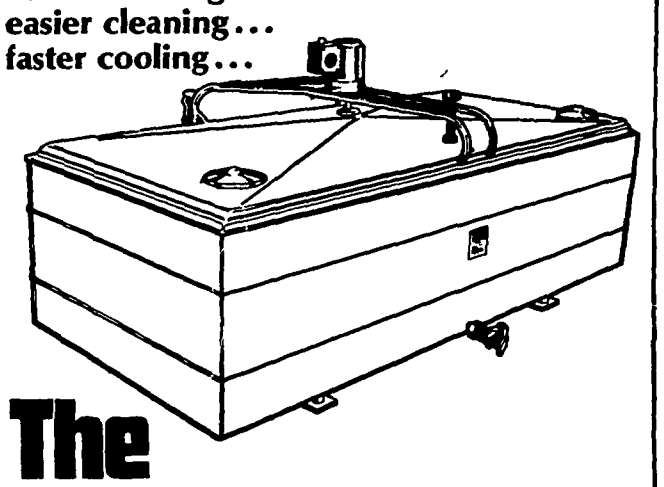
Add milking convenience to your stanchion barn

Agway Pipeline System

The Agway Pipeline System lets you milk without ever making a trip to the bulk tank! Simply plug into the pipeline and vacuum lines at each stanchion and the milk is pumped automatically! Your milk stays fresher, cools faster because it gets to the bulk cooler quickly.

Ask Agway to custom design a system for you.

Lower Pouring... easier cleaning... faster cooling...



The Girton Diplomat

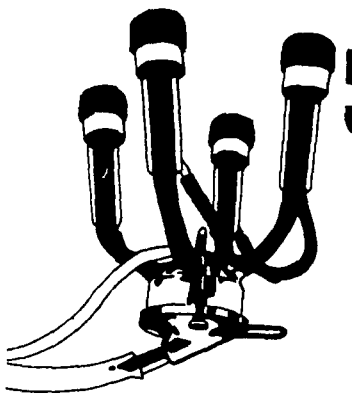
Lower cooling costs.
Recent tests established cooling electrical needs at 0.4 kilowatt hours per 100 lbs.

Faster cooling.
Entire tank bottom is refrigerated for maximum cooling effect. Surge drum is insulated for extra efficiency.

Keeps it cool.
Foamed polyurethane insulation equals 4½" of corkboard on sides and bottom.

Help when you need it.
Qualified service experts throughout the Northeast are always on call.

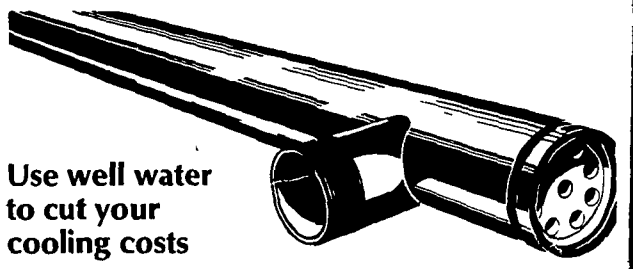
A size to fit you.
Available in sizes from 200 to 1000 gallons... with or without automatic washers.



See precisely when to remove teat cups!

Universal full view milker

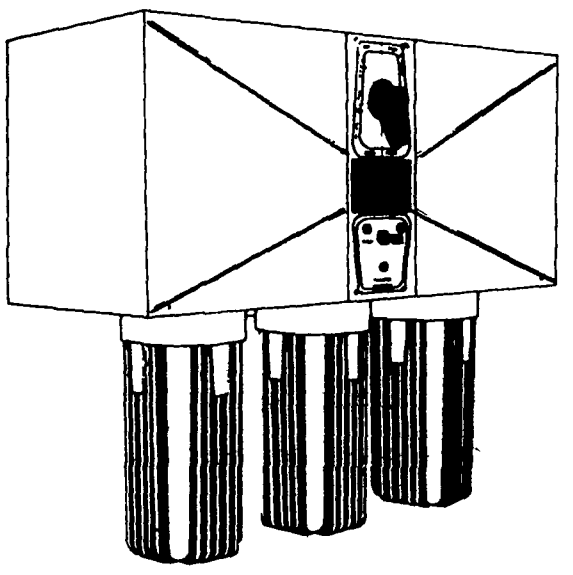
Transparent polysulfone cluster allows you to see milk leaving each teat. You never over-milk because you see milk flow. Large size reduces vacuum fluctuation. Saves time, too.



Use well water to cut your cooling costs

PRE-COOLING SYSTEM by Top Line

Uses your well water to pre-cool milk by 20-25° in the line! Saves money, cuts compressor time in half. Simple, effective, economical.



Get pipelines clean ... automatically!

Universal deluxe full convenience washer

- Can be programmed to sanitize at your convenience before milking
- Sanitizes in just 30 minutes
- Has 3 large chemical dispensers

Federal grain inspection criticized

NEWPORT BEACH, Calif. - America's grain industry must respond vigorously to the economic impact potential of the new Federal Grain Inspection Service, a grain export official said here recently.

Myron R. Laserson, senior vice president, North American Grain Division, Continental Grain Company warned the industry faces "the nightmarish prospect of our unique free market system being regulated to a near halt as costs and distrust mount and our world prestige suffers."

In Laserson's view, however, the prospect can be reversed if "we can convince Congress of what is happening to us."

"Let's regulate what needs to be regulated but let's avoid duplication," he said. "Let the government monitor our controls but not crowd us out of business."

Laserson noted the heavy cost burden which FGIS would place on the industry.

He itemized some major FGIS cost areas, all representing an added financial load to export business, which must be borne by users of the service.

"The exporters cannot absorb this as an additional non-incremental cost of operations. It will find its way back to the producer in most cases."

According to Laserson, the United States - in calendar 1976 - exported 3.56 billion bushels of grain and oilseeds, of which 2.76 billion bushels or 77½ per cent left from those port areas which are being federalized.

"Only 22½ per cent . . . 800 million bushels . . . were shipped from those 10 states which are still able to officially inspect and certify export grain."

He said the 2.76 billion bushels, at an added ½ cent a bushel cost for federal inspection and weighing supervision, would require an additional $13.8 million annual outlay. Federal supervisory costs for the 10 states still doing business will be another $1.25 million, based on announced fees totalling $1.50 per 1,000 bushels.

Add to this possible costs of extra personnel - as may as 5 to 8 persons per eight - hour shift, depending on elevator configuration, Laserson continued.

Another element of cost: increase in FGIS manpower to 2,800 from the present 450 - will increase the total cost to the industry by $70 million.

New levels of capital spending for enlarged laboratories, revisions to sampling systems, surveillance equipment, etc. will require an additional commitment of $15-20 million nationally.

"Our company," said Laserson, "is budgeting nearly $1.5 million in the next year alone for such projects. .all at government request."

The imponderables, stemming from added costs of possible slowdowns could bring new and non-recoverable charges, with financially catastrophic consequences, he continued.

Laserson asked for a "massive effort" by the industry to offset these proposed costs and increasing constraints to the free U.S. grain trade. . . "when other nations, with subsidies, are becoming larger suppliers to the world's markets.

We want our industry to prosper with integrity and vitality. Just as we must avoid practices that are wrong, we must also avoid regulations that stifle."

Holstein gets GMD status

BRATTLEBORO, Vt. - The Holstein-Friesian Association of America reports that Gold Medal Dam status has been achieved by Johanna Osborndale Ann 5941003-GP, bred and owned by Amos N. Shelly, Manheim and transferred in 1965 to H.S. Aungst, Elizabethtown. This recognition is based on an animal's ability to transmit outstanding milk production and desirable body conformation.

Johanna Osbrondale Ann qualified on the basis of her lifetime production of 141,563 pounds of milk and 5,567 pounds of butterfat and her seven records averaging 18,703 lbs. of milk and 726 lbs. of butterfat.

Production testing and type classification information must be available in order to evaluate cows nominated for this award. The Holstein organization, largest dairy breed association in the world, registers over a quarter of a million animals each year.

Potato crop estimated

HARRISBURG, Pa. - The U.S. Winter potato crop is estimated at 2.5 million hundredweight (cwt.) according to the Pennsylvania Crop Reporting Service. This final production estimate is five per cent above last month's forecast but still 17 per cent below the 3.0 million cwt. harvested in 1976.

U.S. Spring potato acreage for harvest is estimatd at 91,300 acres, eight per cent below the 99,000 acres harvested in 1976 but eight per cent more than in 1975

Farmers Union counting on laborers

SAN ANTONIO Tex. - Pennsylvania members attending the National Farmers Union (NFU) 75th anniversary convention believe tha tfarmers and laborers might be able to work together to develop a fair farm program and a national food policy, according to Albert Mellinger, chairman of the Pennsylvania Farmers Union advisory committee.

He made the statement following a presentation by Secretary of Labor Ray Marshall on the first day of the five-day convention which ran through March 9.

Mellinger added, "Usually, when you think of labor you think of city people. But here is one secretary of labor that is interested in the rural people as well.

"Labor Secretary Marshall gave high praise to Agriculture Secretary Bob Bergland. Marshall pointed out that in the past farmers were literally forced off the farm because of the 'boom or bust' philosophy in the market place.

"What we need is a national food policy to stabilize prices in order to maintain the family farm. We need a national food policy to erase this 'boom or bust' in agriculture."

Delegates to the NFU convention approved a resolution that calls for a national food policy with these elements: assurance to farm families and consumers of abundant supply of food and maintenance of ample reserves; guarantee of a nutritionally adequate diet; expansion of the farm credit system; strict guidelines for land use; cost - sharing conservation programs; programs to make farming as a career available to young people; involvement in U.S. national trade agreements and participation in the world grain reserve program.

The resolutions adopted at he convention read as follows:

1. We endorse the National Farmers Union Food Policy.

2. We oppose an energy policy that continues increased emphasis on research and construction of nuclear power plants as a primary source of energy. We recommend a national energy policy that will place more emphasis on research and development of solar, coal, wind, geothermal, hydroelectric, methane gas, and other renewable sources of energy for our future energy needs.

3. We recommend continuing control of gasoline prices by FEA.

4. We recommend the continuation of ACP Programs to be administered by a county committee system. We recommend an expanded ACP Program with cost shares at a minimum of 75 per cent on all practicess mandated by the Soil Erosion Sedimentation Act or the Environmental Protection Agency. We further recommend a small tariff on all exported grain, with the income derived being used to support the expanded ACP.

5. We recommend the standardization of hydraulic and implement couplings.

6. We recommend that all plants outside the U.S. which ship meat products into the U.S. come under the meat import quotas.

7. We recommend that National Farmers Union investigate the possibility of providing workmen's compensation for Pennsylvania farmers.

8. We recommend that imported food commodities be subject to the same inspection as domestic products and be labeled as imports.

9. We endorse the Young Farmers Homestead Act of 1975. This program would establish a federal corporation which would be funded originally by the Congress. This corporation would be empowered to buy land from willing sellers and lease it to qualified young farmers with an option to buy. Fees collected from the young farmers would eventually make the program self - sufficient. We believe that this program would stabilize land tenure and make it possible for young farmers to begin farming operations.

10. We recommend that federal disaster payments be restructured to make disaster payments on total damaged acres regardless of size of allotment or bases. Payment rates should be increased to cover the cost of production of damaged crops. We recommend that the federal crop insurance program be expanded to additional acres.

11. We recommend an expanded farm storage facility loan program.

12. Congress should pass legislation directing the Department of Agriculture to issue new allotments or bases on a new survey usning an average of the 3 highest years of the last 5 years. Released bases and - or allotments should not be moved over county or state lines if there is need for additional bases and - or allotments on family type farms in the county or state affected. The redistribution authority should remain under the jurisdiction of the County Committee.

13. We recommend that farmers performing ACP practices be eligible for payment within thirty days of the completion of the practice.

14. We recommend that all farm products and items be priced at no less than 100 per cent of their cost of production and also include a 10 percent reasonable profit.

15. We oppose any attempt to change by legislation or regulation the Capper - Volstead Act or any other existing cooperative legislation if such change will weaken, destroy, or hinder the operation of cooperatives.

16. We endorse the concept of the federal Occupation Safety and Health Act and recognize the importance of providing safe and healthful working conditions; however, due process of law must be mandatory in determining guilt and assessing fines. We recommend that the Congress provide for total exemption of small farms and businesses who have five or fewer employees from the inspection provisions of the law.

17. We endorse the efforts of the International Federation of Agricultural Producers to stabilize prices of food commodities on the international market.

18. We recommend and increased effort by National Farmers Union to publicize Farmers Union accomplishments to its members and other farmers, and , to inform the general public of the costs and other problems involved in the production of food and fiber. We believe this promotion effort would achieve increased farmer acceptance and enrollment in Farmers Union in areas where Farmers Union is relatively new. This promotion effort should use the most effective news media available.

USDA Holstein sire data released

When the USDA bull proofs for February came out recently, they showed that 109 Holstein bulls had a predicted difference in milk of 1000 or more pounds. LANCASTER FARMING lists those bulls, ranked in order of predicted difference in dollars, and others with $50 or more in P.D.$. It should be noted, however, that just because a bull is listed here does not mean that semen from him is available. Check with the bull stud at which a bull is located to find out whether the bull's semen is still for sale. The first column after a bull's name is the stud code number. as assigned by the National Association of Animal Breeders. They're identified as follows:

01 — Noba, Inc. Box 607, Tiffin, Ohio 44883
03 — Eastern A.I. Cooperative, Box 518, Ithaca, N.Y. 14850

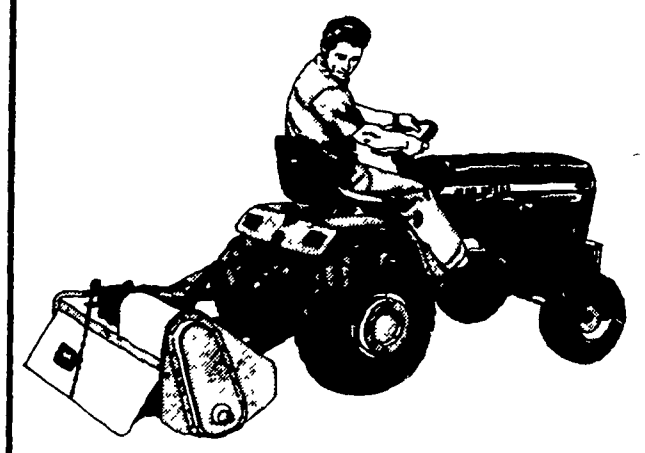
SPECIAL
On John Deere
Lawn and Garden Equipment



Buy now and save!
no finance charges till April,
no monthly payment till May

Buy any new John Deere Lawn & Garden Tractor or Riding Mower now and you'll make big savings! Plus you can save now on John Deere attachments for tilling a garden, hauling dirt and many other jobs.

When you buy before March 31, 1977, no finance charges will be imposed until April 1, 1977. And there will be no monthly payments until May 1, 1977.

This preseason offer applies to any new John Deere Lawn and Garden Tractor, Riding Mower or John Deere attachment such as a front blade, tiller, mower, dumpcart, sweeper and snow thrower sold with tractor or rider. A small down-payment is required. See us now for this limited-time offer on John Deere lawn and garden equipment.

Dividend declared

LANCASTER, Pa. - A regular quarterly cash dividend of $.29 per share was declared by the Board of Directors of National Central Financial Corporation, parent company of National Central Bank, at its February 22 meeting, according to an announcement made recently by John C. Tuten, board chairman.

This quarterly dividend is payable April 20, 1977 to shareholders of record March 21, 1977.

National Central Bank, headquartered in Lancaster, Pennsylvania, has 51 full-service offices and serves a six-county area in central Pennsylvania.

10'-12'-14'-16'-18'-20' Models Available

YOUR FIRST LOOK TELLS YOU IT'S BUILT TO DO A SUPERIOR TILLAGE JOB — BECAUSE YOU SEE FEATURES LIKE THESE:

"COMPLIMENTED BY COMPARISON"

Massive, 4"x8"x¼" high-tensile structural steel frame assures positive adjustment and extra long life

Heavy ⅜" bearing stands and 4" O.D. Triple-Seal bearings that are regreasable.

Larger cast iron spools.

Moldboard type scrapers formed of heavy 3/16" steel.

Hefty 1¾" axles and 6 ga. blades take the abuse you're bound to encounter.

Stout, adjustable hitch and swivel jack.

Spring loaded leveling adjustment and one-man cylinder hook-up.

PLUS MANY MORE

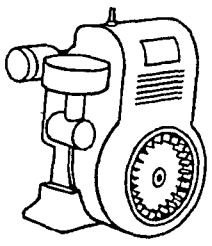
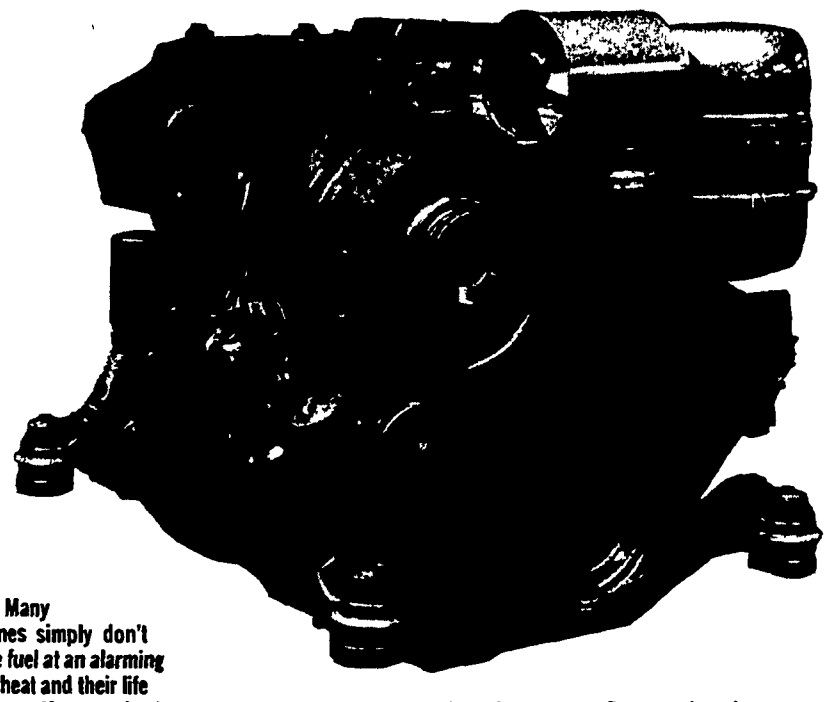
All air-cooled engines are NOT created equal





It's easier to call an engine "heavy duty" than it is to build it that way. Many carburated "heavy duty" industrial engines simply don't deserve the title. They consume expensive fuel at an alarming rate: they are prone to break down or overheat and their life expectancy is measured in hundreds of hours. If any engine in the world qualifies as heavy duty, it's Deutz. Deutz engines are often chosen to power equipment with unit price tags over half a million dollars—that's heavy duty

When it comes to cooling efficiency, the Deutz precision-engineered axial-flow cooling air blowers have no equal. This direct approach to cooling [without coolants, additives, cavitation] means our engines need only about 60% of the air volume liquid-cooled engines require. Combustion efficiency is greatly improved by higher head temperatures and engine life is extended by cooler oil temperatures.

If you think air-cooled engines are prone to overheat, talk to Deutz users in the scorching heat of the Imperial or San Joaquin valleys. There, Deutz engines deliver more than 20,000 hours of trouble-free service before a major overhaul.

There are lots of things that separate Deutz engines from water-cooled and other air-cooled engines. Things like blower design, big lube oil coolers, oil-cooled pistons, special alloy cylinder heads, a research and development team of more than 1,000 engineers. These are all important advantages. Still we say: If you can find an engine that uses less fuel than a Deutz—buy it.

A little out of the way - but lots less to pay

APC delegates vote for pseudorabies control

DES MOINES, Iowa - Delegate approval of a plan to control PRV (pseudorabies) and the crowning of a new National Pork Queen highlighted the activities of the recent American Pork Congress held here earlier this month.

More than 14,000 persons attended the event making this year's APC the largest ever. The APC is sponsored by the National Pork Producers Council, Des Moines.

At the NPPC annual meeting, delegates approved an eight step plan to control and work towards eradication of PRV. PRV is considered to be an epidemic by Midwest pork producers and poses a real threat to the economic welfare of pork producers and this nation's red meat supply.

The delegates called on the NPPC to meet with U.S. Secretary of Agriculture Bob Bergland and have him direct his staff to act immediately in implementing actions that will:

immediately activate in-depth research on skin testing and all other testing and diagnostic procedures necessary for control of PRV.

permit interstate shipment of feeder pigs only from those states where PRV is a reportable and quarantinable disease.

permit interstate movement of only those hogs going direct to slaughter or a slaughter market, or that have tested negative for pseudorabies within the previous 30 days.

design one standard uniform test and reporting procedure for PRV.

allow an anti-serum be produced and approved for interstate movement that will aid in reducing pig death loses in catastrophic outbreaks.

establish an accurate cost-risk-benefit pertaining to the use of vaccines and their effect upon the future control of this disease.

develop a total program of positive actions to control the spread and to bring about the eventual eradication of PRV while protecting the economic rights and stability of the individual pork producers and the future of the nation's pork industry.

cause the USDA budget for fiscal year 1978 to be amended to add supplementary budget items to underwrite those cost of implementing the programs for the control of PRV.

The delegates also approved a resolution by the Illinois delegation to encourage a federal requirement that any garbage-fed hogs involved in interstate commerce be fed garbage which has been processed at a location other than the farm where the feeding takes place and by a process which ensures the garbage be rendered sterile.

The pork producer group also passed a resolution making the National Porkettes a women's auxiliary of the NPPC.

A resolution by the Missouri delegation calling for a change in the splitting of the funds received from the voluntary feeder pig investment program was defeated.

Debbie Brand, a 20-year-old blue-eyed blonde from Hopkins, Mo. was crowned 1977 National Pork Queen during the annual banquet.

The junior home economics major at Northwest Missouri State University competed against 17 other state pork queens and was also named "Miss Congeniality" in a vote taken by the candidates.

Miss Brand will reign throughout the year as the nation's pork producers "Ambassador of Goodwill." She will appear on radio and television and make personal appearances to consumer audiences throughout the country. She succeeds Terri Ward, 1976 National Pork Queen from La Moille, Ill.

Miss Brand is also the recipient of a $2,500 scholarship made available by the NPPC and through cooperation of the American Cyanamid Company. She plans to do graduate work in learning disabilities or a related field after graduation. She is the daughter of Mr. and Mrs. Richard Brand, who farm 1,300 acres and raise 1,000 hogs per year.

Grange opens doors

FLEETWOOD, Pa. - It was a "packed house" at the Fleetwood Grange annual Open House, held here last Thursday evening.

The program included a roast of the Grange. Wayne Readinger was honorarily chosen to portray "Mr. Grange."

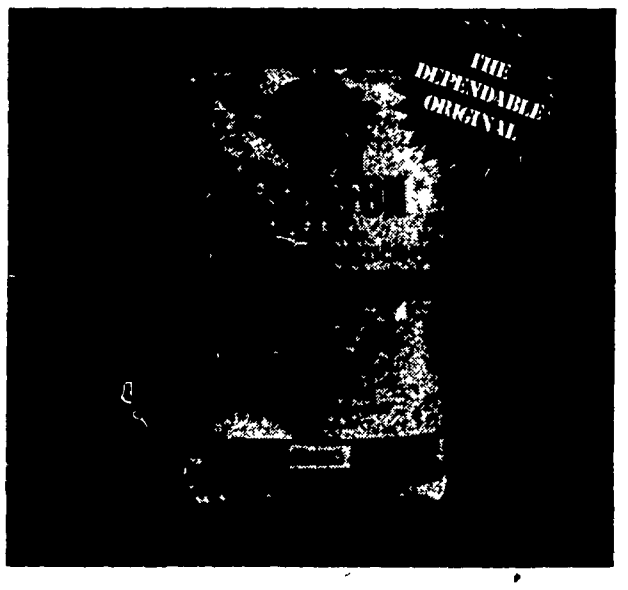
The speaker for the evening was Charles Wismer, chairman of the State Legislative Committee, Pennsylvania Grange. Wismer informed the Grangers of the successful accomplishments of their efforts and the legislation they are now working for. "Legislatures need to put everything in the proper perspective," he told the group. Changes in the tax structure and workman's compensation laws are two of the present goals of the Grange.

The Granger of the Year award was presented during the program to Mr. and Mrs. Leroy Kline. Both are 55 year members and have been members of the Fleetwood Grange since the time of it's organization missing the chance to become charter members by only a few months.

They both have been involved in agriculture and have lived on farms until recently. Mrs. Kline served as director on the Board of Berks County Extension Association for 25 years, and is a seventh degree member of the Grange. At present she is serving as chairlady of the cake and pastry committee.

Mr. Kline has donated much of his time to the Grange, making minor repairs and mowing the grounds.

SPUD MAKERS



®SENCOR gets the weeds.

Provides dependable, consistent control of a wide spectrum of tough broadleaf weeds, including lambsquarters, wild mustard, ragweed and Pennsylvania smartweed. Effective against many grasses as well. Lasting performance reduces cultivations to a minimum.

SENCOR 50% Wettable Powder can be applied by air or ground as a preemergent or postemergent, or a split application of both, when used as directed. Its excellent water solubility assures quick activation through rainfall or irrigation.

®DI-SYSTON gets the insects.

A planting-time application of DI-SYSTON is the best protection you can buy against a host of potato pests. DI-SYSTON knocks green peach aphids and Colorado potato beetles out of your spuds fast. And keeps 'em out for weeks with lasting systemic protection. Available in liquid or granular formulations.

Chemagro Agricultural Division of Mobay Chemical Corporation, Box 4913, Kansas City, Missouri 64120.

Chemagro *RESPONSEability to you and nature*

SENCOR and DI-SYSTON are Reg. TMs of the Parent Company of Farbenfabriken Bayer GmbH, Leverkusen

Sire summaries for colored breeds released

Following are the top Ayrshire, Brown Swiss, Guernsey, Jersey, and Milking Shorthorn bulls, as compiled by the United States Department of Agriculture. The bull summary was produced by USDA in February of this year and ranks bulls in order of predicted difference in dollars. LANCASTER FARMING lists those bulls of each breed which have a predicted difference in dollars of $30 or more. This list of bulls is no guarantee that semen from them is available. Check with the bull stud at which the bull is located. Bull studs are identified by code number which they were assigned by the National Association of Animal Breeders. A key to those code numbers follows:

01 — Noba, Inc. Box 607, Tiffin, Ohio 44883
03 — Eastern A I Cooperative, Box 518, Ithaca, N Y 14850
07 — Select Sires, Inc , Box 126, Plain City, Ohio 43064
08 — Louisiana Animal Breeders Cooperative, Box BD, Louisiana State University, Baton Rouge, La. 70803
09 — Sire Power, Inc , Box 555, Frederick, Md. 21701
11 — Carnation Company, Genetics Division, Box 938, Hughson, Calif. 95326
14 — Tri-State Breeders Cooperative. Westby, Wis. 54667
15 — Atlantic Breeders Cooperative, 1575 Apollo Drive, Lancaster, Pa. 17601
16 — Kansas Artificial Breeding Service Unit, 1401 College Ave., Kansas State University, Manhattan, Kans. 66502.
17 — Minnesota Valley Breeding Association, New Prague, Minn. 56071

Lamb club

YORK, Pa. - Docking and castrating lambs was the main topic at the March meeting of the York County 4-H Lamb Club. The meeting was held at the Jack Ness Farm near Felton. Tony Dobrosky, a leader of the club, and Mac McGuigan, caretaker of the farm, showed how to dock and castrate lambs, using different tools. Then various members and parents tried it themselves. How to select lambs for 4-H projects was also demonstrated.

The meeting was then held in the barn. After the meeting Tony Dobrosky showed a short film on sheep.

The next meeting will be April 7 at the home of Charla, Jon, and Susan Janney.

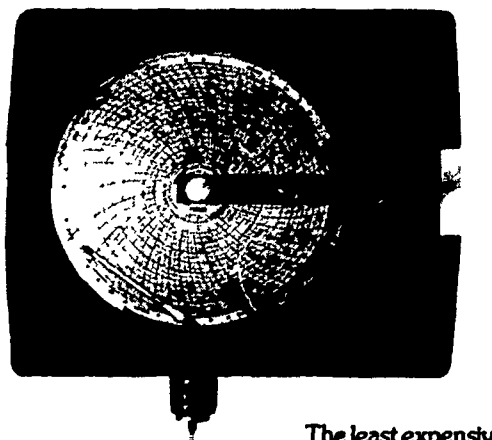
WHO'S MINDING THE MILK?



If you depend upon your milk check for a living, who's minding your milk?

The least expensive, one-shot insurance you can get is the Sentinel — the 10-inch recorder which charts temperature of your milk-cooling or holding tank. Here's what it provides:

- Permanent proof that proper temperature was maintained.
- Record of cooling equipment efficiency.
- Cleaning temperature recording on the same chart.

The Sentinel is also available with provision for actuating an alarm or warning light if pre-set temperature is exceeded.

Remember—if it prevents the loss of only one tank of product, the Sentinel has paid for itself. It minds your milk.

North American Charolais meeting set

LOUISVILLE, Ky. - An estimated 500 producers of Charolais beef cattle will converge upon Louisville Mar. 23-26, representing all parts of the U. S. and Canada, Mexico and Costa Rica.

The event will be the 20th annual meeting of the membership of American-International Charolais Assn., headquartered in Houston, Tex. The association is the fourth largest beef breed in the country, according to records of the National Society of Livestock Records Associations.

Featured speaker during the four-day program will be Dr. Thomas Haggai, High Point, N. Car., one of the nation's most respected and sought-after after-dinner speakers. He will appear through courtesy of General Motors Corp., and will speak at the membership banquet the evening of March 24.

Business schedule of the activities begin with arrival and registration on March 23, when all registrants will be given "Made in Kentucky" packets. Thursday and Friday will be devoted to business sessions, involving meetings of 14 different committees which will develop the association's program of work for 1977 for consideration by the board of directors March 25. The membership meeting, at which officers and directors will be elected to serve during the year, will be the afternoon of March 25.

The Kentucky Association will conduct its annual Kentucky National Charolais Show and Sale Saturday, March 26, at the State Fairgrounds.

One of the most elaborate programs ever planned for Charolais ladies who attend the annual meeting has been developed by the Kentucky Association for this event. One of the features will be a day-long bus tour, covering the Lexington area horse farms and Saddle Horse Museum, with lunch at the historic Spindle Top.

Then Friday morning, ladies will have the option of attending the regular L... of Charolais meeting at ... hotel, or making a second tour that will cover a Louisville distillery, tobacco factory, and museum.

Friday evening, following the membership meeting, the Kentucky Association will host a complimentary party from 6:00 to 8:00 p.m. Cocktails, hors d'oeuvres, music and door prizes will be the feature here - and you must be present to win the door prizes.

The Kentucky group also will raffle a purebred bull and heifer at noon on Friday prior to the afternoon sale. Winners may designate whether or not the animals are to be sold during the auction. Tickets will be available throughout the four-day period. The animals have been donated by Scroggins and Lewis.

Tobacco growers shun quotas

LANCASTER, Pa. - Pennsylvania farmers who produce Pennsylvania cigar - filler (type 41) tobacco have determined that acreage quotas and price supports will not be in effect for 1977 throught 1979 according to the Agricultural Stabilization and Conservation Committee.

Producers voted by mail on the quota proposal on February 22-25. Of the 798 farmers who voted, 694 cast negative votes. Since growers disapproved the USDA quota system, there will be unlimited production and no USDA price support for the three crops years 1977-79. Pennsylvania growers have never approved a quota system.

Producers of Maryland (type 32) cigar - filler tobacco also rejected the quota system. Producers of this tobacco are primarily located in Maryland. However, there are producers in Kentucky, North Carolina, Tennessee, and Virginia.

Burley tobacco growers overwhelmingly approved marketing quotas and a price support program for the 1977-79 crops. Since 1944, growers of Bruley tobacco have approved the quota system with a 93 to 99 per cent yes vote. Producers of Virginia sun-cured tobacco also approved the quota system by a yes vote of 95.8 per cent.

Big Blue by Steiger

TROY, Mich. - Ford Tractor Operations has announced plans to enter the large four-wheel-drive farm tractor market in mid-year 1977.

Ford, through its North American dealers, will market a new line of four models initially, and later a total of five models ranging from 210 to 450 horsepower. The new tractors will be produced for Ford by Steiger Tractor, Inc., under a supply agreement.

Ford, marking its 60th year in the tractor business, currently builds and markets 24 models of two-wheel-drive farm tractors and 17 light industrial tractors, as well as four-wheel-drive loaders for the construction market.

Steiger, founded in 1958 and based in Fargo, N.D., is a leading producer of large, high-performance, four-wheel-drive articulated tractors. Incorporated in 1969, it markets tractors under the Steiger name through an independent dealer organization in the United States and abroad, and also produces tractors for other companies. Its products are used primarily for agricultural purposes, but also have industrial applications.

LP GAS

GOES WHERE IT'S NEEDED

Keep your fuel bills at a minimum by the use of "L-P GAS" wherever power is needed. Many farmers and ranchers have and are converting their equipment to use L-P Gas, it also cuts the costs of repair bills to a minimum. Start today and save.

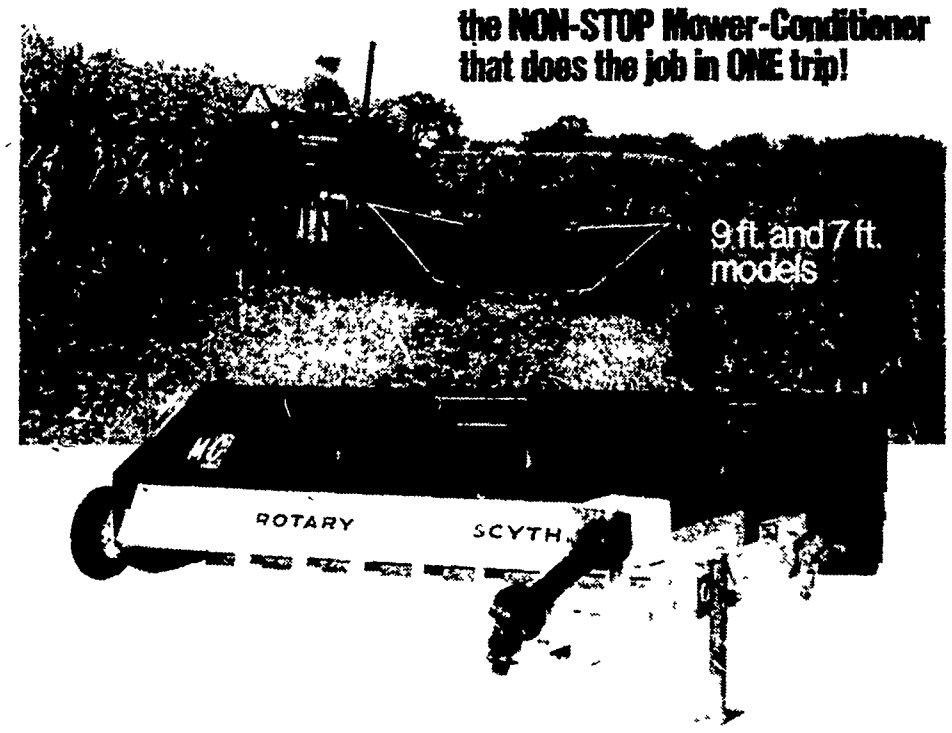
M-C MATHEWS COMPANY ROTARY SCYTHE...
the NON-STOP Mower-Conditioner that does the job in ONE trip!



If you own an M-C Rotary Scythe, you know there's no better haymaking tool on the market. Maybe you don't know that the same machine will do a beautiful job of harvesting corn or Milo stover . . . will lift leaves and shucks from between rows . . . will cut stalks to the right length and put them in a windrow of any width for pickup by your baler or stacker. The 12 ft. M-C Rotary Scythe will cut, condition and windrow four 36 or 38 inch rows or five 30 inch rows so your baler will make a perfect bale every time. If you don't own an M-C Rotary Scythe and you've got work to do—hay to make, stover to harvest, you should get the facts on the machine that gets the job done faster, easier and better.
One fact will surprise you: the price. It's right!

Phantom pesticide deals haunting Maryland

ANNAPOLIS, Md. - Maryland Secretary of Agriculture Young D. Hance warns that fast-talking agricultural chemical salesmen are "at it again" in the state.

Hance says residents of Garrett County have reported instances of telephone calls to farmers from salesmen in the northern New Jersey area. The salesmen offer special deals on pesticides with fancy names...and, Hance says, "some fancy prices going as high as $25 per gallon.

"Based on the information supplied to us so far, none of the chemicals offered are registered for sale and use in the state of Maryland and, as a matter of fact, the ones we have checked out have never been heard of by people expert in the pesticide field.

"Apparently," Hance continued, "the names of the salemen change every few days and the names of the products they are pushing change quickly too.

"Farmers should be suspicious of any chemical salesman who calls them on the telephone. To help us stop these practices farmers can help by getting as much information from the salesmen as possible particularly telephone numbers, area codes, shipping point information and chemical names so perhaps we can piece together a pattern and contact authorities in other states who can take action.

"If a farmer has the slightest doubt about a telephone salesman's product they should contact their local County Extension agent and Maryland Department of Agriculture before, and I repeat, before, agreeing to purchase the product," Hance said.

Farmers with questions about agricultural chemicals offered for sale should contact David Shriver, supervisor of Pesticide Regulations, Maryland Department of Agriculture, at 301-454-4635.

Ag research fund increase urged

HARRISBURG, Pa. - Pennsylvania's Agriculture Secretary Kent D. Shelhamer today called for Congressional action on legislation which would provide an increased budget for agricultural research. He noted that a variety of bills submitted in Congress this year would boost federal spending for agricultural research.

A typical measure, the National Agriculture Research Policy Act, in the U.S. House, would create the post of assistant secretary for research and education in the United States Department of Agriculture, establish an advisory board for that assistant secretary, and provide a program of federal grants to stimulate state research. Shelhamer said the bill already has the support of most members of the House Agriculture Committee in Washington and is backed by Agriculture Secretary Bob Bergland.

Shelhamer indicated that a survey of the House and Senate Agriculture Committees in Pennsylvania showed solid bi-partisan support for the proposed legislation, which would increase federal spending for research by $100 million for the first fiscal year, a ten per cent increase over the present USDA research expenditures.

"Every farmer and consumer in Pennsylvania should favor this kind of progress," Shelhamer said, "because agricultural research has benefitted both groups through finding new and better ways to meet the ever increasing demands for agricultural output and qulality. Farmers' output over the past 20 years has nearly tripled."

Shelhamer cited research at the Pennsylvania level as the key factor in eliminating stem pitting disease which had been killing thousands of young peach trees.

"That kind of research which saved our peach industry is really beyond any monetary figure in value," he said, adding that there are many parallels to the peach project in Pennsylvania research annals.

Shelhamer said that "any increase in federal research funding should be combined with a tough national project evaluation system similar to the one already existing in Pennsylvania," so that meaningful research projects should continue to receive our greatest attention.

Producers paid $9.38 for February milk

NEW YORK, N.Y. - Dairy farmers supplying milk plants regulated under the New York-New Jersey marketing orders during February will be paid on the basis of a uniform price of $9.38 per hundred pounds or 20 cents per quart. Market Administrator Thomas A. Wilson, who announced February's price also stated that the uniform farm price was $9.42 per hundred - weight in January 1977 and $9.80 per hundred weight in February 1976. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The total amount of milk received from the 18,994 dairy farmers supplying the New York - New Jersey Marketing Area was 710,505,871 pounds during February 1977. This was more than 31 million pounds below last year, however, February 1976 had an extra day. The gross value to dairy farmers for milk deliveries was $67,873,073.28. Wilson explained that this included idfferentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmers.

Regulated milk dealers (handlers) utilized 352,566,377 pounds or 49.6 per cent of the total amount of milk for Class I. The Class I milk is used for fluid products such as homogenized, flavored, low - test and skim milks. For February 1977, handlers paid $10.65 per hundred weight for the milk used in Class I products compared with $11.48 a year ago.

The balance of the milk, 50.4 per cent, was used to manufacture Class II products including butter, cheese, ice cream and yogurt. For this milk the handlers paid $8.18 per hundred weight.

The uniform price is based on milk containing 3.5 per cent butterfat. For February 1977, a differential of 10.4 cents was applied to the price for each one-tenth of one per cent that the milk tested above or below the 3.5 per cent standard.

All prices quoted are for milk received within the 201-210 mile zone from New York City.

COOK STOVE FOR WOOD OR COAL . . .

Built with Old World Craftsmanship yet MODERN As TOMORROW!

the STANLEY Kitchen Range from Waterford, Ireland

CHOOSE BLACK IRON OR WHITE PORCELAIN

Priced From $599

Model shown White with backsplash warming shelf and base extender options

A household word in Ireland, where the use and technology of solid fuels has never ceased, the incomparable Stanley is now available for the first time in America

AMPLE COOKING SPACE An even heated oven large enough to roast a 25 lb turkey, and a finely finished, cast iron hot plate that accommodates the everyday needs of most families

VERSATILITY Wood, coal, coke, anthracite or peat all give excellent results The optional hot water unit provides a large reserve of piping hot water while radiant heat provides a gentle warmth to your kitchen It s virtually 3 units in 1 that offers cooking, hot water, and room heat

Wenger on ag committee

HARRISBURG - Rep. Noah W. Wenger, R-Lancaster, has been appointed to a special House Agriculture Subcommittee to study a proposal for the creation of a Pennsylvania Agricultural Development Authority.

If established, the Authority would operate in a manner similar to the Pennsylvania Industrial Development Authority (PIDA), but would deal with agricultural rather than with industrial loans.

Wenger, a Lancaster County farmer, explained that the purpose of creating of the Authority is to stimulate agricultural development and to help maintain, through a low-interest loan program, those farms currently operating in the Commonwealth.

"Agriculture should rank as one of our state government's top priorities, and I believe that all Pennsylvanians have a stake in the future of farming," Wenger said.

"We all know that the Commonwealth's farmlands have been decreasing along with the number of family-owned farms. Therefore, I believe the intent of this legislation to create an Agricultural Development Authority is worthy of every consideration.

"My preliminary studies of the bill, however, indicate to me that some changes may have to be made to conform more fully with the bill's purpose of making adequate financing available so that family farms can develop efficient farming operations.

"Family operations might be cut out if it were possible for a large agricultural corporation to deplete the Authority's loan funds.

"This matter needs further study," Wenger said.

The 99th District legislator said the bill is commendable in that it recognizes the large amounts of capital required to operate efficient family-size farms.

Noah Wenger

"Some areas of the State already have adequate commercial sources of farm financing, but the Authority could help in other localities where funds are not readily available," he said.

Importance of pruning stressed to fruit growers

GETTYSBURG, Pa. - ...ning rules outlined to ...ms County fruitgrowers ... orchard demonstrations ...d in the beginning of this ...nth can add years to the ...oductive life of peach trees ...d maintain the peach ...ustry in the Com...nwealth, according to Dr. ...ald Petersen, plant ...hologist for the ...operative Extension ...vice of The Pennsylvania ...te University.

A peach canker disease ...sed by the cytospora ...gus in killing large ...nbers of trees and forcing ...wers to curtail plantings New York, Ohio and Michigan" added the University Specialist who went on to say that he is convinced changes in pruning and other orchard practices can keep peach growing profitable. "While there is no control for this fungus which attacks all stone fruits, we do understand the problem and can live with it," he added.

Petersen explained how the fungus organisms, always present on air currents, spread during rainy weather when the temperature is above freezing.

Wounds created by pruning cuts, dead tissues - areas caused by Winter injury, or dead dormant buds are suitable infection sites on peach trees. "In one year an infection site will enlarge to girdle small twigs; in two years limbs up to one inch in diameter can be killed by the canker", said Petersen.

"The first step in reducing the incidence of canker lies in training peach trees to a modified central leader, a stronger tree less subject to limb breakage than the conventional vase - form tree" continued the specialist. He called for a change in the time of pruning, urging the growers to wait as near the time of bud swell as possible, and suggesting that summer pruning leads to fewest infections. "A spray with Bordeaux mixture at Time of leaf drop helps reduce cankers and controls the leaf curl disease", Petersen concluded.

Petersen participated in stone - fruit pruning demonstrations sponsored by the Cooperative Extension Service and featuring Dr. C. Marshall Ritter, Extension pomologist. County Agent Thomas E. Piper presided at the field sessions which were hosted at 9 a.m. by Thomas O. Oyler, Sr., Gettysburg R3 and at 1 p.m. by the I. Z. Musselman Orchards, Orrtanna, and Kane Brothers of Cashtown. Dr. William Bode, entomologist at the Penn State Fruit Research Laboratory shared in the morning session.

"The most important pruning in the life of a peach tree is done the day you plant it" said Dr. Ritter as he demonstrated a technique for pruning newly set trees to favor a central leader. "Plant the tree, remove one quarter of the top, then let it grow. When growth starts and the shoots are about two inches long, return to select the desired well - distributed branches. Training which is a two-year process, is difficult; pruning established trees is easy by comparision," added the specialist.

Turning to the bearing trees, Ritter pointed out that such a tree may produce up to 7000 flower buds while 500 peaches, size 2½ inches and up would be considered a good yield. Heavy pruning is necessary and requires removal of ½ the shoots from the tree and cutting in half those which remain. Leaving some small one-or-two bud-stubs on the main trunk will promote circulation and keep the tissue alive.

Because of the very cold winter, growers wanted to know how to identify signs of Winter injury. Ritter pointed out that plump buds silvery in color are generally good. The bark on twigs should appear red and not be shriveled or wrinkled. "Cut representative buds in cross section," suggested Ritter. "The live ones will be green or yellow; the dead ones will be brown or black". "Wind chill temperatures have little or no influence on the buds but air temperatures which dip under 12 to 15 degrees below zero will kill peach buds" he added. Several growers reported taking bouquets of peach branches indoors to force bloom. Ritter cautioned that results could be inconclusive unless you can see that the flower contains a healthy pistil. "If Winter damage is suspected, delay pruning until growth starts so as not to remove live buds which appear on terminal growth," cautioned the specialist.

In response to a question, Ritter recommended painting the trunk and base of main branches with a white latex paint. This reflects sunlight and helps prevent wide temperature differences within the tree. "The problem is most critical during sunny days when the orchards are snow - covered. While the air temperature may be 40 degrees or less, temperatures beneath the bark may reach 70 degrees creating a stress which may cause the bark to split" he said.

"The best quality cherries are produced on trees which are pruned annually" observed Dr. Ritter as he went on to demonstrate how these trees should be pruned. "If the fruit will be harvested mechanically, the center of the tree should be fairly open and the top shaped somewhat like a mushroom."

Petersen cautioned the growers to use Benlate in combination with another fungicide to prevent the development of tolerant strains of the Brown Rot organism reported in other states. He announced that Actidione, a fungicide for post - harvest control of cherry leaf spot and use on non-bearing cherry trees will be available this season.

Professor Bode warned that adult pear psylla became active on warm Spring days and will begin laying eggs in early April. "An oil and phosphate spray applied before egg laying begins is helpful in keeping this insect under control," he concluded.

ATTENTION: DAIRYMEN

To save money and improve milk production

Feed Dairy Special 40XX

The key to efficiency in any dairy feeding program is getting maximum performance out of homegrown grains and roughages while keeping out-of-pocket feed costs down. That's why Vigortone developed Dairy Special 40XX for use in legume hay or haylage rations.

This potent pre-mix contains abundant phosphorus to balance off the high calcium content of these roughages and provides proper levels of other major minerals, trace minerals and vitamins.

Legume programs are well balanced with Dairy Special 40XX, and the need for supplemental protein is much less. Best of all, your cows soon respond to their full bred-in potential to produce milk.

Dairy Special 50XX for the dry cow

Proper nutrition for the dry cow is just as important as for the producing cow. It's during this period that the stage is set for the level of production she will have throughout the lactation period. Vigortone's Dairy Special 50XX is properly suited to fortify high roughage rations of dry cows and keep them in excellent condition right up to freshening.

See your Vigortone dealer soon

Your Vigortone dealer has several products and programs to promote better milk production and help you save money. See him soon.

Learn why more dairymen are feeding Vigortone — especially now.

Recognition dinner held at Kutztown

By LAUREL SCHAEFFER
Berks County Reporter

KUTZTOWN, Pa. - Kutztown FFA and YFA members held their 35th annual banquet and awards presentations at the Grange Hall, here, on March 7.

Among the long, impressive list of award winners was Tim Kleinsmith, vice-president of the Chapter. Tim was awarded Chapter Star Farmer and the DeKalb Award for being the outstanding senior, a Keystone Farmer pin and two National Foundation medals for agriculture mechanics and dairy production.

Ken Sanner, president, took his share of the awards also. Ken was recognized for two special awards; leadership and Keystone Farmer, and two National Foundation medals; crop production and outdoor recreation.

Marjorie Faust was honored by receiving the Star Greenhand Award. Brian Fusselman received the Chapter Star Agribusinessman Award. Brian also received an Agriculture Mechanics medal and the FFA Band pin for his outstanding participation in the National FFA Band.

The FFA student with the highest academic average was Ronald Fegley, 11th grade. He received the Scholarship Award and a National Foundation award for beef production.

Other National Foundation medals went to; Kevin Kerschner, agriculture electrification; David Dietrich, ornamental horticulture; Steve Angstadt, placement in agriculture production; George Adams, placement in sales and service; Richard Dietrich, poultry production; and Larry Shrawder, swine production.

Daryl Kunkel received the soil, water and air mangement medal. He placed third in the County Soil Judging Contest. James Shrawder and Michele Gladney, both received a medal for public speaking. James placed first in the County and regional contests while Michele was second in the County contest and fifth in the area contest.

Harvey Smith, area agriculture education consultant, awarded the State Project Book Contest Winners. Ronald Flicker received the gold for occupational experience, Tim Kleinsmith recieved the silver for the farming program and Larry Shrawder received the bronze.

The Chapter presented honorary memberships to; Oscar Kleinsmith, father of Keystone Farmer Tim Kleinsmith; Jean Held, Business Education, Kutztown Area High School; Stephen Breininger, Biology, Kutztown Area High School; Lester Meck, head maintenance engineer Kutztown School District; and Judy Mitchell, former reporter for Lancaster Farming.

The Chapter also awarded a plack of appreciation to Sandra Hartman, secretary of the Vo-Ag Department, for her service to the FFA Chapter. Letters of appreciation were given to; N.H. Flicker; Oscar Kleinsmith; Carl Miller; Ralph G. Sanner; F. Lee Shrawder; and Paul Siegfried.

Among award winners at the recognition banquet at Kutztown were, left to right, Tim Kleinsmith, Ken Sanner, and Ronald Fegley.

Elwood Ohlinger, YFA President, presented two Outstanding Young Farmer awards. The over-30 Outstanding Young Farmer Award was presented to Lloyd Driebelbis. He has a registered herd of Guernsey cattle and farms 175 acres. Arthur Schlappich received the under-30 Outstanding Young Farmer Award. The Schlappichs milk a herd of registered Holsteins.

LeRoy Geesamen, public relations director for YFA and Richard Hoppes, state president of YFA spoke briefly during the awards presentation.

Survey shows

Consumers now ready to work with farmers

WASHINGTON, D.C. - An overwhelming number of consumers see joint action with farmers as a major step in improving the nation's food system, according to a nationwide survey of 2500 consumers.

Results of the survey sponsored by the Agriculture Council of America were announced here recently by Dale Hendricks, an Iowa dairyman and ACA Chairman.

"Consumers all over the country are very concerned about the price, quality and nutritional value of food that reaches the supermarket," Hendricks said.

"They are looking for solutions and are anxious to work with the food producer to do something about the situation. I am particularly encouraged by the fact that 81 per cent say they feel the interests of farmers and consumers are similar enough to wrrant hoint action."

Hendricks also explained that the questionnaire is being used as a tool in a comprehensive effort to identify ways farmers and consumers can work together. "The results of this project, have set the stage for concrete action," he said.

According to the questionnaire, which was distributed by teams of farm couples who traveled to major metropolitan centers inthe U.S., a majority of consumers are seeking changes in the food system. Many of the consumers seemed to be calling for a "no frills simplemarket" as an alternative to the supermarket.

An overwhelming majority favor less convenience preparation and packaging and want more bulk purchasing. Similarly, more than 70 per cent want less service and more price competition in food processing and retailing. Less government regulation in food production and processing was cited by 42 per cent as a way to cut food costs, although written comments indicated wide support for health and safety standards.

A large majority of consumers are apparently dissatisfied with food prices, and 90 per cent see more direct farm to consumer marketing as a possibility for cutting costs. But in addition to food costs, the quality and nutritional value of food is a big concern. Less than half said they were satisfied with the quality and nutritional value of food, and written comments on the questionnaire served to emphasize their concern. One man wroter, "We'd probably fare better eating the package and throwing the food away." Dissatisfaction to a large degree seemed to be directed to what consumers apparently feel are over - processed and highly - adevertised "empty foods." Although a slim majority opposed reducing the variety and number of food items carried by supermarkets, written comments indicated that many want more uprocessed foods. A Berkeley respondent said, "There's too much plastic food and preservatives. I'm concerned with the lack of variety of fresh foods."

Opinions about trade were also asked for on the questionnaire. A slim majority of consumers favored food exports, and an almost equal number said farm export dicisions should be made by farmers.

"There seems to be a great deal of confusion on some aspects of ithe trade issue," Hendricks said. "For example, cross tabulation of the data shows that among those people who oppose farm exports, a large majority say farmers should make farm export decisions."

Consumers are about evenly split on the question of restriction the importation of food products that are cheaper because they are "subsidized by foreign governments, with 43 per cent in favor of restriction and 40 per cent opposing it.

A cross - tabulation of questions relating to trade indicateds that opinions are split on ideological grounds of either "free trade" or, as one man said, "America first - the heck with foreigners."

Among those who opposed exports, the sentiment, as judged from written comments, tended to be anti-foreigner, anti-communist or nationalistic. One man wrote, "Let them eat oil," while another commented "Let the Russians eat Communism."

Referring to the comments, Hendricks said they often were valuable in analyzing he computerized data. He also pointed out that the questionnaire did not emply a rigid statistical and demographical approach because it was seen as an extension of the direct communications by the teams of farm couples who visited the cities polled. The relatively large sample also increased the questionnaires distributed were completed and returned. This 12.5 per cent response is particularly high, as most questionnaires have a one to three per cent response rate average.

The fact - finding tour and distribution of the questionnaires were preceded by a National Conference last November, at which time 40 prominent farm and consumer leaders began identifying potential areas of agreement. One outgrowth of the attempt so far has been the formation of a "Farmer - Consumer Roundtable" that will seek solutions to problems confronting farmers and consumers on a continuing basis. The Roundtable members, including farm and national consumer organization represintatives, have already begun planning a major national conference for April 6 and 7 in Washington, D.C.

Several topics that offer promise for joint action have already been identified, and they will be further explored at the April conference. The conference is expected to identify, more specifically, areas of cooperation and to provide the understanding and impetus necessary for farmers and consumers to work together on a regular basis.

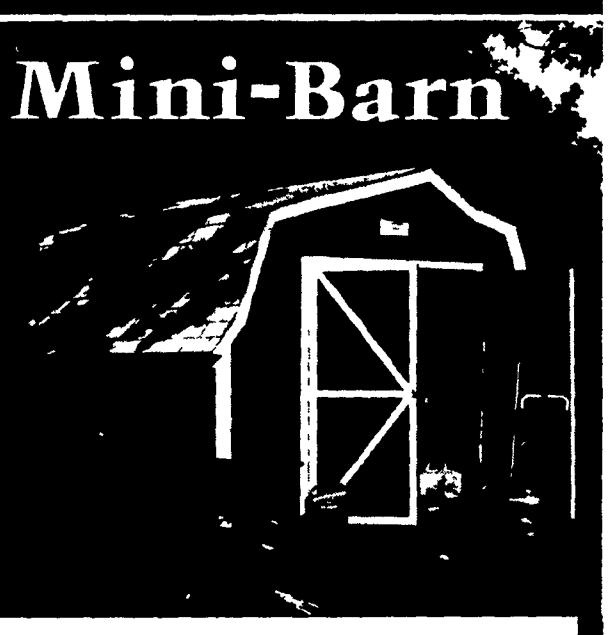
Convenience for every season . . .

Mini-Barn



FOR MORE OUTDOOR LIVING, LARGE STORAGE NEEDS; BEAUTY and CHARM

A combination of quality and beauty that will add charm with utility to your yard all year. Unlike a steel building, THE MINI-BARN will not gather inside condensation—and it will not be blown away.

SPACIOUS GAMBREL ROOF DESIGN

More overhead storage space than with a gabel roof building having the same floor area. Large double entry doors provide 5-feet, 2¼-inches of width and nearly six feet of height. Doors are complete with large hinges, an easy opening latch that may be locked and spring-loaded inside door latches.

DEPENDABLE QUALITY CONSTRUCTION

Unitized construction—with metal gusset plates for rigidity—is employed on gambrel roof rafters, door framing and the gable ends. Like a one-piece construction these strong units reduce twisting and breaking of roof shingles under stress and strain. Your MINI-BARN will be enjoyed not only for the warmth and beauty that only wood imparts—but for all the pride you'll take in its fine workmanship.

IMPCO's Gartley is a believer

By DIETER KRIEG

LANCASTER - Anyone who has ever met Boyd Gartley, Inter-State Milk Producers' director of member and public relations, knows that he is a believer. A man with a deep-rooted faith in God, the milk cooperative official has won the respect of thousands of dairymen.

But Gartley believes in more than the Almighty.

Anyone who has ever heard Gartley give a talk, knows that he is a believer in promotion and advertising. Specifically, milk promotion and advertising. Gartley does more than just talk. He performs, putting his every talent on the line to convince his audience that pennies for promotion is a good idea.

After a recent appearance here for the Lancaster County Dairy Day activities, one individual was heard to say that "you can't go to sleep when Gartley is up there." Another observed that Gartley does not shy away from making himself look a little silly, for the sake of impressing the audience with the point he has to make. Apparently, the method works.

Sporting a buckskin suit, a guitar and antique flask filled with powdered milk (his wife won't let him use the fluid kind on account of the mess it could cause) Gartley packs a powerful and fast moving message. He won't stand behind a lectern for 20 minutes. Instead, he uses the entire stage, capturing the crowd's attention with words and actions. He's sometimes before the crowd wearing his raccoon cap, and more often than not, he'll strum up a tune or two on his guitar.

Meanwhile, the audience listens with attention and appreciation. It's humorous entertainment with a serious message.

Gartley's usual message at events such as Dairy Day is that advertising pays, and if dairymen expect to hold their share of the beverage market, they had better jump on the bandwagon. To Gartley, a dairyman who isn't contributing to the ad and promo cause is in the same boat as the fellow who's on welfare and yet able to work.

For every dollar spent for advertising, university research shows that there's a return of $3.38, Gartley pointed out. He's convinced it pays to deduct seven cents per hundredweight from members' milk checks. Federal Order 4 late last year adopted a $3 million dollar advertising and promotion budget which is being put to work now. That budget is up 27 per cent from what it had been in 1976, and is expected to generate an extra $800,000 to $900,000 annually, according to figures released by the dairy industry.

Although dairymen voted last Fall to have their milk assessed an extra two cents per hundredweight for advertising and promotion, their increased efforts aren't keeping up with the rate hikes recorded in advertising markets. According to Gartley, ad rates have been going up so fast that the milk industry isn't even in the ball park anymore. Prime time TV advertising, for example, is no longer feasible. Instead, localized efforts are being intensified and a campaign has been underway in recent weeks to have the public take a coffee break with milk - "the beautiful switch."

Gartley pointed out that the nation's dairy farmers have an advertising budget of $36,600,000, which interprets into 0.4 per cent of sales. By comparison, General Foods spends $189 million on advertising, or seven per cent of sales. Kellogg spends 4.9 per cent of its sales revenues on advertising, while McDonald's and Pepsi-Cola each earmark three per cent of their incomes for that purpose.

The seven cents per hundredweight currently taken out of dairy farmers' milk receipts break down as follows: 57 per cent for local advertising; 27 per cent for nutrition education (Dairy Councils); 14 per cent for UDIA national programs; 0.4 per cent for local promotions; 0.3 per cent for the Keystone Milk Marketing Council; and 1.4 per cent for administrative costs.

The Keystone Milk Marketing Council, (KMMC) is an independent organization representing farmer organizations and milk cooperatives as well as independent producers and others interested in Pennsylvania maintaining a viable milk industry.

Inter-State Milk Producers' Boyd Gartley packs a powerful tune about the need to advertise and promote milk. Here he's pointing out how the dollars are spent. If you're wondering how to collect 338 per cent interest (sign at right) that's the return farmers can reap through each advertising dollar, a study shows. Gartley believes that dairymen who choose not to support advertising are hitching a free ride similar to those who collect welfare checks even though they're perfectly capable of earning their own way.

Sire Power herds reach top production

Two hundred and fourteen dairymen in Pennsylvania, breeding their cows artificially with Sire Power, Inc. and Northeastern Breeders Association, achieved herd averages of 600 pounds fat or more in 1976, according to Pennsylvania Dairy Herd Improvement Association records. Of the 214 herds over 600 pound fat, one herd was over 800 pound fat at 810F, 20 herds were over 700 F and 46 herds were over 650F. The number of herds in 1976 over 600 pounds fat sired by Sire Power sires more than doubl' from 1975's level.

The Pei sylvania DHI average for the Holstein breed is approximately 500 pound fat. These high herd averages reflect the outstanding manigerial ability of the herd operators.

Sire Power genetics are available on the farm through a well trained staff of professional A.I. technicians. These men have a selection of A.I. proven bulls and provide year - round service. Also, Sire Power direct herd farm specialists deliver semen, nitrogen, and supplies on a regular basis to dairymen breeding their own cows. This full - service approach gives dairymen a choice of breeding programs.

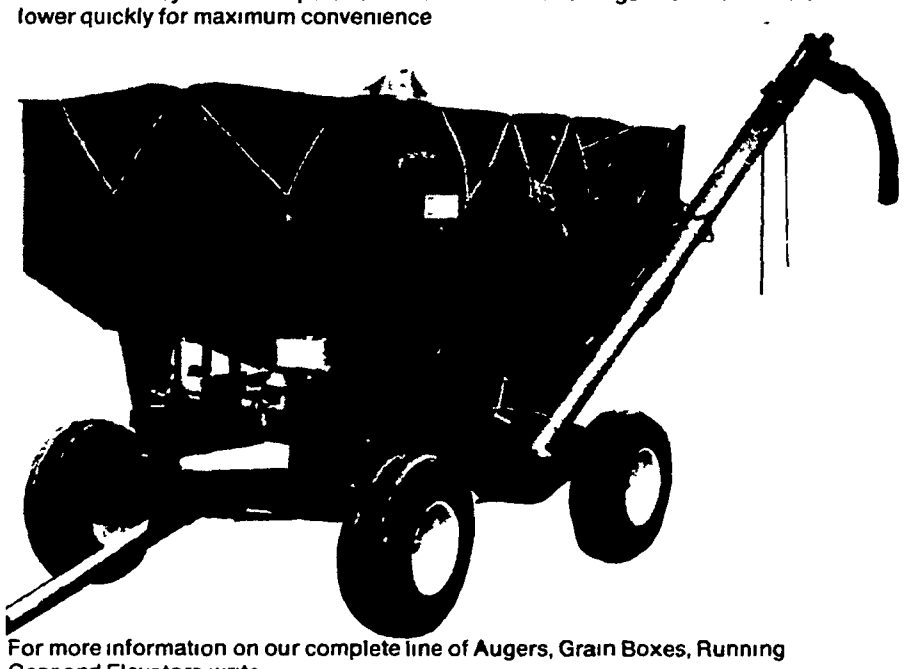
Auger saves you time and money

At last! You can realize fertilizer savings of eight to ten dollars per ton If you're currently using shovels, buckets or bags to transfer fertilizer to application equipment, you need the economical advantages of U M 's Auger One man can easily fill a six row planter in five minutes the end of backbreaking hand loading

Using an auger also eliminates the caking problem caused by high moisture and nitrogen content As the fertilizer is transferred through the auger, chunks are broken up. This assures even application to all rows

U M.'s Auger comes complete with all hoses, mounting brackets and couplings—even a winch for easy one-man operation The 6" x 12' tube swings 180° and will raise or lower quickly for maximum convenience



For more information on our complete line of Augers, Grain Boxes, Running Gear and Elevators write

Rural America is making progress

WASHINGTON, D.C. - ural America continues to ake substantial progress in obs, income, population etention and growth, and ousing, according to a new eport to Congress from the ecretary of Agriculture.

Nonmetropolitan nonfarm age and salary employment has been increasing over twice as fast as metropolitan employment since 1970. Employment in agriculture has stabilized in the 1970's, and mining employment has risen after long-term declines. Despite the progress, wage rates continue generally lower in nonmetropolitan areas, as do labor participation rates, the report says. Thus, family incomes are lower in nonmetropolitan communities. In addition, although substantial gains have been made, job opportunities generally are not as good as in metropolitan areas.

The report notes that population movement into nonmetropolitan counties also has continued at a rapid pace since 1970, in sharp contrast to the 1960's and earlier. From 1970 to 1975, 1.8 million more people moved into than out of nonmetropolitan counties. During 1960-70, these counties lost 3 million, net, from migration.

Nonmetropolitan areas are those outside the nation's 265 Standard Metropolitan Statistical Areas. The total nonmetropolitan area of the United States is made up of 2,469 of the nation's 3,097 counties.

The report shows homeownership has increased more rapidly among nonmetropolitan than metropolitan residents, mainly because of a greater increase in mobile homes in nonmetropolitan areas. Such homes in nonmetropolitan areas are being purchased by a wider range of income groups than in the past, according to the report.

From 1970 to 1974, there also was a decline in the proportion of substandard housing. Only 10 per cent of occupied housing in nonmetropolitan areas was substandard in 1974, compared with 15 per cent in 1970. The report adds that only three per cent of occupied metropolitan housing was rated substandard in 1974.

The report also assesses rural education, health care, solid waste managment, water and sewer systems, public passenger transportation, fire prevention and control, crime and law enforcement, and the status of handicapped and elderly people. The nonmetropolitan sector lags behind the metropolitan sector in most of these areas, the report notes.

A second part of the report summarizes promising developments in rural schools and discusses new federal initiatives in rural health care, manpower and employment services, fire prevention and control, services to the handicapped, and providing community development information to local governments. A third part of the report presents results of a survey of states' main rural problems and rural development priorities.

The annual report, "Rural Development Progress - Fourth Annual Report of problems and rural development priorities.

The annual report, "Rural Development Progress - Fourth Annual Report of the Secretary of Agriculture to the Congress," is required under the Rural Development Act of 1972. Single copies are available from the Information Staff, Rural Development Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Grain dust standards 'unreal', could increase costs 6 cents/bu.

EPHRATA, Pa. - The Federal Environmental Protection Agency (EPA) has drafted regulations which could add six cents a bushel to the cost of feed grains in Pennsylvania, according to W. H. Andrews, president of H. O. Andrews & Sons, Mapleton Depot and PennAg Industries Association, a state-wide trade association of agribusiness firms.

"EPA officials have drawn up unrealistic regulations on grain dust emissions from grain elevators," Andrews said. "They have grossly exaggerated the dust situation while practically ignoring the effect the proposed regulations would have on the farmer's cost of doing business and the ultimate effect of raising food prices."

Andrews said that EPA, in its own words, has conceded that there are no practical and feasible methods of measuring the amount of dust escaping into the air through loading and unloading operations at grain elevators. "But that did not stop the EPA from stating that exactly 606,000 tons of dust are put into the air by grain elevators across the country.

"Nor did it stop them from ruling that this was a significant amount of dust. Even if all agrain dust could be stopped, I doubt that it would really improve the quality of air very much, especially in smaller Midwestern towns where the regulations would affect the most. Wind-born dust from many sources is very common in these communities."

Andrews added that the EPA estimates the proposed regulations would eliminate a mere four per cent of the 606,000 tons by 1981.

While the effect of the proposed standards of on Pennsylvania grain elevators would be minimal, the same is not true for Pennsylvania feeders of consumers.

"Pennsylvania does not set the market for grain. Our prices are fairly well established by Midwest supply, demand and cost of doing business. Industry studies estimate that the EPA proposals will cause capital expenditures fo $1.1 billion and additional grain elevator operating costs of $234 million annually.

"Considering these costs plus added costs at subterminal, terminal and port facilities, the grain industry figures the ultimate increase to be six cents per bushel. The American consumer has learned in many ways in recent years how a small change in the price of a basic commodity such as grain has a way of multiplying itself through the food chain."

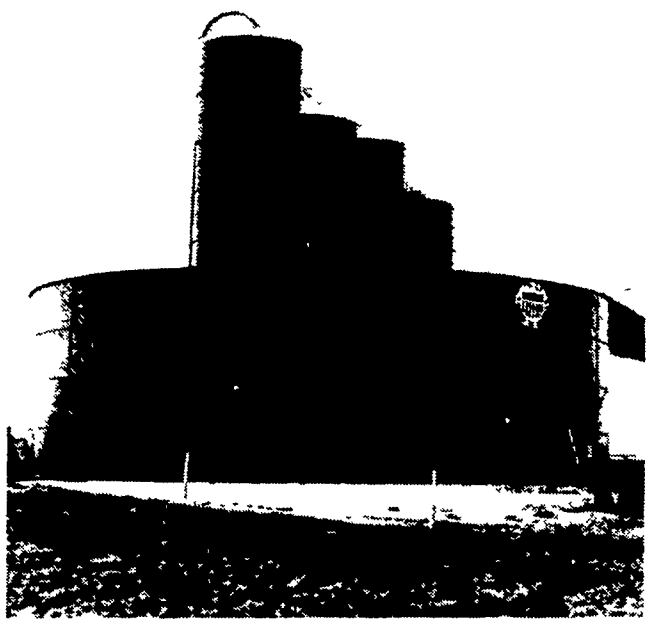
What's new



HARVESTORE LAUNCHES NEW SLURRYSTORE LINE

A new line of larger capacity 18 feet high Slurrystore liquid manure handling systems is now available from A. O. Smith Harvestore Products, Inc.

The new Slurrystore Systems are available in diameters of 25, 42, 62 and 70 feet. Slurrystore models also are available in heights of nine and 14 feet, and these current models can later be raised to heights of 14 or 18 feet respectively if desired. Earlier Slurrystore System models could not be raised.

For additional strength, the sheets of the new Slurrystore above - grade tanks are double bolted in the bottom ring levels. Like previous Slurrystore models and Harvestore feed storage systems, the tank seams are coated with a special sealant.

The new 18 feet high Slurrystore tanks afford considerably increased capacity over earlier models. The model 2518 (25 feet diameter) has a capacity of 67,000 gallon of liquid manure, the 42 feet diameter model 4218 holds 187,000 gallons, the 62 feet diameter 6218 holds 402,000 gallon and the 70-ft. diameter 7018 holds 519,000 gallons.

Also available for the new 42-, 62- and 70- feet Slurrystore System models is an optional 10½ inch high foundation extension. These glass - fused - to - steel sheets, embedded in the concrete foundation, increase the capacity of the 7018 Slurrystore System by 21,500 gallons, the 6218 by 16,700 gallons and 4218 models by 7,700 gallons. With the extension, Slurrystore structural sheets may be easily removed in case of damage or the need to enter the tank structure at ground level.

In addition to Slurrystore liquid manure storage units, Harvestore also markets a complete line of liquid manure pumps, spreaders and soil injectors, designed to function as integral parts of the Slurrystore System.

Besides the Slurrystore liquid manure handling system and Harvestore feed storage units, A. O. Smith Harvestore Products, Inc., manufactures an extensive line of automated livestock feed handling systems.

William Harrison (left), Littlestown R1, is being congratulated by Adams County Agricultural Agent John Schwartz for winning top honors in the Ohio Landrace Youth Swine Judging Contest recently in Eaton, Ohio. William, son of Mr. and Mrs. Ronald Harrison, received a trophy for having the highest score among the 50 participating youth from Ohio, Indiana and Pennsylvania.

GO Zero Concord FROM TEAT TO TANK!

NEW MODEL 70 S
Zero Concord
TWIN VACUUM PIPELINE
MILKING SYSTEM
- WITH COW MONITOR
It's a combination of a new, revolutionary pipeline milking machine and the ZERO Completely-Automated Vacuum Bulk Milk Cooler.

The ZERO CONCORD is the only system that provides stable milking vacuum at the teat end — in parlor or stanchion barn — with a low or high, short or long pipeline — and without injecting air into the milker units to move the milk. Only with stable vacuum and no air injection can you hope to reduce leucocyte counts up to 65% — increase milk production as much as 20% — and prevent off-flavor and rancid milk.

The safe, stable vacuum is made possible by a patented, scientific principle TWIN VACUUM whereby one vacuum milks the cows and a different vacuum moves the milk through a separate pipeline into the bulk tank. In addition — thanks to ZERO's patented SPATTER SPRAY Automatic Washer and new, improved, high-capacity, transparent milker unit — you have built in, "push-button", visible self-cleaning and sanitizing of the entire system — without disassembling. And there are many other advantages.

Come in, Write or Phone for Full Information!

$105,000 collected for firehouse

WILLOW STREET, Pa. - Two $30,000 subscriptions were presented to Daniel K. Lake, chairman of the Willow Street Fire Company Building Fund Campaign at the "Kick-Off" Barbecue hosted by the Ladies Auxiliary on March 14 at the Willow Street Firemen's Building. The first was presented by Carolyn Flick on behalf of the Ladies Auxiliary to the Willow Street Fire Company; the second was presented by John Thomas and Marlin Thomas on behalf of the Willow Valley Farms located on the Willow Street Pike, Lancaster. In making her presentation, Mrs. Flick said: "We hope that the business community will match our subscriptions many times over." Marlin Thomas, speaking on behalf of the Thomas Family said: "We are pleased to be a part of this fine community and wish to express our appreciation to the volunteers of the Company in this way. We also wish to invite you to hold your victory celebration at Willow Valley Farms as our guests."

In accepting these subscriptions, including a $10,000 check from Ladies Auxiliary, Lake said: "We are grateful that the ladies who stand behind the fire fighters and who serve on the Ambulance Corp have set the pace for this vital community program. I wish to thank the Thomas Family and Willow Valley Farms for setting the pace for the business community within our protection and service areas."

In addition, the fire fighters presented subscriptions in the amount of $28,000 and small business concerns an additional $17,000, or a grand total for the night of $105,000.

The minimum campaign goal for $250,000 to be realized over the next eight weeks. The kick-off for the Special Gifts for the families within the protection area will be held March 28th at 8:00 p.m. at the Willow Street Firemen's Building.

Food by Local Parochial Schools

Conservation club organia

STRASBURG, Pa. - A membership dinner and an auction will highlight an organizational meeting of the new Lancaster County Chapter of Ducks Unlimited, Inc., March 30 at 6 p.m. at the Landis Valley Rsort Inn, Oregon Pike, Lancaster.

Theme of the program is, "One Night Out For Conservation." The auction will feature sporting goods, clothing, duck decoys, outdoor prints, paintings and other items of interest to waterfowlers and conservationists.

Membership in the chapter is open to any person interested in waterfowl conservation. Dinner tickets and membership applications are available at all area sporting goods stores.

Organized in January, the local chapter is one of many Ducks Unlimited, Inc., chapters in the United States, Canada and Mexico. The non-profit organization is designed to perpetrate and multiply North American waterfowl populations.

Membership donations are used to lease wetlands for wildlife habitats and conservation projects. To date, more than two million acres of prime habitat are controlled by Ducks Unlimited, Inc., one of the most successful conservation programs in North America.

More than 250 species of birds, 69 different mammals and 19 types of fish inhabit lands and waters controlled by Ducks Unlimited, Inc. The national organization's goal is to secure 4½ million acres of land by 1980.

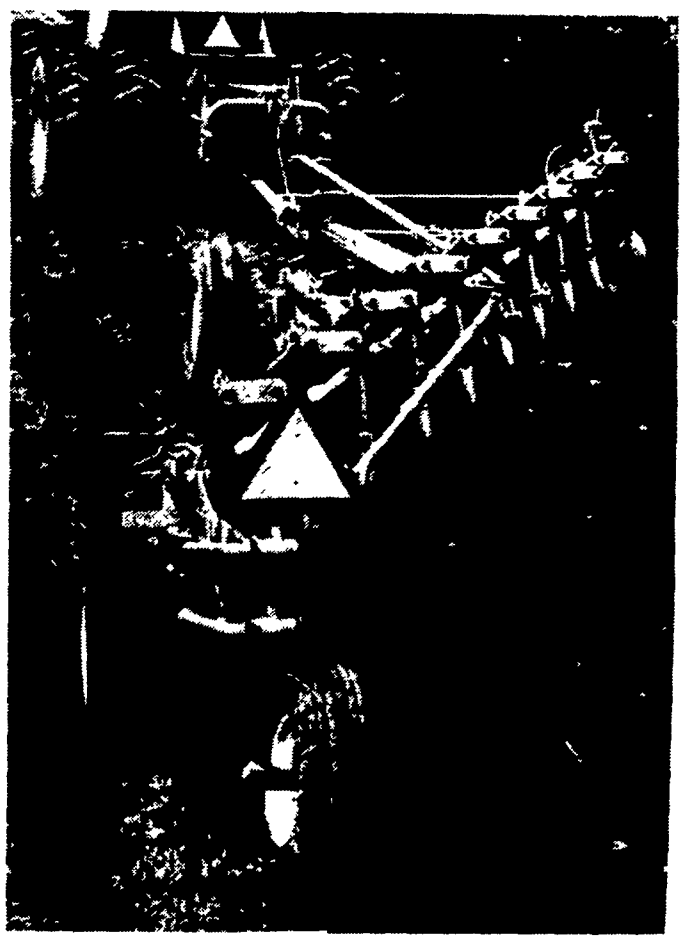
What's new



NEW CASE 700 SERIES DRAWN-TYPE PLOW AVAILABLE IN 6 TO 10 BOTTOM SIZES

J I Case Company has introduced the new trail-type Model 700 moldboard plow. The plow is available in six to 10 bottom sizes with 16 or 18 inch bottoms. Equipped with an on-land, pull-type hitch that provides a favorable line of draft, the Model 700 works easily with tractors equipped with dual wheels. It can plow a strip 15 feet wide in one pass.

Features of the new plow include up to 31½ inches of underclearance and 30 inch rank on the 16 inch bottoms, 29 inch rank with 18 inch bottoms. A basic six bottom frame is constructed with a heavy-wall 6 x 8 inch tubular steel backbone that holds bottoms firmly in line through rough ground. There are no braces to catch heavy stalks and other trash.

The Model 700 trail plow is available with general purpose or stubble bottoms. Units are offered with a choice of three beam trips: spring automatic reset, spring cushion trip or heavy-duty shear pin. There is a wide choice of coulters.

PUBLIC SALE

On the farm located one mile West of Westminster just off Uniontown Road in Carroll County, Md.

SUPERSEEDER

OZARK, Ala. - Reduced production costs and increased crop yields are being credited to an impressive no-till system recently introduced as the SuperSeeder.

The two-, three-, four- or six-row machine will plant prepared or semi-prepared land, directly into sod or a standing cover crop like rye, or even behind grain immediately after combining. Only one operation is necessary to chop, disc, plow, harrow, plant and fertilize crops.

In fields sprayed with a residual herbicide at planting, the need for further tillage is eliminated until harvest. Converted into gallons of diesel fuel, the SuperSeeder requires about one gallon of fuel per acre from land preparation to harvest instead of the average requirement of 5.3 gallons per acre used in conventional planting.

Greatest advantages are realized when planting into a standing cover crop. Rye, for example, provides a mulch which protects soil and young plants from the impact of hard rain, slows water run off, reduces soil erosion and reduces blowing and washing away of fertilizer, herbicides and insecticides.

The farmer's constant concern with rain is further decreased since planting can be started earlier after a rain because land preparation is unnecessary. And a rain is not required to germinate seed since the seed bed is not dried out in the planting operation. The SuperSeeder also contributes to favorable harvesting conditions becase no-till ground is firmer, not as sticky and fields have fewer gullies.

Greatest production increases are attributed to the work of the SuperSeeder's in-row subsoiling foot which breaks through the "hard pan" or plow pan. Formed from the weight of heavy equipment running over a field, this soil compaction area which roots cannot penetrate is usually two to four inches thick and located six to fourteen inches below the surface. Given access through the hard pan, a plant's root system will spread to a depth of six feet and a width of four feet within 45 days after planting. The plant can then feed from six feet of earth instead of six inches. Utilizing a larger water and nutrient supply, a crop will hold up during the moisture stress of a drought period. Elimination of trips across the field also greatly reduces the formation of the plow pan.

The Brown - Harden SuperSeeder is available in two and three row lift types and four and six row pull types from Brown Manufacturing Corporation in Ozark, Alabama.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

BROILER-FRYERS... A SMART BUY NOW

An exceptionally heavy supply of broiler-fryers is coming to market this month, giving you an exceptionally good opportunity to vary your menus in new and different ways with chicken.

Broiler fryers are not only an economically smart buy this month, they're a good nutritional purchase any time. They contain high quality protein necessary to maintaining health. An additional virtue is their ability to combine well with other foods to enable you to vary the ways in which you serve them.

They're a natural to prepare in may Hawaiian recipes. Serve them Mexican style with the appropriate spices and complementary foods. Prepare them Italian with a zesty Cacciatore recipe. Try them Oriental style with water chestnuts, bamboo shoots, or Chinese noodles. Or just barbecue them Western style. You can casserole them, broil them, fry or bake them in so many ways that you are limited only by your spice shelf and your imagination.

The following recipe is a good way to add color to a meal, perk up appetities, and introduce something new:

Chicken Wrap-ups

- 8 broiler-fryer chicken drumsticks
- 1 teaspoon salt
- ¼ teaspoon pepper
- ¼ cup vegetable oil
- ½ cup prepared barbecue sauce
- 1 package (8 ounces) refrigerator crescent dinner rolls
- 2 teaspoons grated Parmesan cheese

Sprinkle salt and pepper on drumsticks. Heat vegetable oil in fry pan over medium heat. Add chicken and cook until lightly brown on all sides. Add barbecue sauce; cover and cook, turning occasionally, 25 minutes or until fork can be inserted with ease. Remove pan from heat. Unroll crescent rolls and separate. Brush each triangle with egg and sprinkle with cheese. Place meaty end of drumstick on triangle. Pull dough around chicken and press edges to seal. Place on ungreased baking sheet. Bake in 375 degrees F. oven about 15 minutes, or until roll is brown. Makes eight appetizer servings.

HOW TO INSURE THE LIFE OF SHEETS

Sheets no longer serve just a utilitarian function. In recent years, they have become an integral part of bedroom decor! Keep them bright and new - looking by exercising care in making beds, repairing rips and tears promptly and laundering frequently.

Always loosen sheets all around from under the mattress before taking them from beds. Never yank them off nor pull sheets from other bedding. A perfectly serviceable sheet may tear with such treatment. Protect sheets from abrasion against a mattress, and the mattress itself, with a mattress pad, which covers the entire top surface of the mattress.

The time to mend any ripped or torn sheets is as soon as they are removed from beds and before laundering.

It's important to change bed linens often since body oils can build up and become more difficult to remove in laundering. Encourage the family to shower or bathe before bed. Distaff members should wash makeup off before retiring. Such measures help prevent staining that may require special methods of removal.

Any stains or spots that do occur should be removed before laundering. Treat according to type of stain. Sort sheets with pieces of similar weight, amount of soil and fabric content. Wash whites with whites and colors with colors. Load the washer loosely and mix sheets with smaller items, for best cleaning and good circulation. A sufficient amount of detergent and water that is not enough are key ingredients in removing body oils.

They also help to eliminate yellowing caused by an accumulation of oils over a period of time. Bear in mind that graying and yellowing are most often caused by soil and oils embedded in fibers through underuse of the washing product.

Most of today's bed linens are permanent press, generally a blend of polyester and cotton. They can be machine dried with wrinkle - free results, if instructions for drying time are followed and sheets removed from the dryer as soon as the appliance stops.

Stack freshly laundered sheets on the bottom of the pile in a linen closet. In this way, they can be rotated in use to insure even wear. Incidentally, the same suggestions and precautions apply to protecting pillowcases.

Dairy club elects officers

A Hoards Dairyman judging contest was the main entertainment of the Western Berks 4-H Dairy Club when it met on March 4 in the home of William Lesher.

Debbie Stump, Mark Wicks, Mark Moyer, Luke Wicks, and Karen Lesher were also chosen as officers of the club for the coming year. Miss Stump is president; Mark Wicks, vice president; Moyer, secretary; Luke Wicks, treasurer; and Miss Lesher, reporter.

The next meeting of the group will be held on April 7 at the home of Karen Lesher.

Odds On

The odds for any particular woman to give birth to twins at a particular time are one in 87 The odds against a bridge player being dealt a hand containing six cards of one suit, four of another, two of a third and one of a fourth are about 20 to 1 Among 10 people the probability is one to 10 that two of them will have the same birthday; among 25 people, the probability is five to 10

DAIRY AUCTION

TUESDAY, MARCH 22, 1977

At 12:30 P.M.

At Jim Adriance Farm. Turn off Route 706, 6 miles West of Montrose, Pa., or off Route 29 at Dimock toward Rush, Susquehanna Co. Follow arrows!

74 HOLSTEINS AND 8 GUERNSEYS

I have two dairys for this sale.

No. 1. Robert and Trudy Keen, Jermyn. 30 mature cows, 9 registered. Most all due this spring, many springing now, a few fresh, a few bred for fall. Big and many outstanding individuals here, papers will be transferred. Also two Copeland 3 hp. compressors. Keens had a barn fire in the winter, making sale necessary.

No. 2. 44 head dairy. 35 mature, 4 bred and 5 open heifers (1 bagging Jersey heifer). This young dairy is year around freshening. Many first and second calf heifers here to calf from July on, and many fresh, springing and handling now. Milking good.

No. 3. Eight Bagging Guernsey first time heifers. Lots of size and quality. Everything preg. examined if needed and 30 days interstate charts. No horns.

Note: Time of sale - 12:30 P.M.

Terms: Cash or approved checks.

Pesticide seminars scheduled

EPHRATA, Pa. - Day-long seminars for Pennsylvania grain dealers and other agribusiness people who must use pesticides in their work will be held on March 28 at the Mountain View Inn, Greensburg, Pa., and on March 29 at he Parkview Manor, Hershey, Pa.

The seminars are designed to help participants gain the knowledge necessary to earn certification under Pennsylvania's new pesticide law. That law becomes effective on October 21 of this year. After that date, pesticides on a list of restricted materials will not be available to those without certificates from the Pennsylvania Department of Agriculture. Materials which are not restricted will continue to be available to any buyer, regardless of whether or not he is certified.

Flour and grain dealers, food processors, dairies and other businesses that use pesticides to battle stored food pests, household pests, birds and rodents are invited to attend the seminar.

Sponsors are PennAge Industries Association, the Pennsylvania State University and the Pennsylvania Department of Agriculture. A $10 registration fee includes the cost of materials, lunch, and a certification examination. Each seminar will begin at 9 a.m. and end at 5 p.m. with the exam.

Reservations should be made by March 21 through Stanley G. Green, Cooperative Extension Service, Broad and Grange Sts., Philadelphia, Pa. 19141, phone 215-HA4-0650.

Pesticide supply adequate, prices may go either way

WASHINGTON, D.C. - Pesticide supplies will more than meet projected farm use in 1977, according to a report released this month by the U.S. Department of Agriculture (USDA). Most pesticide prices are reported to be unchanged, or to be rising only slightly, and a few prices are down.

The report, from USDA's Economic Research Service, projects that a 10- per cent increase in pesticide production and a rise in manufacturer and distributor inventories will boost net supplies 14 per cent over last season.

Farmers' preliminary intentions to plant more soybeans and cotton in 1977 are expected to produce about five per cent greater pesticide demand this year. Growing popularity of herbicide combinations and reduced tillage practices will also contribute to demand.

Weather, however, will be an important factor. Unless rains replenish depleted moisture in the West and parts of the U.S. mid-section before planting time, farmers will probably reduce the use of pesticides on dry soil. Thus, unless moisture conditions improve, demand and prices may drop.

Coffee Hints

Never boil coffee, since boiling brings out the tannic acid in the bean and makes for a bitter as well as a cloudy brew If coffee is ground in the household, it should be done in small quantities in a clean grinder Store ground coffee in a tightly-closed jar in the refrigerator

YORKSHIRES

Do you need a boar that will produce fast growing pigs, low feed conversion, but yet will give you plenty of lean red meat?

Try a YORKSHIRE BOAR from our herd. The herd with the big winners. The last two years we have had the superior boar over all breeds at the New York State Fair.

We also have bred Gilts and Open Gilts both for the purebred and commercial breeder. Delivery available.

PUBLIC SALE
OF VALUABLE REAL ESTATE
ON SATURDAY, APRIL 9, 1977
at 2 P.M. sharp

At RD 1, Wrightsville, Pa. on the Craley-Bull Run Road in Lower Windsor Twp. The undersigned will offer at public sale the following:

REAL ESTATE

Approx. 8½ acres of land improved with a 2½ story frame farm house with 7 rooms & bath, oil heat, well water-hand dug well, ground cave, summer house, wagon shed. Also located on this tract of ground along the Craley-Bull Run Road are 2 dwellings, each 1½ story with brick siding, each having 4 rooms & bath, heated by oil forced hot air heat, well water, partially cemented basements. The ground is approx. ⅓ farming and ⅔ in pasture and woodland. This is and ideal place for someone to keep horses, do a little farming or gardening, a real good investment type piece of real estate. It could be used in building & in various other ways. Houses are in good condition throughout, must be seen to be appreciated. Will be open for inspection on Saturday, April 2, 11 A.M. to 2 P.M., on day of sale or by special appt. phone 244-3161 or call auctioneer.

Terms: 10% down, balance in 60 days. Other conditions will be made known on day of sale. Not responsible for accidents on day of sale. If on the market for real estate of this type, be sure and attend this public sale.

COMPARE PRICE AND VALUE OF YOUR PRESENT MILK REPLACER WITH NEW FORMULA PURINA NURSE-GRO®

PROTEIN.....NOT LESS THAN 22.0%

FAT.....NOT LESS THAN 10.0%

FIBER.....NOT MORE THAN 0.5%

ADVANTAGES

- INSTANT FLASH MIXING
- HIGHEST QUALITY DIGESTIBLE PROTEIN
- HIGH ANTIBIOTIC LEVEL TO FIGHT BACTERIAL SCOURS
- HIGH DIGESTIBLE FAT LEVEL TO IMPROVE WEIGHT GAIN
- LOW COST — ONLY $14.95 FOR 50 LB. BAG. EACH 50 LB. BAG FEEDS 2 CALVES.

THE PURINA DIFFERENCE: CHECK YOUR INGREDIENT TAG!!

PURINA DOES NOT USE SOY FLOUR TO MAKE ITS MILK REPLACERS.

SOY FLOUR IS AN INEXPENSIVE PROTEIN SOURCE USED IN MANY MILK REPLACERS, HOWEVER IT IS NOT READILY DIGESTIBLE BY THE YOUNG CALF. USING INGREDIENTS NOT EASILY DIGESTIBLE OR THAT CONTAIN TOO MUCH FIBER CAN CAUSE DIGESTIVE UPSETS IN YOUNG CALVES WHICH CAN LEAD TO CALF SCOURS.
